dcf kansas forms: I'm Feeling the Blues Right Now Stephen A. King, 2011-06-01 In I'm Feeling the Blues Right Now: Blues Tourism and the Mississippi Delta, Stephen A. King reveals the

strategies used by blues promoters and organizers in Mississippi, both African American and white, local and state, to attract the attention of tourists. In the process, he reveals how promotional materials portray the Delta's blues culture and its musicians. Those involved in selling the blues in Mississippi work to promote the music while often conveniently forgetting the state's historical record of racial and economic injustice. King's research includes numerous interviews with blues musicians and promoters, chambers of commerce, local and regional tourism entities, and members of the Mississippi Blues Commission. This book is the first critical account of Mississippi's blues tourism industry. From the late 1970s until 2000, Mississippi's blues tourism industry was fragmented, decentralized, and localized, as each community competed for tourist dollars. By 2003-2004, with the creation of the Mississippi Blues Commission, the promotion of the blues became more centralized as state government played an increasing role in promoting Mississippi's blues heritage. Blues tourism has the potential to generate new revenue in one of the poorest states in the country, repair the state's public image, and serve as a vehicle for racial reconciliation.

dcf kansas forms: Entomology Cedric Gillott, 2005-12-27 Gillott's thorough yet clear writing style continues to keep Entomology near the top of the class as a text for senior undergraduates, and for graduate students and professionals seeking an introduction to specific entomological topics. The author's long-held belief that an introductory entomology course should present a balanced treatment of the subject is reflected in the continued arrangement of the book in four sections: Evolution and Diversity, Anatomy and Physiology, Reproduction and Development, and Ecology. For the third edition, all chapters have been updated. This includes not only the addition of new information and concepts but also the reduction or exclusion of material no longer considered mainstream, so as to keep the book at a reasonable size. Based on exciting discoveries made during the previous decade, the topics of insect evolutionary relationships, semiochemicals, gas exchange, immune responses (including those of parasites and parasitoids), flight, and the management of pests have received particular attention in the preparation of the third edition. Overall, more than 30 new or significantly revised figures have been incorporated.

dcf kansas forms: Beyond Grief Cynthia Mills, 2014-09-23 Beyond Grief explores high-style funerary sculptures and their functions during the turn of the twentieth century. Many scholars have overlooked these monuments, viewing them as mere oddities, a part of an individual artist's oeuvre, a detail of a patron's biography, or local civic cemetery history. This volume considers them in terms of their wider context and shifting use as objects of consolation, power, and multisensory mystery and wonder. Art historian Cynthia Mills traces the stories of four families who memorialized their losses through sculpture. Henry Brooks Adams commissioned perhaps the most famous American cemetery monument of all, the Adams Memorial in Washington, D.C. The bronze figure was designed by Augustus Saint-Gaudens, who became the nation's foremost sculptor. Another innovative bronze monument featured the Milmore brothers, who had worked together as sculptors in the Boston area. Artist Frank Duveneck composed a recumbent portrait of his wife following her early death in Paris; in Rome, the aging William Wetmore Story made an angel of grief his last work as a symbol of his sheer desolation after his wife's death. Through these incredible monuments Mills explores questions like: Why did new forms--many of them now produced in bronze rather than stone and placed in architectural settings--arise just at this time, and how did they mesh or clash with the sensibilities of their era? Why was there a gap between the intention of these elite patrons and artists, whose lives were often intertwined in a closed circle, and the way some public audiences received them through the filter of the mass media? Beyond Grief traces the monuments' creation, influence, and reception in the hope that they will help us to understand the larger story: how survivors used cemetery memorials as a vehicle to mourn and remember, and how their meaning changed over time.
