Tci Geography Alive

tci geography alive: Enablers, Barriers, and Challenges for Inclusive Curriculum Charamba, Erasmios, Ndhlovana, Shalom Nokuthula, 2025-05-29 United Nations' 2030 Agenda for Sustainable Development Goal 4 seeks to ensure inclusive and equitable quality education and to promote lifelong learning opportunities for all learners. Education can only unfold its full potential to transform our world if it is approached from a lifelong learning perspective. In this way, learners' lives are brought closer to education through integrated, multi-sectoral approaches that draw the focus from supply to demand. In order to achieve this, institutions and educators need to come up with strategies that are inclusive regardless of the student's intellectual challenges, physical stature, gender, language, culture, or mode of learning. Enablers, Barriers, and Challenges for Inclusive Curriculum examines the impact of enablers and barriers on education for students and teachers. It discusses promoting inclusive curriculum in face-to-face, online, and blended learning environments. Covering topics such as educational transitions, large classrooms, and school-going young mothers, this book is an excellent resource for educators, student teachers, parents, policymakers, professionals, researcher, scholars, academicians, and more.

tci geography alive: *Handbook of Geography Education* Sarah Witham Bednarz, Jerry T. Mitchell, 2025-01-27 This handbook presents a broad and comprehensive overview of research and practices in geography education at primary and secondary levels (from birth to about age 18). It summarizes the current state of knowledge in this sub-discipline of geography. Including authors representative of many geography education traditions, the book pays equal attention to learning and teaching and to respect student voices, and includes rich in case studies, evidence-based research, and specific examples. It also emphasizes ways that geography education can contribute to global concerns about social justice, diversity, equity, and inclusion as well as ways it can help to prepare the next generation of informed, critical, and reflective members of societies. The book is divided into five sections: · Purposes of geography education—Why is it taught? · Perspectives on

geography education—What is taught? · Practices of geography education—How is it organized and taught? · Preparation of geography educators—How are geography educators prepared? · Possibilities for geography education—What is/are the future(s) of geography education By providing broad perspectives and lively and accessible writing, this handbook is a useful tool for novice geography educators, teacher educators, educational policy makers, support staff such as librarians and media resource specialists, curriculum developers, and assessment experts in many world regions.

tci geography alive: *Collaboration and the Future of Education* Gordon Andrews, Wilson J. Warren, James Cousins, 2015-10-08 Current educational reforms have given rise to various types of educational Taylorism, which encourage the creation of efficiency models in pursuit of a unified way to teach. In history education curricula, this has been introduced through scripted textbook-based programs such as Teacher Curriculum Institute's History Alive! and completely online curricula. They include the jargon of authentic methods, such as primary sources, cooperative learning, differentiated instruction, and access to technology; yet the craft of teaching is removed, and an experience that should be marked by discovery and reflection is replaced with comparatively empty processes. This volume provides systematic models and examples of ways that history teachers can compete with and effectively halt this transformation. The alternatives the authors present are based on collaborative models that address the art of teaching for pre-service and practicing secondary history teachers as well as collegiate history educators. Relying on original research, and a maturing body of secondary literature on historical thinking, this book illuminates how collaboration can create real historical learning.
