rizq planet: CHAPTER 1-B AFROO OONOO,

rizq planet: *The Nuwaubian Nation* Susan Palmer, 2016-12-05 The Nuwaubian Nation takes the reader on a journey into an African-American spiritual movement. The United Nuwaubian Nation has changed shape since its inception in the 1970s, transforming from a Black Hebrew mystery school

into a Muslim utopian community in Brooklyn, N.Y.; from an Egyptian theme park into an Amerindian reserve in rural Georgia. This book follows the extraordinary career of Dwight York, who in his teens started out in a New York street gang, but converted to Islam in prison. Emerging as a Black messiah, York proceeded to break the Paleman's spell of Kingu and to guide his people through a series of racial/religious identities that demanded dramatic changes in costume, gender roles and lifestyle. Dr. York's Blackosophy is analyzed as a new expression of that ancient mystical worldview, Gnosticism. Referring to theories in the sociology of deviance and media studies, the author tracks the escalating hostilities against the group that climaxed in a Waco-style FBI raid on the Nuwaubian compound in 2002. In the ensuing legal process we witness Dr. York's dramatic reversals of fortune; he is now serving a 135-year sentence as his Black Panther lawyer prepares to take his case to the Supreme Court. This book presents fresh and important insights into racist spirituality and the social control of unconventional religions in America.

rizq planet: *Islam, Science Fiction and Extraterrestrial Life* Jörg Matthias Determann, 2020-09-17 The Muslim world is not commonly associated with science fiction. Religion and repression have often been blamed for a perceived lack of creativity, imagination and future-oriented thought. However, even the most authoritarian Muslim-majority countries have produced highly imaginative accounts on one of the frontiers of knowledge: astrobiology, or the study of life in the universe. This book argues that the Islamic tradition has been generally supportive of conceptions of extra-terrestrial life, and in this engaging account, Jörg Matthias Determann provides a survey of Arabic, Bengali, Malay, Persian, Turkish, and Urdu texts and films, to show how scientists and artists in and from Muslim-majority countries have been at the forefront of the exciting search. Determann takes us to little-known dimensions of Muslim culture and religion, such as wildly popular adaptations of Star Wars and mysterious movements centred on UFOs. Repression is shown to have helped science fiction more than hurt it, with censorship encouraging authors to disguise criticism of contemporary politics by setting plots in future times and on distant planets. The book will be insightful for anyone looking to explore the science, culture and politics of the Muslim world and asks what the discovery of extra-terrestrial life would mean for one of the greatest faiths.

rizq planet: UFOs, Chemtrails, and Aliens Donald R. Prothero, Timothy D. Callahan, 2017-08-02

A wide-ranging survey offers “entertainment as well as wisdom for everyone who’s ever wondered what’s behind so many conspiracy theories and paranormal phenomena” (Publishers Weekly). UFOs. Aliens. Strange crop circles. Giant figures scratched in the desert surface along the coast of Peru. The amazing alignment of the pyramids. Strange lines of clouds in the sky. The paranormal is alive and well in the American cultural landscape. In *UFOs, Chemtrails, and Aliens*, Donald R. Prothero and Tim Callahan explore why such demonstrably false beliefs thrive despite decades of education and scientific debunking. Employing the ground rules of science and the standards of scientific evidence, Prothero and Callahan discuss a wide range of topics including the reliability of eyewitness testimony, psychological research into why people want to believe in aliens and UFOs, and the role conspiratorial thinking plays in UFO culture. They examine a variety of UFO sightings and describe the standards of evidence used to determine whether UFOs are actual alien spacecraft. Finally, they consider our views of aliens and the strong cultural signals that provide the shapes and behaviors of these beings. While their approach is firmly based in science, Prothero and Callahan also share their personal experiences of Area 51, Roswell, and other legendary sites, creating a narrative that is sure to engross both skeptics and believers.

rizq planet: Metaphysical Africa Michael Muhammad Knight, 2020-09-15 The Ansaru Allah Community, also known as the Nubian Islamic Hebrews (AAC/NIH) and later the Nuwaubians, is a deeply significant and controversial African American Muslim movement. Founded in Brooklyn in the 1960s, it spread through the prolific production and dissemination of literature and lecture tapes and became famous for continuously reinventing its belief system. In this book, Michael Muhammad Knight studies the development of AAC/NIH discourse over a period of thirty years, tracing a surprising consistency behind a facade of serial reinvention. It is popularly believed that the AAC/NIH community abandoned Islam for Black Israelite religion, UFO religion, and Egyptosophy. However, Knight sees coherence in AAC/NIH media, explaining how, in reality, the community taught that the Prophet Muhammad was a Hebrew who adhered to Israelite law; Muhammad’s heavenly ascension took place on a spaceship; and Abraham enlisted the help of a pharaonic regime to genetically engineer pigs as food for white people. Against narratives that treat the AAC/NIH community as a postmodernist deconstruction of religious categories, Knight demonstrates that AAC/NIH discourse is most productively framed within a broader African American metaphysical history in which boundaries between traditions remain quite permeable. Unexpected and engrossing, *Metaphysical Africa* brings to light points of intersection between communities and traditions often regarded as separate and distinct. In doing so, it helps move the field of religious studies beyond conventional categories of “orthodoxy” and “heterodoxy,” challenging assumptions that inform not only the study of this particular religious community but also the field at large.

rizq planet: UFO Religions Christopher Partridge, 2012-11-12 The spectre of the UFO, as popularized by shows such as *The X-Files*, has brought an astonishing slant to the face of modern religious practice. But what motivates the fantastical and sometimes sinister beliefs of UFO worshippers? *UFO Religions* critically examines some of the fascinating issues surrounding UFO worship - abduction narratives, UFO-based interpretations of other religions, the growth of pseudo-sciences purporting to explain UFOs, and the responses of the core scientific community to such claims. Focusing on contemporary global UFO groups including the Raelian Movement, Heaven's Gate, Unarius and the Ansaaru Allah Community, it gives a clear profile of modern UFO controversies and beliefs.

The universe, he explains, is filled with life, and human beings are not alone. Earth, our home, is simply one planet in a sky filled with thousands of universes, each with the potential to harbor life beyond our human ability to understand. If we can simply come to accept and embrace the fact that we are just one small part of the inconceivably vast miracle of life across the stars, our own world would change. In his *The Book of Knowledge: I Am Alien*, he shares an eclectic and thought-provoking array of ideas to inspire, engage, and capture your imagination. Kuntarkis also answers questions submitted by people from all over the world.
