sierra bullets catalog pdf: Drug War Capitalism Dawn Paley, 2014-11-10 Though pillage, profit, and plunder have been a mainstay of war since pre-colonial times, there is little contemporary focus on the role of finance and economics in today's Drug Wars—despite the fact that they boost US banks and fill our prisons with poor people. They feed political campaigns, increase the arms trade, and function as long-term fixes to capitalism's woes, cracking open new territories to privatization and foreign direct investment. Combining on-the-ground reporting with extensive research, Dawn Paley moves beyond the usual horror stories, beyond journalistic rubbernecking and hand-wringing, to follow the thread of the Drug War story throughout the entire region of Latin America and all the way back to US boardrooms and political offices. This unprecedented book chronicles how terror is used against the population at large in cities and rural areas, generating panic and facilitating policy changes that benefit the international private sector, particularly extractive industries like petroleum and mining. This is what is really going on. This is drug war capitalism. Dawn Paley is a freelance journalist who has been reporting from South America, Central America, and Mexico for over ten years. Her writing has been published in the *Nation*, the *Guardian*, *Vancouver Sun*, *Globe and Mail*, *Ms. magazine*, the *Tyee*, *Georgia Straight*, and *NACLA*, among others.

sierra bullets catalog pdf: Blair's Successful War Andrew M. Dorman, 2016-04-08 Andrew Dorman introduces Sierra Leone as Blair's second great military adventure after Kosovo and the first he undertook on his own. It is tied to Blair's 1999 Chicago speech on the 'Doctrine of the International Community', his move towards humanitarianism and the impact of the Kosovo experience. The book links this move with the rise of cosmopolitan militaries and the increasing involvement of Western forces in humanitarian operations and their impact on the international system. Furthermore, it places it within the context of defence transformation and the emerging Western expeditionary capabilities, in particular the European Union's new battle group concept and developments in concepts such as Network Centric Warfare and Networked Enabled Capability. Examining the whole campaign and considering the impact on the Blair Government, this book will prove to be a key reader on the topic.

sierra bullets catalog pdf: The Credibility Challenge Inken von Borzyskowski, 2019-06-15 The key to the impact of international election support is credibility; credible elections are less likely to turn violent. So argues Inken von Borzyskowski in The Credibility Challenge, in which she provides an explanation of why and when election support can increase or reduce violence. Von Borzyskowski answers four major questions: Under what circumstances can election support influence election violence? How can election support shape the incentives of domestic actors to engage in or abstain from violence? Does support help reduce violence or increase it? And, which type of support—observation or technical assistance—is better in each instance? The Credibility Challenge pulls broad quantitative evidence and qualitative observations from Guyana, Liberia, Kenya, Sierra Leone, and Bangladesh to respond to these questions. Von Borzyskowski finds that international democracy aid matters for election credibility and violence; outside observers can exacerbate postelection violence if they cast doubt on election credibility; and technical assistance helps build electoral institutions, improves election credibility, and reduces violence. Her results advance research and policy on peacebuilding and democracy promotion in new and surprising ways.

sierra bullets catalog pdf: Insurgent Women Jessica Trisko Darden, Alexis Henshaw, Ora Szekeley, 2019-03-01 Why do women go to war? Despite the reality that female combatants exist the world over, we still know relatively little about who these women are, what motivates them to take up arms, how they are utilized by armed groups, and what happens to them when war ends. This book uses three case studies to explore variation in women's participation in nonstate armed groups in a range of contemporary political and social contexts: the civil war in Ukraine, the conflicts involving Kurdish groups in the Middle East, and the civil war in Colombia. In particular, the authors examine three important aspects of women's participation in armed groups: mobilization, participation in combat, and conflict cessation. In doing so, they shed light on women's pathways into and out of nonstate armed groups. They also address the implications of women's participation in these conflicts for policy, including postconflict programming. This is an accessible and timely work that will be a useful introduction to another side of contemporary conflict.

