hindu epaper login: Against Dharma Wendy Doniger, 2018-03-20 An esteemed scholar of Hinduism presents a groundbreaking interpretation of ancient Indian texts and their historic influence on subversive resistance Ancient Hindu texts speak of the three aims of human life: dharma, artha, and kama. Translated, these might be called religion, politics, and pleasure, and each is held to be an essential requirement of a full life. Balance among the three is a goal not always met, however, and dharma has historically taken precedence over the other two qualities in Hindu life. Here, historian of religions Wendy Doniger offers a spirited and close reading of ancient Indian writings, unpacking a long but unrecognized history of opposition against dharma. Doniger argues that scientific disciplines (shastras) have offered lively and continuous criticism of dharma, or religion, over many centuries. She chronicles the tradition of veiled subversion, uncovers connections to key moments of resistance and voices of dissent throughout Indian history, and offers insights into the Indian theocracy's subversion of science by religion today.

hindu epaper login: India Emerging Sandip Sen, Aarohi Sen, 2019-04-18 India, like most democratic developing nations, is prone to populist politics. In the search of votes, politicians look for popular solutions with mass appeal. Some popular solutions benefit the poor, some hurt the economy. Poor economics leads to falling numbers. Falling numbers get statistically captured as economic data. And, the impact of such economic data is immense. This data can lift or crash currency markets, stock markets, affect credit ratings, fuel inflation, affect new investments and even result in mass layoffs. However, there is always a story behind the data. These stories are guided mostly by executive decisions. Some decisions are far-reaching and beneficial to the masses, some cater to political vote banks, some are guided by increasing activism, some serve the need for social justice, some are aimed at environmental protection, while some are simply driven by the greed of power or wealth. This is the story of every regime. The book narrates this compelling data story in a layman's language. Even where data is wrong it leaves behind a tell-tale mark of anomalies, which trips the economy sooner than later. Fudged, incorrect or lazily collected data is worse than genuine but unimpressive data as you do not know what to correct. India Emerging thus captures this dialogue on the pros and cons of economic and political decisions that can be understood by the common voter who is neither an economist nor an academician.

hindu epaper login: "Cause Unknown" Ed Dowd, 2022-11-09 What is killing healthy young Americans? 2020 saw a spike in deaths in America, smaller than you might imagine during a pandemic, some of which could be attributed to COVID and to initial treatment strategies that were not effective. But then, in 2021, the stats people expected went off the rails. The CEO of the OneAmerica insurance company publicly disclosed that during the third and fourth quarters of 2021, death in people of working age (18-64) was 40 percent higher than it was before the pandemic. Significantly, the majority of the deaths were not attributed to COVID. A 40 percent increase in deaths is literally earth-shaking. Even a 10 percent increase in excess deaths would have been a

1-in-200-year event. But this was 40 percent. And therein lies a story—a story that starts with obvious questions: What has caused this historic spike in deaths among younger people? What has caused the shift from old people, who are expected to die, to younger people, who are expected to keep living? It isn't COVID, of course, because we know that COVID is not a significant cause of death in young people. Various stakeholders opine about what could be causing this epidemic of unexpected sudden deaths, but "CAUSE UNKNOWN" doesn't opine or speculate. The facts just are, and the math just is. The book begins with a close look at the actual human reality behind the statistics, and when you see the people who are represented by the dry term Excess Mortality, it's difficult to accept so many unexpected sudden deaths of young athletes, known to be the healthiest among us. Similarly, when lots of healthy teenagers and young adults die in their sleep without obvious reason, collapse and die on a family outing, or fall down dead while playing sports, that all by itself raises an immediate public health concern. Or at least it used to. Ask yourself if you recall seeing these kinds of things occurring during your own life—in junior high? In high school? In college? How many times in your life did you hear of a performer dropping dead on stage in mid-performance? Your own life experience and intuition will tell you that what you're about to see is not normal. Or at least it wasn't normal before 2021.

It uses Pakistan as a case study to draw broader lessons for other developing countries.

hindu epaper login: Line on Fire Happymon Jacob, 2018-12-24 The India-Pakistan border in Jammu & Kashmir has witnessed repeated ceasefire violations (CFVs) over the past decade. As relations between India and Pakistan have deteriorated, CFVs have increased exponentially. It is imperative to gain a deeper understanding of these violations owing to their potential to not only cause a crisis but also escalate an ongoing one. Line on Fire, part of the Oxford International Relations in South Asia series, postulates that the incorrect diagnosis of the reasons behind CFVs has led to wrong policies being adopted by both India and Pakistan to deal with the recurrent violations. Using fresh empirical data and first-hand accounts, the volume attempts to understand the reason why CFVs continue to take place between India and Pakistan despite consistent efforts to reduce the tension between the two nations. In doing so, it recontextualizes and enriches the prevailing arguments in contemporary literature on escalating dynamics and unending ceasefire agreements between the two South Asian nuclear rivals.

