i survived pdf: Statistics for Data Scientists Maurits Kaptein, Edwin van den Heuvel, 2022-02-02 This book provides an undergraduate introduction to analysing data for data science, computer science, and quantitative social science students. It uniquely combines a hands-on approach to data analysis - supported by numerous real data examples and reusable [R] code - with a rigorous treatment of probability and statistical principles. Where contemporary undergraduate textbooks in probability theory or statistics often miss applications and an introductory treatment of modern methods (bootstrapping, Bayes, etc.), and where applied data analysis books often miss a rigorous theoretical treatment, this book provides an accessible but thorough introduction into data analysis, using statistical methods combining the two viewpoints. The book further focuses on methods for dealing with large data-sets and streaming-data and hence provides a single-course introduction of statistical methods for data science.

Ritchie, 2022-05-24 An instant national best seller A persuasive primer on police abolition from two veteran organizers "One of the world's most prominent advocates, organizers and political educators of the [abolitionist] framework." —NBCNews.com on Mariame Kaba In this powerful call to action, New York Times bestselling author Mariame Kaba and attorney and organizer Andrea J. Centering survivors of state, interpersonal, and community-based violence, and highlighting uprisings, campaigns, and community-based projects, No More Police makes a compelling case for a world where the tools required to prevent, interrupt, and transform violence in all its forms are abundant. Part handbook, part road map, No More Police calls on us to turn away from systems that perpetrate violence in the name of ending it toward a world where violence is the exception, and safe, well-resourced and thriving communities are the rule.

i survived pdf: *Their Names Shall Live Forever More* Trevor Jardine, 2023-07-25 This book is a thorough and thought provoking account of the first year of existence of the 60th Australian Infantry Battalion. Interspersed with Divisional, Brigade and other Battalion's perspectives are the personal views of officers and other ranks relating to events and places. Included in the story is an investigation into a previously untold account of a group of soldiers called the "Needle Trench 10" who were killed by a single artillery shell on the 26th November 1916. For more than 100 years the identity of one of these soldiers, buried in the Guards' Cemetery at Lesboeufs, France, has been lost to time. A document, filed in the archives of the Commonwealth War Graves Commission in Maidenhead, England, for over 100 years and only coming to light in 2021, has finally enabled this soldier's possible identity to be established. Also revealed in the same document is the initial burial location of another soldier, wounded by the same artillery shell, and dying later that day whilst on his way to receive medical treatment. Woven throughout the book are the human stories of the battalion's soldiers, including biographies of those killed on the 26th November, with many of the details provided by the descendants of these soldiers. The investigation details how a simple "bookkeeping" entry resulted in families, and descendants of ten of the eleven soldiers who died on the 26th November, being provided incorrect details concerning their deaths. This error has been perpetuated in official documents, publications, online resources, and inscribed in stone since this time.

It delves into the role and impact of institutions and policy on the development of social enterprises, and explains how micro and macro factors might interact in influencing social entrepreneurship. Structured in two parts – policy and cases – it reveals the historical development of the Social enterprises sector in the Chinese context and then illustrates this using cases studies. i survived pdf: State of Disaster Maria Cristina Garcia, 2022-08-10 Natural disasters and the dire effects of climate change cause massive population displacements and lead to some of the most intractable political and humanitarian challenges seen today. Yet, as Maria Cristina Garcia observes in this critical history of U.S. policy on migration in the Global South, there is actually no such thing as a “climate refugee” under current U.S. law. Most initiatives intended to assist those who must migrate are flawed and ineffective from inception because they are derived from outmoded policies. In a world of climate change, U.S. refugee policy simply does not work. Garcia focuses on Central America and the Caribbean, where natural disasters have repeatedly worsened poverty, inequality, and domestic and international political tensions. She explains that the creation of better U.S. policy for those escaping disasters is severely limited by the 1980 Refugee Act, which continues to be applied almost exclusively for reasons of persecution directly related to politics, race, religion, and identity. Garcia contends that the United States must transform its outdated migration policies to address today's realities. Climate change and natural disasters are here to stay, and much of the human devastation left in their wake is essentially a policy choice.

