jeremy munday: Translation and Interpreting as Social Interaction Claire Y. Shih, Caiwen Wang, 2024-01-11 Adopting the tripartite theory of social psychology as its theoretical framework, this book advocates that the three components of social interaction – affect, behaviour, and cognition – underpin the daily activities of translators and interpreters. In particular, it argues that the affect or emotion of translators and interpreters should not be overlooked or treated as a separate entity, but as a crucial link between their mental process (cognition) and physical process (behaviour). This central theme of the intertwining nature of the affect, behaviour and cognition of translators and interpreters is examined theoretically, empirically, and methodologically with contributions from around the world, featuring literary translation, translator training, and interpreters' practice. It is a timely contribution to the field of Translation Process Research where affect is increasingly recognised as playing a key role in translation and interpreting phenomena.

jeremy munday: Critical Discourse Analysis in Translation Studies Kyung Hye Kim, 2025-06-25 Critical Discourse Analysis in Translation Studies is the first textbook to provide a systematic treatment of how CDA may be applied to the analysis of translated and interpreted texts. Hallidayan analytical framework to Norman Fairclough's dialectical relationship model and Teu van Dijk's ideological square, can be employed in translation studies to deliver rich analyses of translated text. She demonstrates the ability of CDA to address complex translation practices, in both traditional and digital media, using various examples in different languages. With numerous

exercises using authentic texts, this textbook empowers readers to apply a CDA framework in their own work. This accessible textbook is essential reading for all students of discourse and text analysis within translation and interpreting studies.

jeremy munday: *Translating Human Inner Life In and Between the Arts* Malgorzata Gamrat, 2025-05-15 The book examines how so-called human inner life – feelings, emotions, sentiments and self-reflection – permeates different forms of art. The methodological perspective is multidimensional covering translation studies and semiotics studies, including semiotics of passion, semiotics of culture, existential semiotics and biosemiotics, as well as different arts' fields – music, literature, film, visual arts, multimedia and video games. The book combines these approaches and tools for each field in order to create a new approach that permits an examination of the process of translation in various arts connected to human inner life. In this way, the reader can see the complexity of human inner life from an interdisciplinary perspective.

jeremy munday: *Positionalities of Translation Studies* Garda Elsherif, Joanna Sobesto, 2025-06-12 This volume explores historical, cultural, linguistic, and anthropocentric influences on Translation Studies (TS). It brings together nuanced, individual, self-reflexive case studies and juxtaposes them in order to provoke discussion on the role of contemporary researchers in the discipline of TS. As well as reflecting on the historical and geographical dimensions of the situatedness of TS, the book builds on existing reflections on the local, political and linguistic positions of TS and examines the practical and methodological consequences of these discussions. By considering insights and perspectives from various disciplines, the contributors refer to the current state of the art in TS and reconstruct the discussions held on Eurocentrism, anthropocentrism and the historicity of TS that have been discussed in isolation so far. This volume maps potential relations between them and introduces an analytical concept of positionality that highlights commonalities among various discourses. As well as theoretical and historical analysis, the contributors ask how to methodologically deal with this inevitable positioning of research in contemporary research practice. The contributions cover various aspects of positionalities and its influences on translation research, including gender, anthropocentrism, experiential knowledge and geopolitics. They also explore various histories of translation studies, in different temporal, spatial and linguistic settings, such as China/Chinese, Iran/Persian, the Netherlands/English, Ukraine/Ukrainian/Russian and France/French, thereby highlighting that TS as a discipline is not a monolith but consists of various histories interconnected with each other.

jeremy munday: *The Dancer and the Dance* Chan Sin-wai, 2014-10-17 The Dancer and the Dance is a collection of thirteen essays in translation studies. Unlike many similar collections that have appeared in the past decades, it is the product of theory integrated with practice; in it, the authors have steered clear of theorizing in a vacuum, making sure that their findings tally with what actually happens in translation; there is no attempt at putting forward hypotheses based on mere speculation. As translation theorists and/or translators whose specialties cover translation studies, linguistics, cultural studies, computer-aided translation, Chinese literature, English literature, comparative literature, and creative writing, the thirteen authors have taken up the challenge of unravelling the mystery of what, in I. A. Richards's words, "may very probably be the most complex type of event yet produced in the evolution of the cosmos." Impossible as the task may have seemed, they have all succeeded, each in his/her own way, in tracing out many warp and weft threads, as well as hitherto undiscovered patterns in the vast, gorgeous, and mysterious tapestry woven by God after Babel.

jeremy munday: *Romantic Representations of British India* Michael J Franklin, 2006-09-27 Students and academics involved with literary studies and history will find this exploration of the British cultural understanding of India extremely useful. The essays within this collection cover a wide range of topics and are written by an impressive troupe of contributors including P.J. Marshall, Anne Mellor and Nigel Leask.

jeremy munday: *Science Fiction in Translation* Ian Campbell, 2022-01-01 Science Fiction in

Translation: Perspectives on the Global Theory and Practice of Translation focuses on the process of translation and its implications. The volume explores the translation of works of science fiction (SF) from one language to another and the translation of SF tropes, terms, and ideas of SF theory into cultures outside the West. Providing a comprehensive examination of the state of translation into English, the essays consider how representative the body of translated work of SF is from the source language/culture. It also considers the social, political, and economic choices in selecting a work to translate. The book illustrates the dramatic growth both in SF production outside the Anglosphere, the translation of works from other languages into English, and the practice of translating English-language SF into other languages. Altogether, the essays map the theory, practice, and business of SF translation around the world.

