monkeys paw text: Animalia Antoinette Burton, Renisa Mawani, 2020-10-09 From yaks and vultures to whales and platypuses, animals have played central roles in the history of British imperial control. The contributors to *Animalia* analyze twenty-six animals—domestic, feral, predatory, and mythical—whose relationship to imperial authorities and settler colonists reveals how the presumed racial supremacy of Europeans underwrote the history of Western imperialism. Victorian imperial authorities, adventurers, and colonists used animals as companions, military transportation, agricultural laborers, food sources, and status symbols. They also overhunted and destroyed ecosystems, laying the groundwork for what has come to be known as climate change. At the same time, animals such as lions, tigers, and mosquitoes interfered in the empire's racial, gendered, and political aspirations by challenging the imperial project's sense of inevitability. Unconventional and innovative in form and approach, *Animalia* invites new ways to consider the consequences of imperial power by demonstrating how the politics of empire—in its racial, gendered, and sexualized forms—played out in multispecies relations across jurisdictions under British imperial control. monkeys paw text: Zambian Text Morris Smith, 2005 During its long history, Ngambe Hospital Mission on the Zambezi River has hosted missionaries of all kinds--dedicated French nuns in long habits, hard-working English doctors, efficient German nurses. A few were not so diligent. In the 1920s, a Swiss physician spent one day at the mission, declared the heat unbearable, and left. Yet ten years later, an Italian doctor, a woman, arrived and stayed eighteen years, mostly subsisting on fish from the river and corn-bread mush called nshima, the same diet as the villagers, members of the Lozi tribe. Skip to the mid-nineties, the time of these stories. The Ngambe villagers are now Zambians, and still of the Lozi tribe. The missionaries--mostly British or American--tend to come and go, rather than staying until their tombstones are erected in the mission cemetery as did their predecessors. Despite these changes, they, like their earlier counterparts, have come with an earnest desire to do good works. And they, probably like the French nuns and German nurses, find that getting along with each other is often harder than giving vaccinations or leading a prayer. Besides doing their jobs, the missionaries have a chance to pick up some Lozi words, to learn the traditions, and ride in a dugout on the Zambezi, the river Dr. Livingstone once navigated. They

might visit a game park, home to thousands of elephants and other wild things. They might travel to Lusaka, Zambia's capital, see how the government works, but even if a missionary fails to absorb the culture, another possibility exists--in this remote setting he may learn something new and startling about himself.

monkeys paw text: *The Monkey's Paw* William Wymark Jacobs, 2013-08-25 The Monkey's Paw is a horror short story by author W. W. Jacobs. It was published in England in 1902. The story is based on the famous setup in which three wishes are granted. In the story, the paw of a dead monkey is a talisman that grants its possessor three wishes, but the wishes come with an enormous price for interfering with fate. The story involves Mr. and Mrs. White and their adult son, Herbert. Sergeant-Major Morris, a friend of the Whites who has been part of the British Armed Forces in India, leaves them with the monkey's paw, telling of its mysterious powers to grant three wishes and of its journey from an old fakir to his comrade, who used his third wish to wish for death. Sergeant-Major Morris throws the monkey's paw into the fire and White quickly retrieves it. Morris warns White, but White, thinking about what he could use the paw for, ignores him. Mr. White wishes for 200 to be used as the final payment on his house. Following that, Herbert is killed by

machinery at his company, but the couple gets compensation of 200. Ten days after the funeral, Mrs. White, almost mad with grief, asks her husband to wish Herbert back to life with the paw. Reluctantly, he does so. After a delay, there is a knock at the door. Mrs. White fumbles at the locks in an attempt to open the door. Mr. White knows, however, that he cannot allow their son in, as his appearance will be too grotesque. Mr. White was required to identify the body, which had been mutilated by the accident and then buried for more than a week. While Mrs. White tries to open the door, Mr. White makes his third wish, and the knocking stops. Mrs. White opens the door to find no one there. The theme of the story is contained in this description of the paw: 'It had a spell put on it by an old fakir, ' said the sergeant-major, 'a very holy man. He wanted to show that fate ruled people's lives, and that those who interfered with it did it to their sorrow.' A great number of novels, stories, movies, plays and comics are variations or adaptations of the story, featuring similar plots built around wishes that go awry in macabre ways, occasionally with references to monkey's paws or to the story itself. The story is frequently parodied on television shows and comic books, including a Simpson's tree house of horrors episode.
