short case study on ethics with solutions pdf: Contemporary Famine Analysis Olivier Rubin, 2015-12-11 This Brief provides some answers as to why famines continue to torment humankind here in the 21st century despite all our progress in food production, logistics, information dissemination and relief work. Contemporary famines are inherently political, and so the interesting question is not how famines can be prevented, but why they are allowed to develop in the first place; only by understanding the latter, is there hope to eradicate major famines. The Brief assesses the various analytical approaches to the understanding of famine, from the classical approaches inspired by Thomas Malthus to the newer economic approaches based on Amartya Sen. While all approaches contribute with important insights on famine dynamics, they also struggle to capture the political dimension of contemporary famines. The Brief develops a political approach capable of addressing this important but messy political dimension of contemporary famines. The approach builds on principles of humanitarian accountability (the moral responsibility to alleviate suffering from famine) as well as political accountability (the interests and power relations involved in famine outcomes).

short case study on ethics with solutions pdf: The Enterprising Barrister Atalanta Goulondris, 2020-06-11 What is it like working as a barrister in the 21st century? The independent Bar has transformed in the last 30 years into a commercialised, enterprising profession. Based on interviews with and observation of barristers and chambers' staff, this book identifies key changes that have taken place at the Bar and how these are reshaping and reformulating barristers' professionalism and working culture. This is the first empirical overview of the depth, scope and effects of multiple reforms that have been imposed on the profession. It explores how this once unified profession has fragmented, as the lived experiences of barristers in different practice areas have diverged. Highly specialised sets of chambers now operate like businesses, whilst others, who are dependent on legal aid funding, struggle to survive. This book offers a unique examination of different sites of change: how the chambers model has evolved, how entrepreneurial barristers market themselves, how aspirant law students prepare to enter the profession and how regulatory and procedural reforms have imposed managerial constraints on practitioners. The conclusion considers what the far-reaching changes mean for the prospects of the Bar in England and Wales.