i survived pdf: The Decommodification of Early Childhood Education and Care Michel Vandenberg, Joanne Lehrer, Linda Mitchell, 2022-12-30 The Decommodification of Early Childhood Education and Care: Resisting Neoliberalism explores how processes of marketisation and privatisation of ECEC have impacted understandings of children, childcare, parents, and the workforce, providing concrete examples of resistance to commodification from diverse contexts. Through processes of marketisation and privatisation, neoliberal discourses have turned ECEC into a commodity whereby economic principles of competition and choice have replaced the purpose of education. The Decommodification of Early Childhood Education and Care: Resisting Neoliberalism offers new and alternative understandings of policy and practice. Written with co-authors from diverse countries, case studies vividly portray resistance to children as human capital, to the consummentality of parents, and to the alienation of the early childhood workforce. Ending with messages of hope, the authors discuss the demise of neoliberalism and offer new ways forward. As an international book with global messages contributing to theory, policy, and practice regarding alternatives to a neoliberal and commodified vision of ECEC, this book offers inspiration for policy makers and practitioners to develop local resistance solutions. It will also be of interest to post-graduate students, researchers, educators, and pre-service educators with an interest in critical

pedagogy, ECEC policy, and ECEC practice.

This book addresses the theory and practice of sustainability assessment applications, drawing from experiences globally in a variety of sectors and presenting lessons learned. Diverse international case studies from professionals and academics demonstrate progress so far in exploring openings, testing approaches to application and establishing best practice. The book illustrates means of specifying generic sustainability criteria for the context of particular applications, reports on the resulting insights, and examines the barriers and opportunities for further advances. i survived pdf: Hunting Evil Guy Walters, 2010-05-04 Already acclaimed in England as first-rate (The Sunday Times); "a model of meticulous, courageous and path-breaking scholarship(Literary Review); and absorbing and thoroughly gripping... deserves a lasting place among histories of the war." (The Sunday Telegraph), *Hunting Evil* is the first complete and definitive account of how the Nazis escaped and were pursued and captured -- or managed to live long lives as fugitives. At the end of the Second World War, an estimated 30,000 Nazi war criminals fled from justice, including some of the highest ranking members of the Nazi Party. Many of them have names that resonate deeply in twentieth-century history -- Eichmann, Mengele, Martin Bormann, and Klaus Barbie -- not just for the monstrosity of their crimes, but also because of the shadowy nature of their post-war existence, holed up in the depths of Latin America, always one step ahead of their pursuers. Aided and abetted by prominent people throughout Europe, they hid in foreboding castles high in the Austrian alps, and were taken in by shady Argentine secret agents. The attempts to bring them to justice are no less dramatic, featuring vengeful Holocaust survivors, inept politicians, and daring plots to kidnap or assassinate the fugitives. In this exhaustively researched and compellingly written work of World War II history and investigative reporting, journalist and novelist Guy Walters gives a comprehensive account of one of the most shocking and important aspects of the war: how the most notorious Nazi war criminals escaped justice, how they were pursued, captured or able to remain

free until their natural deaths and how the Nazis were assisted while they were on the run by helpers ranging from a Vatican bishop to a British camel doctor, and even members of Western intelligence services. Based on all new interviews with Nazi hunters and former Nazis and intelligence agents, travels along the actual escape routes, and archival research in Germany, Britain, the United States, Austria, and Italy, *Hunting Evil* authoritatively debunks much of what has previously been understood about Nazis and Nazi hunters in the post war era, including myths about the alleged "Spider" and "Odessa" escape networks and the surprising truth about the world's most legendary Nazi hunter Simon Wiesenthal. From its haunting chronicle of the monstrous mass murders the Nazis perpetrated and the murky details of their postwar existence to the challenges of hunting them down, *Hunting Evil* is a monumental work of nonfiction written with the pacing and intrigue of a thriller.
