hmh lausd: *The New Politics of the Textbook* Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions, this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K-16 schools to perpetuate their interests at the expense of minoritized social

groups. The contributors provide a comprehensive examination of how textbooks, the most dominant cultural force in which corporations and political leaders impact the schooling curricula, shape students' thoughts and behavior, perpetuate power in dominant groups, and trivialize social groups who are oppressed on the structural axes of race, class, gender, sexuality, and (dis)ability. Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism, militarism, consumerism, White supremacy, heterosexism, rugged individualism, technology, and a positivistic conception of the world. Finally, the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other, to reflect upon the constitutive forces causing oppression in schools and in the wider society, and to reflect upon how to challenge corporate and political dominance over knowledge production.

hmh lausd: Mapping Leadership Richard Halverson, Carolyn Kelley, 2017-06-29 Drawing on twenty years of research in school effectiveness, this book presents a distributed model of task-based school leadership that leads to continuous school improvement. The book outlines the tasks school leadership teams must focus on to improve teaching and learning, grouped into the following five domains: Focus on Learning Monitoring Teaching and Learning Building Nested Learning Communities Acquiring and Allocating Resources Maintaining a Safe and Effective Learning Environment Recognizing that the principal is a single actor in a complex web of activity influencing student learning, the focus is not only on the principal's role but on a range of leadership and instructional practices to be shared across the leadership team (including APs, counselors, teachers, and support personnel). These tasks, organized into 21 subdomains, have been demonstrated through extensive research to contribute to improved student learning.
