washington state nonprofit handbook 2022: The Palgrave Handbook of Non-State Actors in East-West Relations Péter Marton, Gry Thomasen, Csaba Békés, András Rác, 2024-09-28 The Handbook introduces to readers (accessibly for specialist and non-specialist scholars, students and layman audiences) the diverse universe of non-state actors (NSAs) that have played or are currently playing a significant role in the context of East-West relations (from 1945 to the present). With a view to the oft-seen political debates about which non-state actors may be independent or controlled by particular states, and in what ways they may be useful or harmful to the interests of particular actors, this volume is interested in analysing and assessing the relationship of NSAs to key state actors in the context of the politics of East-West relations. Key state actors in this context include more than just the United States (on the one hand) and the Soviet Union or Russia (on the other hand). To offer a structured overview, the volume explores possible

typologies of the relationships conceivable between NSAs and states. New concepts and organising principles are presented, to support a process-tracing analysis of the evolution of proxy ships, partnerships and other types of connections between states and non-state actors. Degrees, sources and types of control and influence are considered. Further, the Handbook's chapters also examine NSAs' impact on the dynamics of interstate conflict and cooperation in the East-West dimension. The systematic examination of the relationship between states and NSAs in East-West relations proposed here is the first undertaking of its kind. International scholarship in political science and strategic analyses have so far neglected to develop an analytical framework and a truly nuanced understanding that could capture the intricate and multilevel relationships that exists between NSAs and states in this context.

washington state nonprofit handbook 2022: Nonprofit Neighborhoods Claire Dunning, 2022-06-23 An exploration of how and why American city governments delegated the responsibility for solving urban inequality to the nonprofit sector. Nonprofits serving a range of municipal and cultural needs are now so ubiquitous in US cities, it can be difficult to envision a time when they were more limited in number, size, and influence. Turning back the clock, however, uncovers both an illuminating story of how the nonprofit sector became such a dominant force in American society, as well as a troubling one of why this growth occurred alongside persistent poverty and widening inequality. Claire Dunning's book connects these two stories in histories of race, democracy, and capitalism, revealing how the federal government funded and deputized nonprofits to help individuals in need, and in so doing avoided addressing the structural inequities that necessitated such action in the first place. Nonprofit Neighborhoods begins after World War II, when suburbanization, segregation, and deindustrialization inaugurated an era of urban policymaking that applied private solutions to public problems. Dunning introduces readers to the activists, corporate executives, and politicians who advocated addressing poverty and racial exclusion through local organizations, while also raising provocative questions about the politics and possibilities of social change. The lessons of Nonprofit Neighborhoods exceed the bounds of Boston, where the story unfolds, providing a timely history of the shift from urban crisis to urban renaissance for anyone concerned about American inequality—past, present, or future.
