the legal environment today 10th edition pdf: *Our Earth Matters* Bharat H. Desai, 2021-06-15 On 21 May 2019, it was officially recognized that we are now living in the Anthropocene, our earth's latest geological epoch, named for the 'unmistakable imprint of human activities'. This announcement came almost 60 years after the publication of Rachel Carson's landmark work of environmental writing, *Silent Spring*, and next year (2022) it will be 50 years since the first UN Conference on the Human Environment, held in Stockholm in June 1972. This book, *Our Earth Matters: Pathways to a Better Common Environmental Future*, is a special issue of the journal *Environmental Policy and Law*, which was first published in 1975. It presents 21 invited contributions by outstanding scholars from around the world, which examine existing global regulatory approaches, processes, instruments and institutions for the protection of the global environment. The articles are grouped under four headings: Prognoses, Processes, Problematique and Prospects, and in them the authors have sought to explore answers to the existential environmental crisis. They urge us to ponder our reckless destruction of natural spaces, endangering of plant and animal species, poisoning of the environment, and general disturbance of our essential ecological processes. The primary objective of the book is to raise the awareness of the global audience by inspiring scholars and decision-makers to re-examine current global approaches to environmental issues and explore the future trajectory with new ideas and frameworks for international environmental governance in the 21st century and beyond. The book will be of interest to all those working to secure the sustainable future of the human race on our only abode, planet Earth. Bharat H. Desai is Professor of International Law and Jawaharlal Nehru Chair in International Environmental Law, Centre for International Legal Studies, School of International Studies, Jawaharlal Nehru University, New Delhi; Editor-in-Chief of the journal *Environmental Policy & Law* (Amsterdam: IOS Press) and of the *Yearbook of International Environmental Law* (Oxford: OUP).

the legal environment today 10th edition pdf: *Biopolitics and Resistance in Legal Education* Thomas Giddens, Luca Siliquini-Cinelli, 2023-06-30 Taking up the study of legal education in distinctly biopolitical terms, this book provides a critical and political analysis of resistance in the law school. Legal education concerns the complex pathways by which an individual becomes a lawyer, making the journey from lay-person to expert, from student to practitioner. To pose the idea of a biopolitics of legal education is not only to recognise the tensions surrounding this journey but also to recognise that legal education is a key site in which the subject engages, and is engaged by, a particular structure—and here the particular structure of the law school. This book explores the resistance to that structure, including: different ways in which law's pedagogic structures might be incomplete, or are being fought against; the use of less conventional elements of

cultural discourse to resist the abstraction of the lawyer in students' subject formation; the centralisation of queer and feminist discourses to disrupt the hierarchies of the legal curriculum; the use of digital technologies; the place of embodiment in legal education settings; and the impacts of posthuman knowledges and contexts on legal learning. Assembling original, field-defining essays by both leading international scholars and emerging researchers, this book constitutes an indispensable resource in legal education research and scholarship that will appeal to legal academics everywhere.

the legal environment today 10th edition pdf: [Due Diligence in the International Legal Order](#) Heike Krieger, Anne Peters, Leonhard Kreuzer, 2020-12-03 Due diligence is a prominent concept in international law, frequently referred to in arbitral awards, court decisions, and in scholarly discussions on state responsibility. However, until now, the specific normative content and systemic relation of due diligence to rules and principles of international law has largely remained unexplored. The present book provides a comprehensive analysis of the content, scope, and function of due diligence across various areas of international law, including international environmental law, international peace and security law, and international economic law. Sector by sector, contributors explore the diverse interactions between due diligence and area-specific substantive and procedural rules as well as general principles of international law. This book exposes the promises and limits of due diligence for enhancing accountability and compliance. It identifies the rise of due diligence as both a driver and signal of change in the international legal order towards risk management and proceduralisation.
