- Surface Temperature: Plotted on the horizontal axis, typically decreasing from left (hotter stars) to right (cooler stars).
- Spectral Types: Indicate the star's surface temperature and are labeled along the horizontal axis (O, B, A, F, G, K, M).
- Main Sequence: The prominent diagonal band where most stars, including the Sun, reside.
- Giant and Supergiant Regions: Located above the main sequence.
- White Dwarfs: Found below the main sequence, representing remnants of stars.
