preschool graduation speech from teacher: Multilingual Acquisition and Learning Elena Babatsouli, 2024-06-15 The volume espouses an ecosystemic standpoint on multilingual acquisition and learning, viewing language development and use as both ontogenesis and phylogenesis. Multilingualism is inclusively used to refer to sociolinguistic diversity and pluralism. Whether speech, writing, gesture, or body movement, language is a conduit that carries meaning within a complex, fluid, and context-dependent framework that engages different aspects of the individual, the communicative interaction, communicative acts, and social parameters. Continually modified over the years to better represent its multidisciplinary scope, the sociobiological notion of language has found steady and productive ground within major theoretical frameworks, which, individually or holistically, contribute to a rounded understanding of language acquisition, learning, and use by exploring both system-internal and system-external factors and their interaction. Summoning the

work of leading academics, the volume outlines the changing dynamics of multilingualism in children and adults internationally with the latest advances and under-represented coverage that highlight the ecosystemic nature of multilingual acquisition, learning, and use.

preschool graduation speech from teacher: **The Immigration & Education Nexus** David A. Urias, 2012-03-26 The focus of this edited volume is on immigration's effect on schooling and the consequential aspect of illegal immigration's effect. To understand immigration (legal and undocumented) and K-16 education in Asia, Europe, and the US is to situate both within the broader context of globalization. This volume presents a timely and poignant analysis of the historical, legal, and demographic issues related to immigration with implications for education and its interdisciplinary processes. Arguments based on theories of globalization, socialization, naturalization, and xenophobia are provided as a conceptual foundation to assess such issues as access to and use of public services, e.g., public education, health, etc. Additional discussions center around the social, political, and economic forces that shape the social/cultural identities of this population as it tries to integrate into the larger society. The long-term causes and consequences of global immigration dynamics, and the multiple paths taken by immigrants, especially children, wishing to study are addressed. Summary discussion concludes the volume as well as projections with respect to links between immigration and key national security and international policy issues. Education can and must play an important role in a world that is more global and at the same time more local than it was almost twenty years ago. This volume intends to serve as an ambitious guide

to approaching the issues of immigration and education more globally.
