cause and effect passages 4th grade: NAEP 1992 Reading Report Card for the Nation and the States Ina V. S. Mullis, 1993 The National Assessment of Educational Progress' (NAEP) 1992 reading assessment was administered to nationally representative samples of fourth-, eighth-, and twelfth-grade students attending public and private schools, and to state representative public-school samples of fourth graders in 43 jurisdictions. Nearly 140,000 students were assessed in all. Data were summarized on the NAEP reading proficiency scale ranging from 0 to 500, and results were reported according to three achievement levels at each grade--basic, proficient, and advanced. Major findings were that (1) 59% of the fourth graders, 69% of eighth graders, and 75% of twelfth graders reached the basic level or beyond; (2) 25%, 28%, and 37% of grade 4, 8, and 12 students met or exceeded the proficient level, respectively; (3) from 2% to 4% of students at any of the grade levels achieved the advanced performance level; (4) fourth graders within the basic level generally understood simple narratives; (5) eighth graders reading within the basic level demonstrated literal understanding of passages; (6) twelfth graders within the basic level were able to interpret aspects of the passages they read and make connections between their reading and their own knowledge; (7) students attending private schools had higher average reading proficiency than students at public schools; (8) considerable variation in performance existed within and across participating states; (9) females had higher average reading proficiency than males at all three grade levels; and (10) fourth graders appeared to be learning reading through varied instructional approaches. (Contains 67 tables and 9 figures of data; a detailed description of anchoring the achievement levels, an overview of procedures, state contextual background factors, and reading passages are attached.) cause and effect passages 4th grade: *Curriculum Development for Students with Mild Disabilities* Carroll J. Jones, 2010 Many teachers of students with mild disabilities experience difficulty writing IEPs, and they lack a foundation in the regular education curriculum of academic skills and sequences associated with each grade level. This book was designed to provide this foundation. Presented in the form of scope and sequence charts that can be used as objectives for the State Frameworks (goals and benchmarks), this resource assists in preparing IEPs, including the new process of identification of children with disabilities through their responses to intervention (RTI). An additional focus is on the impact of federal laws (IDEA and NCLB) on the curriculum and assessment in schools today. The book has been reorganized into ten chapters, including: historical perspectives; early childhood special education curricula; oral expression curricula; reading and listening curricula; written expression curricula; mathematics curricula; educational technology

curricula K-12; social and self competence curricula; science curricula; and evaluation reports/case studies (Appendix). The scope and sequence charts were modified to include current national education standards and benchmarks and the skills in each of the academic areas that require annual state assessment. These charts will assist teachers in modifying the general education curriculum for students with mild disabilities and to write complete Individual Education Programs, using age-appropriate and developmentally appropriate teaching and assessment materials. Chapter summaries, included for review purposes, also serve as selective and motivational reading. With special education teachers in short supply and the demands on their time so great, this book will provide a valuable resource for cutting the clutter and moving to the heart of the teaching process: determining what skills students need to move effectively to the next level.

cause and effect passages 4th grade: *Reading Instruction for Students who are at Risk Or Have Disabilities* William D. Bursuck, Mary Damer, 2007 Organized according to the Reading First categories of reading development and instruction as presented in the report of the National Reading Panel, this exciting and timely new text presents teaching strategies for children at-risk, including children of poverty, children for whom English is not their primary language, and children with learning and behavioral disabilities. These are the children No Child Left Behind challenges teachers to serve more effectively. The book is more than a list of teaching strategies that are scientifically-validated; the scientifically-validated practices included are integrated into a systematic teaching process that stresses the use of student outcome data within authentic classroom contexts to guide practice. The teaching strategies have been field tested with at-risk children in both rural and urban teaching settings. Most of the strategies have resulted from work the authors did in their recent four-year federally-funded model-demonstration grant in which they have implemented an extensive reading problem prevention model in grades K-3 in three inner-city schools. Thus, the teaching strategies in the book are ones that the authors implemented every day with at-risk children, not just findings from research articles. Features of this First Edition Include: Content organized around the five components validated by the National Reading Panel: phonemic awareness, phonics, fluency, vocabulary, and comprehension. Readers learn how to use DIBELS and other curriculum-based assessment results for early identification of children at risk of reading failure and to monitor student progress. A unique feature is using DIBELS assessments to pinpoint student skill development as they acquire alphabetic principle. Accompanying DVD shows teacher explicitly teaching letter sound recognition, regular word decoding, sight words, multisyllable word reading, passage reading, vocabulary, and comprehension. Text explains how to use Differentiated Instruction to maximize learning for all students. Specific strategies are detailed for implementing Response To Intervention (RTI) multi-tier instruction during the reading block. Examines building vocabulary knowledge through direct and indirect teaching strategies. Comprehension strategies identified by the National Reading Panel that help students derive meaning from text are emphasized. Strategies for individualizing instruction for adolescents and children who are bilingual and/or ESL are included within each chapter. Effective strategies for managing classroom behavior, including instruction groups are provided so that student behavior does not interfere with reading instruction.
