studies weekly florida: A Land Remembered Goes To School Patrick D Smith, 2001-03-15 An elementary school teacher's manual for using *A Land Remembered* to teach language arts, social studies, and science coordinated with the Sunshine State Standards of the Florida Department of Education. In this best-selling novel, Patrick Smith tells the story of three generations of the MacIveys, a Florida family who battle the hardships of the frontier to rise from a dirt-poor Cracker life to the wealth and standing of real estate tycoons. The story opens in 1858, when Tobias MacIvey arrives in the Florida wilderness to start a new life with his wife and infant son, and ends two generations later in 1968 with Solomon MacIvey, who realizes that the land has been exploited far beyond human need. The sweeping story that emerges is a rich, rugged Florida history featuring a memorable cast of crusty, indomitable Crackers battling wild animals, rustlers, Confederate deserters, mosquitoes, starvation, hurricanes, and freezes to carve a kingdom out of the swamp. But their most formidable adversary turns out to be greed, including finally their own. Love and tenderness are here too: the hopes and passions of each new generation, friendships with the persecuted blacks and Indians, and respect for the land and its wildlife. studies weekly florida: The Miracle of the Black Leg Patricia Williams, 2024-06-25 Brilliant essays from the renowned Nation columnist—aka the Mad Law Professor—tackling questions of identity, bioethics, race, surveillance, and more Beginning with a jaw-dropping rumination on a centuries-old painting featuring a white man with a Black man's leg surgically attached (with the expired Black leg-donor in the foreground), contracts law scholar and celebrated journalist Patricia J. Williams uses the lens of the law to take on core questions of identity, ethics, and race. With her trademark elegant prose and critical legal studies wisdom, Williams brings to bear a keen analytic eye and a lawyer's training to chapters exploring the ways we have legislated the ownership of everything from body parts to gene sequences—and the particular ways in which our laws in these areas isolate nonnormative looks, minority cultures, and out-of-the-box thinkers. At the heart of "Wrongful Birth" is a lawsuit in which a white couple who use a sperm bank sue when their child "comes out Black"; "Bodies in Law" explores the service of genetic ancestry testing companies to answer the question of who owns DNA. And "Hot Cheeto Girl" examines the way that algorithms give rise to new predictive categories of human assortment, layered with market-inflected cages of assigned destiny. In the spirit of Dorothy Roberts, Rebecca Skloot, and Anne Fadiman, *The Miracle*

of the Black Leg offers a brilliant meditation on the tricky place where law, science, ethics, and cultural slippage collide.