hindu epaper login: Development Challenges of India After Twenty Five Years of Economic Reforms Nripendra Kishore Mishra, 2020-10-14 This book revisits some of the persisting challenges of development of India, which remain unresolved even after twenty-five years of economic reforms and almost fifteen years of high growth rate. These include defining purpose of development, inequality, labour, work, unemployment, agrarian distress and migration. The book questions the overemphasis on growth to the extent of neglecting basic issues of development. With a number of contributions re-imagining development and its political economy, the book discusses above mentioned issues in light of new data and more recent conceptions of the issues. The contributors of this volume are eminent researchers in their respective field. Presenting primary as well as secondary data, the book considers the latest advances and research and also addresses new challenges like the global reorganization of production and the consequences for labour and the world of work, along with skills question. World of work has received detailed investigation in this book. This is a timely addition in existing literature especially in context of pandemic and lockdown. Informality and un/employment question is addressed in this context. Relationship among poverty, inequality and growth is examined in light of newer understanding. Agrarian distress is looked in a broader context. A number of papers are examining migration question by expanding coverage of migration and including labour mobility as apart of migration debate. The present crisis of migrant labour and absence of social security for these workers is also discussed. This book is primarily

intended for those interested in recent advances on some of the basic aspects of development, like poverty, inequality, informality, world of work, migration and labour mobility. It is also useful for researchers, policy makers, journalists and civil society organizations working on these issues.

hindu epaper login: Urban Navigations Jonathan Shapiro Anjaria, Colin McFarlane, 2013-02-01 This book provides an important account of how the city in South Asia is produced, lived and contested. It examines the diverse lived experiences of urban South Asia through a focus on contestations over urban space, resources and habitation, bringing together accounts from India, Pakistan, Nepal and Sri Lanka. In contrast to accounts that attribute urban transformation mainly to neoliberal globalisation, this book vividly demonstrates how neoliberalism functions as one of the many drivers of urban change. This edited volume brings together an interdisciplinary and international range of established and emerging scholars working on the city in South Asia. To date, South Asian urban studies privilege a handful of cities, particularly in India, overlooking the great diversity, as well as commonalities, of urban experiences spanning the region. Thus, in addition to chapters on New Delhi, Mumbai and Bangalore, this volume contains critical urban chapters on less-studied cities such as Lahore, Islamabad, Kathmandu, Colombo and Dhaka. The volume insists that a fresh look at contemporary changes in cities in South Asia requires careful consideration of the specificity of the city, as well as a comparative perspective. It provides a sense not only of the new forms of urbanism emerging in contemporary South Asia, but also sheds light on new theoretical possibilities and directions to make sense of transnational processes and urban change.

hindu epaper login: India China L.H.M. Ling, Adriana Erthal Abdenur, Payal Banerjee, Nimmi Kurian, Mahendra P. Lama, Li Bo, 2021-03-11 Challenging the Westphalian view of international relations, which focuses on the sovereignty of states and the inevitable potential for conflict, the authors from the Borderlands Study Group reconceive borders as capillaries enabling the flow of material, cultural, and social benefits through local communities, nation-states, and entire regions. By emphasizing local agency and regional interdependencies, this metaphor reconfigures current narratives about the China India border and opens a new perspective on the long history of the Silk Roads, the modern BCIM Initiative, and dam construction along the Nu River in China and the Teesta River in India. Together, the authors show that positive interaction among people on both sides of a border generates larger, cross-border communities, which can pressure for cooperation and development. India China offers the hope that people divided by arbitrary geo-political boundaries can circumvent race, gender, class, religion, and other social barriers, to form more inclusive institutions and forms of governance.

hindu epaper login: Family Ambiguity and Domestic Violence in Asia Maznah Mohamad, Saskia Wieringa, 2013 Domestic violence in Asia is explored in this analysis through questions of family ambiguity and the relationship between concept, law, and strategy. Comparative experiences in the Asian context enable an examination of the effectiveness of family regulations and laws in diverse national, cultural, and religious settings. Key questions relate to the limits and relevance of the human rights discourse in resolving family conflicts; the extent to which power and control in intimate relationships can actually be regulated by a set of inanimate, homogeneous, and uniform policies and legislations; and how the state relates to the family as an ambiguous unit given state rules of governance that perpetuate unequal gender relations. Carefully considering the many components of domestic violence--such as state intervention versus the private domain and differences in legislation across Asia--the book offers new theoretical insights to the conceptualization of the family, culture, and law, and provides reasoned new perspectives on the effectiveness or inadequacy of present policies and enforcement strategies against domestic violence in Asia.
