coaching form template word: Template-based Management Uwe G. Seebacher, 2020-10-29 The Template-based management (TBM) approach has been used since 2003 across the world in diverse contexts. It has evolved hand-in-hand with the evolution of business: Agile, Blueprints, Canvas, Design Thinking, or Kanban are only few of the many current concepts based on the approach. This book expands and upgrades the author's 2003 book 'Template-driven Consulting' (Springer) by tracing this evolution and offering the current state-of-the-art to practitioners. TBM combines structure and method: pre-structuring diverse processes, it helps to present complex

activities and procedures in a simple, clear, and transparent manner and then implement them. The use of TBM ranges from conception or creative work in agencies to designing organizations and strategies, planning and monitoring initiatives and projects, to innovation management and optimizing cost structures, processes, or entire departments and divisions. The book also demonstrates how successful organizations use TBM to methodically and structurally apply the internal know-how in a cost and time-optimal way for attaining sustainable business success. Readers will learn to apply and use TBM, identify its importance, and benefit from a variety of case studies that illustrate the application and use for the entire business and management practice.

coaching form template word: *The Global Business of Coaching* David Lines, Christina Evans, 2020-04-22 Coaching has become a global business phenomenon, yet the way that coaching has evolved and spread across the globe is not unproblematic. Some of these challenges include: different types/genres of coaching; understanding and relevance of different coaching philosophies and models in different cultural contexts; equivalency of qualifications and coach credentials, as well as questions over standards and governance, as part of a wider debate around professionalization. Coaching then, as with the transfer of knowledge and professionalization in other disciplines, is not immune to ethnocentricity. Through a combination of adopting a meta-analysis of coaching, supported with narratives of coaching practice drawn from different socio-political/cultural contexts, the aim of this book is to challenge current knowledge, understanding and norms of how coaching is, or should, be practised in different cultural contexts. This book will provide a foundation for further research in coaching as an academic field of study and as an emerging profession. It will resonate with critical scholars, coach educators, and coach practitioners who want to develop their praxis and enhance their reflexivity and be of interest to researchers, academics, and students in the fields of business and leadership, human resource development, organizational learning and development, mentoring and coaching.
