wendler 531 pdf: Consensus on Environmentally Sustainable Oral Healthcare Nicolas Martin, Steven Mulligan, Ian J. Shellard, Paul V. Hatton, 2022-12-01 The Oral Healthcare community, including clinical professionals and industry, acknowledges the shared responsibility to deliver products and interventions that improve oral health in a more sustainable manner. To deliver this, the community is working in alignment with the UN Sustainable Development Goals. Key to establishing this collaborative stakeholder consensus is a deep contextual understanding of the

challenge. This is achieved through a comprehensive account of the levels of awareness of the environmental impacts, the challenges to resolve these impacts together with the drivers and opportunities to promote sustainable practices. This report concludes with a strategic action framework that makes specific recommendations and identifies best practice to achieve these goals. The promotion of excellent oral healthcare and the development of a circular economy are core to this strategy. Additionally, it is also important to recognise the opportunities to collaborate across the sector, and throughout supply chains, to develop and promote sustainable practices to achieve meaningful and measurable environmental outcomes in the sector. In this context, the FDI World Dental Federation convened the development of this volume, Consensus on Environmentally Sustainable Oral Healthcare: A Joint Stakeholder Statement. This consensus statement brings together a global coalition of stakeholders, representing all aspects of industry, health professionals, experts, legislative authorities and governments. The statement uses a truly collaborative, multi-stakeholder approach to identify the major challenges facing oral healthcare, the complex drivers that underpin current behaviours and practices, and the best opportunities to improve and deliver sustainable oral healthcare for people and the planet. Concluding with an impactful and robust strategic action plan that crosses all boundaries, the statement identifies a series of actions and recommendations for best practice that address the sustainability issues facing the whole sector.

wendler 531 pdf: Mehr Verantwortung in der Welt: Deutschlands Rolle bei der Fortentwicklung der europäischen Sicherheits- und Verteidigungspolitik Jenny Wendler, 2016-01 Deutschland ist führende Handels- und Wirtschaftsmacht in Europa und profitiert damit wie kein anderes europäisches Land von der Europäischen Union (EU). Ebenso profitiert Deutschland in erheblichem Maße von der Globalisierung und der derzeitigen Nachkriegsweltordnung. Dafür ist es jedoch auch nötig, dass der europäische Integrationsprozess im sicherheits- und verteidigungspolitischen Bereich weiter vorangetrieben wird, damit die EU als globaler Akteur auch in Zukunft neben den anderen Mächten der Welt bestehen und Deutschland seine außenpolitischen Interessen im internationalen System realisieren kann. Doch Europa und ganz besonders Deutschland hinken hinter den sicherheits- und verteidigungspolitischen Möglichkeiten anderer Mächte, insbesondere den USA, Indien und China hinterher. Im Rahmen des stagnierenden Integrationsprozesses der GSVP stellt sich die zentrale Frage, welche Rolle Deutschland bei der Fortentwicklung der GSVP spielen kann. Zur Beantwortung der zentralen Frage werden zwei Theoriemodelle herangezogen: Die erste Hypothese befindet sich auf der Ebene des internationalen Systems und lautet: Deutschland strebt zwar nicht nach militärischer Macht als solcher; versucht jedoch, durch Ausbau seiner sicherheits- und verteidigungspolitischen Handlungsmöglichkeiten im Rahmen der GSVP sein Gewicht und seinen Einfluss auch in anderen internationalen Organisationen wie NATO und UN weiter zu erhöhen. Die Untersuchung konzentriert sich hier auf den modifizierten neorealistischen Ansatz der Tübinger Politologen Baumann, Rittberger und Wagner und knüpft damit an deren Studie an, die das deutsche Außenpolitikverhalten vor und nach der Wiedervereinigung erforschen. Dies erfolgt anhand der Fallbeispiele „Teilnahme an GSVP-geführten Missionen“ und „strategische Stärkung der GSVP“ durch die Enable-and-Enhance-Initiative. Neben dieser Untersuchung auf systemischer Ebene folgt eine zweite Untersuchung auf der subsystemischen Ebene. Dies erfolgt

anhand des konstruktivistischen Strategic-Culture-Ansatzes und bedient sich der Fallbeispiele „Auslandseinsätze zur Wahrung wirtschaftlicher Interessen“ (Rücktritt Köhlers) und „Die Libyen-Enthaltung“. Die dazu theoriebezogene Hypothese lautet: Deutschland wird in seinem Streben nach mehr Einfluss in internationalen Kontexten durch verbreitete militär-skeptische Einstellungen in der Bevölkerung gebremst.

wendler 531 pdf: *Vaccines for Biodefense and Emerging and Neglected Diseases* Alan D.T. Barrett, Lawrence R. Stanberry, 2009-03-05 The last 20 years has seen a rapid increase in infectious diseases, particularly those that are termed emerging diseases such as SARS, neglected diseases such as malaria and those that are deemed biothreats such as anthrax. It is well-recognized that the most effective modality for preventing infectious diseases is vaccination. This book provides researchers with a better understanding of what is currently known about these diseases, including whether there is a vaccine available or under development. It also informs readers of the key issues in development of a vaccine for each disease. - Provides a comprehensive treatise of the agents that are responsible for emerging and neglected diseases and those that can be used as biothreats - Includes the processes such as the vaccine development pathway, vaccine manufacturing and regulatory issues that are critical to the generation of these vaccines to the marketplace - Each chapter will include a map of the world showing where that particular disease is naturally found

wendler 531 pdf: Soziale Inklusion an Schulen in Nordrhein-Westfalen Marcel Dick, 2025-05-12 Mit der Ratifizierung des Übereinkommens über die Rechte von Menschen mit Behinderungen im Jahr 2009 verpflichtete sich die Bundesrepublik Deutschland zu einem inklusiven Bildungssystem. Schüler*innen mit sonderpädagogischem Förderbedarf (SFB) wurde dadurch das Recht auf den Zugang zu einer Regelschule zugesprochen. Trotz Bemühungen, Maßnahmen und Beschlüssen zeigen sich fortwährend starke Beharrungskräfte in Politik und Gesellschaft, welche sich letztlich auch auf das Bildungssystem auswirken. Ausgehend von einem Forschungsinteresse, welches die soziale Inklusion von Schüler*innen mit SFB adressiert, untersucht der Band die sozialen Beziehungsnetzwerke – positiv wie negativ – von Schüler*innen in inklusiven Schulklassen. Hierbei kommen explizit netzwerkanalytische Verfahren und Modelle zum Einsatz, was in der Forschungslandschaft zur sozialen Inklusion von Schüler*innen mit SFB bisher eine methodische Leerstelle und ein Desiderat darstellt.