sierra bullets catalog pdf: Accountability for Mass Starvation Bridget Conley, Alex de Waal, Catriona Murdoch, Wayne Jordash QC, 2022-09-01 Famine is an age-old scourge that almost disappeared in our lifetime. Between 2000 and 2011 there were no famines and deaths in humanitarian emergencies were much reduced. The humanitarian agenda was ascendant. Then, in 2017, the United Nations identified four situations that threatened famine or breached that

threshold in north-eastern Nigeria, Somalia, South Sudan, and Yemen. Today, this list is longer. Each of these famines is the result of military actions and exclusionary, authoritarian politics conducted without regard to the wellbeing or even the survival of people. Violations of international law including blockading ports, attacks on health facilities, violence against humanitarian workers, and obstruction of relief aid are carried out with renewed impunity. Yet there is an array of legal offenses, ranging from war crimes and crimes against humanity to genocide, available to a prosecutor to hold individuals to account for the deliberate starvation of civilians. However, there has been a dearth of investigations and accountability for those violating international law. The reasons for this neglect and the gaps between the black-letter law and practice are explored in this timely volume. It provides a comprehensive overview of the key themes and cases required to catalyze a new approach to understanding the law as it relates to starvation. It also illustrates the complications of historical and ongoing situations where starvation is used as a weapon of war, and provides expert analysis on defining starvation, early warning systems, gender and mass starvation, the use of sanctions, journalistic reporting, and memorialization of famine.

sierra bullets catalog pdf: Dictators and Democrats Stephan Haggard, Robert R. Kaufman, 2016-09-06 A rigorous and comprehensive account of recent democratic transitions around the world From the 1980s through the first decade of the twenty-first century, the spread of democracy across the developing and post-Communist worlds transformed the global political landscape. What drove these changes and what determined whether the emerging democracies would stabilize or revert to authoritarian rule? Dictators and Democrats takes a comprehensive look at the transitions to and from democracy in recent decades. Deploying both statistical and qualitative analysis, Stephen Haggard and Robert Kaufman engage with theories of democratic change and advocate approaches that emphasize political and institutional factors. While inequality has been a prominent explanation for democratic transitions, the authors argue that its role has been limited, and elites as well as masses can drive regime change. Examining seventy-eight cases of democratic transition and twenty-five reversions since 1980, Haggard and Kaufman show how differences in authoritarian regimes and organizational capabilities shape popular protest and elite initiatives in transitions to democracy, and how institutional weaknesses cause some democracies to fail. The determinants of democracy lie in the strength of existing institutions and the public's capacity to engage in collective action. There are multiple routes to democracy, but those growing out of mass mobilization may provide more checks on incumbents than those emerging from intra-elite bargains. Moving beyond well-known beliefs regarding regime changes, Dictators and Democrats explores the conditions under which transitions to democracy are likely to arise.

sierra bullets catalog pdf: Grading Goal Four Antonia Wulff, 2020-04-14 For the third time in three decades world leaders reaffirmed their promise of Education For All when adopting Sustainable Development Goal 4 in 2015. It is the most far-reaching commitment to quality and equity in education so far, yet, there is no consensus on what the agenda means in practice. With a decade left until the 2030 deadline, Grading Goal Four calls upon the education community to engage more thoughtfully and critically with SDG 4 and related efforts. As an ever-growing number of actors and initiatives claim to contribute to its achievement, it is becoming clear that the ambitious but broad priorities within the goal are vulnerable to cherry-picking and misrepresentation, placing it at the heart of tensions between instrumentalist and rights-based approaches to education. This text, a critical analysis of SDG 4, provides a framework for examining trends and developments in education globally. As the first volume that examines early implementation efforts under SDG 4, Grading Goal Four formulates a critique along with strategies for moving forward. By scrutinising the challenges, tensions and power dynamics shaping SDG 4, it advances rights-based perspectives and strategies for effective implementation and builds capacity for strengthened monitoring and analysis of the goal.

sierra bullets catalog pdf: Fighting at the Legal Boundaries Kenneth Watkin, 2016 Fighting at the Legal Boundaries offers a holistic approach towards the application of the various constitutive parts of international law. The author focuses on the interaction between the applicable bodies of

law by exploring whether their boundaries are improperly drawn, or are being interpreted in too rigid a fashion. Emphasis is placed on the disconnect that can occur between theory and practice regarding how these legal regimes are applied and interact with one another. Through a number of case studies, *Fighting at the Legal Boundaries* explores how the threat posed by insurgents, terrorists, and transnational criminal gangs often occurs not only at the point where these bodies of law interact, but also in situations where there is significant overlap. In this regard, the exercise of the longstanding right of States to defend nationals, including the conduct of operations such as hostage rescue, can involve the application of human rights based law enforcement norms to counter threats transcending the conflict spectrum.
