Guevarra, 2023-07-14 Aloha Compadre: Latinxs in Hawai'i is the first book to examine the collective history and contemporary experiences of the Latinx population of Hawai'i. This study reveals that contrary to popular discourse, Latinx migration to Hawai'i is not a recent event. In the national memory of the United States, for example, the Latinx population of Hawai'i is often portrayed as recent arrivals and not as long-term historical communities with a presence that precedes the formation of statehood itself. Historically speaking, Latinxs have been voyaging to the Hawaiian Islands for over one hundred and ninety years. From the early 1830s to the present, they continue to help shape Hawai'i's history, yet their contributions are often overlooked. Latinxs have been a part of the cultural landscape of Hawai'i prior to annexation, territorial status, and statehood in 1959. Aloha Compadre also explores the expanding boundaries of Latinx migration beyond the western hemisphere and into Oceania.

aloha pos training: How to Open and Operate a Restaurant Arthur Meyer, Mick Van Vann, 2013-07-02 The restaurant business is both an established field and also an evolving one. Today more people eat out, having less time to cook at home. With the advent of the celebrity chef, many people are interested in trying new and different foods. The expansive cable television networks provide entertainment in the form of "reality shows" revolving around winning money to open a dream restaurant or be top chef. The globalization of food distribution allows people everywhere to become familiar with ingredients never before available, stimulating their interest in food as more than sustenance. Dining out becomes entertainment as well as filling the need for nourishment. With over 80 combined years of cooking experience, Meyer and Vann have seen the trials of opening and running restaurants—those they have worked in and those they have designed and helped to open. They bring this expertise to How to Open and Operate a Restaurant and will take the reader through all the aspects of opening and running a restaurant including many examples of pitfalls to avoid, rules to follow and guidelines for success.

aloha pos training: Felder's Comprehensive, 2005 Edition Nick Felder, 2005-07-14 Every industry has its standard professional directory -- advertising has its Black Book, manufacturing its Thomas's Register -- except, that is, for architecture...and design...and construction. While there are dozens of smaller directories, each addressing a specific market niche, none speak to all three industries in a comprehensive way. And larger product directories, like Sweets, are advertising driven and therefore incomplete. Felder's Comprehensive is the first pan-industry guide of its kind, and it is many times more comprehensive than the nearest competitor. It is an annual desk reference, directory, and product source guide with more reference information than any other title currently available. It contains thousands of listings of time-sensitive and timeless reference information for anyone involved in the business or practice of architecture, design, design/build, construction, interior design, facility management, and real-estate development. For example, readers can find listings for more than 12,000 manufacturers of furnishings, fixtures, equipment, and materials listed alphabetically, and, most importantly, by product category. Felder's also lists design competitions, domestic and international trade shows, trade publications and other media, trade associations, professional organizations, and more. Most sections are indexed and cross-referenced for easy referral and identification. Felder's is the first truly comprehensive reference guide of its kind for the A/E/C marketplace and is certain to become the industry standard.
