routledge introductory course in modern hebrew: *Shakespeare, Italy, and Transnational Exchange* Enza De Francisci, Chris Stamatakis, 2017-05-12 This interdisciplinary, transhistorical collection brings together international scholars from English literature, Italian studies, performance history, and comparative literature to offer new perspectives on the vibrant engagements between Shakespeare and Italian theatre, literary culture, and politics, from the sixteenth to the twenty-first century. Chapters address the intricate, two-way exchange between Shakespeare and Italy: how the artistic and intellectual culture of Renaissance Italy shaped Shakespeare's drama in his own time, and how the afterlife of Shakespeare's work and reputation in Italy since the eighteenth century has permeated Italian drama, poetry, opera, novels, and film. Responding to exciting recent scholarship on Shakespeare and Italy, as well as transnational theatre, this volume moves beyond conventional source study and familiar questions about influence, location, and adaptation to propose instead a new, evolving paradigm of cultural interchange. Essays in this volume, ranging in methodology from archival research to repertory study, are unified by an interest in how Shakespeare's works represent and enact exchanges across the linguistic, cultural, and political boundaries separating England and Italy. Arranged chronologically, chapters address historically-contingent cultural negotiations: from networks, intertextual dialogues, and exchanges of ideas and people in the early modern period to questions of authenticity and formations of Italian cultural and national identity in the eighteenth and nineteenth century. They also explore problems of originality and ownership in

twentieth- and twenty-first-century translations of Shakespeare's works, and new settings and new media in highly personalized revisions that often make a paradoxical return to earlier origins. This book captures, defines, and explains these lively, shifting currents of cultural interchange.

routledge introductory course in modern hebrew: Semitic Languages in Contact Aaron Butts, 2015-09-29 Semitic Languages in Contact contains twenty case studies analysing various contact situations involving Semitic languages. The languages treated span from ancient Semitic languages, such as Akkadian, Aramaic, Classical Ethiopic, Hebrew, Phoenician, and Ugaritic, to modern ones, including languages/dialects belonging to the Modern Arabic, Modern South Arabian, Neo-Aramaic, and Neo-Ethiopian branches of the Semitic family. The topics discussed include writing systems, phonology, morphology, syntax, and lexicon. The approaches range from traditional philology to more theoretically-driven linguistics. These diverse studies are united by the theme of language contact. Thus, the volume aims to provide the status quaestionis of the study of language contact among the Semitic languages. With contributions from A. Al-Jallad, A. Al-Manaser, D. Appleyard, S. Boyd, Y. Breuer, M. Bulakh, D. Calabro, E. Cohen, R. Contini, C. J. Crisostomo, L. Edzard, H. Hardy, U. Horesh, O. Jastrow, L. routledge introductory course in modern hebrew: Syntactic Analysis and Description David Lockwood, 2005-05-01 This book is designed to teach undergraduate and beginning graduate students how to understand, analyse and describe syntactic phenomena in different languages. The book covers every aspect of syntax from the basics to more specialised topics, such as clitics which have grammatical importance but cannot be used in isolation, and negation, in which a construction contradicts the meaning of a sentence. The approach taken combines concepts from different theoretical schools, which view syntax differently. These include M. A. K. Halliday's systemic functional linguistics, the stratificational school advocated by Sydney Lamb, and Kenneth L. Pike's tagmemic model. The emphasis of the book is on syntactic structures rather than linguistic meaning, and the book stresses the difference between a well-formed sentence and a meaningful one. The final chapter brings these two aspects together, to show the connections between syntax and semology. Each chapter concludes with exercises from a diverse range of languages and a list of major technical terms. The book also includes a glossary as an essential resource for students approaching this difficult subject for the first time.

routledge introductory course in modern hebrew: El universo de las lenguas Juan Carlos Moreno Cabrera, 2003 EL UNIVERSO DE LAS LENGUAS: CLASIFICACIÓN, DENOMINACIÓN, SITUACIÓN, TIPOLOGÍA, HISTORIA Y BIBLIOGRAFÍA DE LAS LENGUAS Esta obra ofrece, por primera vez en español, un catálogo completo y actualizado de las lenguas del mundo, basado en las aportaciones más recientes y autorizadas de la lingüística moderna. En más de una ocasión, se ha sentido la necesidad de ofrecer al público de habla española una obra de referencia en la que se proporcione, de forma ordenada y sistemática, información sobre la clasificación, filiación genética, situación geo-demográfica, tipo de estructura gramatical e historia de todos los idiomas y en la que se proponga un nombre español, que se atenga a nuestras normas fonéticas, morfológicas y ortográficas, para todos y cada uno de ellos. Esta obra pretende cumplir todos estos objetivos. Además, el presente catálogo, con el que se quieren celebrar los doscientos años de la aparición del "Catálogo de las lenguas de las naciones conocidas" (1800-1805) de Lorenzo Hervás y Panduro, presenta, por primera vez en una obra de esta naturaleza, una amplia recopilación bibliográfica de descripciones gramaticales de todas las lenguas del mundo publicadas entre los años 1800 y 2000. Se presta atención especial en este libro a la situación de muchas comunidades lingüísticas actuales que, por su reducido número de miembros y por condicionantes adversos de diverso tipo, ven peligrar gravemente la continuidad de su cultura y de su lengua. El libro se enriquece con un completo índice de casi ocho mil entradas de glotónimos (nombres de lengua) españoles, y con un diccionario de glotónimos inglés-español de más de seis mil entradas. Ambos serán de mucha utilidad para traductores, educadores o informadores. La propuesta de normalización glotonímica del español que se detalla en este libro, la más completa y razonada existente hasta la fecha, se basa en la dilatada experiencia del autor en este ámbito y constituye un punto de referencia imprescindible para la modernización y puesta al día de la terminología especializada de la lengua española contemporánea. EL AUTOR JUAN CARLOS MORENO CABRERA es catedrático de Lingüística General en la Universidad Autónoma de Madrid. Ha publicado "Lógica Formal y Lingüística" (1987), "Fundamentos de Sintaxis General" (1987), "Lenguas del Mundo" (1990), "La lingüística Teórico-Tipológica" (1995), "Diccionario de Lingüística Neológica y Multilingüe" (1998), "Curso Universitario de Lingüística General" (2a ed. 2000), "La Dignidad e Igualdad de las lenguas" (2000), "Semántica y Gramática" (2003) e "Introducción a la Lingüística" (2a ed. 2004). Ha dirigido la adaptación al español de la "Enciclopedia del Lenguaje de la Universidad de Cambridge", ha publicado varios artículos sobre la situación de la diversidad lingüística mundial y ha formado parte del comité científico del "Informe sobre las Lenguas del Mundo" de la UNESCO.
