the pioppi diet pdf free download: The Complete Pioppi Diet Cookbook Craig Pecker, 2021-11 The Pioppi diet is the latest diet that stimulates people to eat low-carb and high-fat foods. According to its creators, it would significantly improve health. This diet does not focus so much on counting calories or more exercise. It asks the user to follow specific dietary guidelines. Ironically, this is also the village where American scientist Ancel Keys spent six months a year researching the cause of heart disease. His research, which turned out to be flawed in its relation to saturated fat, cholesterol and heart disease, caused people to start eating low-fat foods at the end of the 1970s. The Pioppi diet encourages plenty of vegetables, nuts, legumes and fish, but discourages red meat, starchy carbs and sweet treats. Although there is no one 'Mediterranean diet', most traditional diets from the region are high in heart-healthy fats such as the monounsaturated fats from olives and olive oil. Of course, the traditional Italian diet also incorporates many starchy foods, such as bread and pasta. By comparison, an author recommend a low-carb diet that is rich in fat, including saturated fats from ingredients like coconut oil which are not typically part of an Italian diet. It also limits starchy foods such as bread and pasta. The diet was created by Dr Aseem Malhotra, a cardiologist, and Donal O'Neill, a former international athlete and documentary film-maker (Cereal Killers). Both authors are advocates of the 'low-carb, high-fat' approach to eating. The authors recommend avoiding all sugars (including honey) and most starchy carbs including rice, white potatoes, bread, pasta, cereals as well as other flour-based foods. Eggs, cheese and full-fat dairy, including fermented dairy products, are allowed on the plan. The Pioppi Diet is presented as a 21-day lifestyle plan that includes dietary changes combined with an active lifestyle, adequate sleep, regular socialisation, as well as alcohol in moderation. You are also advised to do a weekly 24-hour fast. The Mediterranean diet is the gold standard of healthy eating. Research continues to support the many health claims of the diet: reduced risk of death from a heart attack or stroke, lower bad cholesterol levels, and lower risk of type 2 diabetes. From moderate servings of fish and wine to cutting back on red meat, its guiding principles remain relatively easy to stick to in a confusing - and often extreme - nutrition landscape.
