accp bcps practice exam: Handbook for Pharmacy Educators Shane Desselle, Dana P Hammer, 2002-08-22 What can senior pharmacy faculty do to help their junior colleagues succeed? The *Handbook for Pharmacy Educators: Getting Adjusted as a New Pharmacy Faculty Member* gives voice to junior pharmacy faculty members who present their personal accounts of their experiences on the job. These six junior faculty, representing the basic, administrative, and clinical sciences, share their lessons learned, give advice on what to do (and what NOT to do) as a new faculty member, and relate the triumphs and challenges they met along the way. For balance, a senior faculty member with experience in both teaching and research environments shares his thoughts on what the other authors have to say. From the editors: "Despite the existence of a couple of excellent references in this area, there has not been any previous work that takes this approach—that is, of allowing junior faculty, representing both teaching and research institutions, to share 'memoirs' of their own unique experiences. We hope that this approach will ease the way for new faculty members and provide senior faculty, deans, and administrators who are long removed from new faculty status a better understanding of the hurdles that new faculty must clear today. In gaining this understanding, they may become even better advisors, mentors, and administrators." The *Handbook for Pharmacy Educators: Getting Adjusted as a New Pharmacy Faculty Member* will help new faculty address the questions that start with "how," like, How can I: be sure to start my teaching out on the right foot? figure out which teaching strategies are most appropriate? establish and develop good rapport with my students? begin to establish mutually beneficial relationships with my colleagues? socialize and make new friends in my new environment? gain support for my research agenda? learn what resources are available to me? find out about performance appraisals and rewards? handle or appreciate the extra pressures facing faculty who don't happen to be white males?

You need all the resources you can get to make sure you are prepared! In addition to the exam being very difficult, you are likely a busy professional with very minimal free time. I've always had a hard time staying focused while studying from large review article type study guides and have squandered hours reading while retaining very little. This book is intended to be a crash course/cheat sheet overview of the most highly testable material. I wanted to remember the really important stuff, because I know it is impossible to know every minute detail. BCPS Bullets, the Condensed BCPS Study Guide will help prepare you for the exam as well as help you maximize your study time. We covered over 100+ disease states straight from the BCPS content outline provided by BPS, and included important pearls for each condition including assessments, risk factors, most commonly used drugs of choice, must know adverse effects, miscellaneous clinical pearls, notorious drug interactions, warnings and precautions, and of course, relevant labs. I wanted to cover each disease state in 1-2 pages to try to ensure you are reviewing the most relevant content. We did go over 2 pages on some disease states, but we did our best to keep the information concise and critical for you to know in your preparation to becoming a Board Certified Pharmacotherapy Specialist. The book is over 300+ pages, but it is in bullet point format and very easy to digest multiple disease states at a sitting. There is also some white around the margins to take additional notes or highlight essential information to remember. As many of you are aware from the content outline, the BCPS exam is not all clinical. In addition to the disease states on the BCPS content outline, we've also included sections on biostatistics as well as important regulatory issues. I can assure you that there is no doubt this book will help in your preparation to becoming a BCPS pharmacist! The Board Certified Pharmacotherapy Specialist (BCPS) is a designation from the Board of Pharmacy Specialties.