jeremy munday: Socio Linguistics Beau Patterson & Ryan West, 2018-09-21 Sociolinguistics is the descriptive study of the effect of any and all aspects of society, including cultural norms, expectations, and context, on the way language is used, and society's effect on language. It differs from sociology of language, which focuses on the effect of language on society. Sociolinguistics overlaps considerably with pragmatics. It is historically closely related to linguistic anthropology, and the distinction between the two fields has been questioned. This book deals with the social life of language. The field ranges from micro-analyses to broadly-based policy and planning undertakings. As such, this book draws from sociolinguistics, the sociology of language, and psycholinguistics. The relationship between language and identity - whether of an individual or a group - is a strong thread linking all the topics covered in the book. For researchers and advanced students, it gives access to the field's most pressing issues and debates, as well as providing a platform for new initiatives in sociolinguistic research.

jeremy munday: Interpreting at the First Frankfurt Auschwitz Trial Peter Davies, 2025-06-12 This book explores the work of interpreters and translators at the First Frankfurt Auschwitz Trial of 22 former SS Auschwitz personnel in the mid-1960s, when the voices of dozens of witnesses, speaking 10 different languages, had a profound impact on public understanding of the Holocaust in Germany and beyond. The book asks vital questions about how victims of genocide can make their voices heard in legal systems, and the processes by which the testimony of Holocaust survivors has entered the public record. The author discusses interpreters' professional practice and ethical self-understanding in the unequal linguistic and institutional structures of the courtroom, and shows how translation and interpreting affected the way victims' voices were heard. The survivors came from many different national, linguistic and cultural backgrounds, and their testimonies are often multilingual or hybrid, providing illuminating insights into the significance of the language(s) in which testimony is given, but presenting interpreters with linguistic and ethical challenges. The preserved audio recordings of courtroom testimony show that interpreters and translators played a key role not only in attaining justice but also in helping to shape the ways in which victim testimony was given, heard, understood and valued within and beyond the courtroom. The author considers how trust is established, developed, challenged and lost, and how this affects the ability of Auschwitz survivors to give testimony in a complex and emotionally demanding situation. In doing so, he also explores the contribution of interpreting and translation to the developing memory of the Holocaust in the 1960s and to the public image of the survivor-witness.

jeremy munday: Translation and Translation Studies in the Japanese Context Nana Sato-Rossberg, 2012-08-09 Japan is often regarded as a 'culture of translation'. Oral and written translation has played a vital role in Japan over the centuries and led to a formidable body of thinking and research. This is rooted in a context about which little information has been available outside of Japan in the past. The chapters examine the current state of translation studies as an academic discipline in Japan and a range of historical aspects (for example, translation of Chinese vernacular novels in early modern times, the role of translation in Japan's modernization, changes in stylistic norms in Meiji-period translations, 'thick translation' of indigenous Ainu place names), as well as creative aspects of translation in modern and postwar Japan. Other chapters explore

contemporary phenomena such as the intralingual translation of Japanese expressions embedded in English texts emanating from diasporic contexts, the practice of pre-translation or writing for an international audience from the outset, the innovative practice of reverse localization of Japanese video games back into Japanese, and community interpreting practices and research.

jeremy munday: Cognitive Explorations of Translation Sharon O'Brien, 2011-04-21 >

jeremy munday: Sociologies of Poetry Translation Jacob Blakesley, 2018-11-29 While the sociology of literary translation is well-established, and even flourishing, the same cannot be said for the sociology of poetry translation. Sociologies of Poetry Translation features scholars who address poetry translation from sociological perspectives in order to catalyze new methods of investigating poetry translation. This book makes the case for a move from the singular 'sociology of poetry translation' to the pluralist 'sociologies', in order to account for the rich variety of approaches that are currently emerging to deal with poetry translation. It also aims to bridge the gap between the 'cultural turn' and the 'sociological turn' in Translation Studies, with the range of contributions showcasing the rich diversity of approaches to analysing poetry translation from socio-cultural, socio-historical, socio-political and micro-social perspectives. Contributors draw on theorists including Pierre Bourdieu and Niklas Luhmann and assess poetry translation from and/or into Catalan, Czech, English, French, German, Italian, Russian, Slovakian, Spanish, Swahili and Swedish. A wide range of topics are featured in the book including: trends in poetry translation in the modern global book market; the commissioning and publishing of poetry translations in the United States of America; modern English-language translations of Dante; women poet-translators in mid-19th century Ireland; translations of Russian poetry anthologies into modern English; the translation of Shakespeare's plays and sonnets in post-colonial Tanzania and socialist Czechoslovakia; translations and translators of Italian poetry into 20th and 21st century Sweden; modern European poet-translators; and collaborative writing between prominent English and Spanish poet-translators.

jeremy munday: Women and Early Modern Cultures of Translation Hilary Brown, 2022 Women and Early Modern Cultures of Translation: Beyond the Female Tradition is a major new intervention in research on early modern translation and will be an essential point of reference for anyone interested in the history of women translators. Research on women translators has often focused on early modern England; the example of early modern England has been taken as the norm for the rest of the continent and has shaped research on gender and translation more generally. This book brings a new European perspective to the field by introducing the case of Germany. It draws attention to forty women who can be identified as translators in sixteenth- and seventeenth-century Germany and shows how their work does not fit easily into traditional narratives about marginalization and subversiveness. The study uses the example of Germany to argue against reading the work of translating women primarily through the lens of gender and to challenge claims about the existence of a female translation tradition which transcends the boundaries of time and place. Broadening our perspective to include Germany provides a more nuanced and informed account of the position of women within European translation cultures and forces us to rethink gender as a category of analysis in translation history. The book makes the case for a new 'woman-interrogated' approach to translation history (to borrow a concept from Carol Maier) and as such it will provide a blueprint for future work in the area.--Provided by publisher.
