heart of a cosmopolitan city is an exotic world—a place where diamonds, astronomically priced, are bought and sold on the strength of a handshake, and business disputes are resolved according to ancient Jewish principles of arbitration. Yet it is also a modern industry facing the same fundamental global changes affecting all businesses today. In *Diamond Stories*, Renée Rose Shield leads us into the unexamined realm of wholesale diamond traders in New York. Related to several well-respected traders, she had unprecedented access to a society normally closed to outside inquiry. Here she deftly blends her personal relationship and her anthropological training to provide an insightful exploration of this tradition-bound industry, the new challenges it faces, and the ways both industry and individuals adapt to and endure change. Shield begins with a fascinating history of diamond mining, combining the story of the De Beers cartel, the role of Jews in the trade, and the part diamonds have played both in war and liberation. Throughout, she incorporates commentary by current diamond traders. Succeeding chapters explore the evolving nature of both the global trade and the New York diamond district. Shield takes a close look at the increasingly complex ethnic makeup of the district, illuminates the rarely documented work done by women, chronicles the resilient system of arbitration, and reveals the ways in which many traders work well into their eighties and nineties. Their long lives of work, cushioned by the trade's social environment, offer hints for successful aging in general.

rapaport report: *Italy's Jews from Emancipation to Fascism* Shira Klein, 2018-01-18 How did Italy treat Jews during World War II? Historians have shown beyond doubt that many Italians were complicit in the Holocaust, yet Italy is still known as the Axis state that helped Jews. Shira Klein uncovers how Italian Jews, though victims of Italian persecution, promoted the view that Fascist Italy was categorically good to them. She shows how the Jews' experience in the decades before World War II - during which they became fervent Italian patriots while maintaining their distinctive Jewish culture - led them later to bolster the myth of Italy's wartime innocence in the Fascist racial campaign. Italy's Jews experienced a century of dramatic changes, from emancipation in 1848, to the 1938 Racial Laws, wartime refuge in America and Palestine, and the rehabilitation of Holocaust survivors. This cultural and social history draws on a wealth of unexplored sources, including original interviews and unpublished memoirs.

rapaport report: Pathophysiology, Evaluation and Management of Valvular Heart Diseases J. S. Borer, O. W. Isom, 2002-07 Diseased heart valves are a growing public health concern, ranging among the most important causes of heart failure and sudden death. This volume reviews the most current information on valvular disease pathophysiology, epidemiology and evaluation as well as management strategies for affected patients. Topics discussed include data supporting selection of asymptomatic patients for valve surgery, methods employed in evaluating patients for this purpose, surgical methods and valve prostheses currently applied for valve repair and replacement, and criteria for selecting among them. Adjunctive problems such as aortic root disease, infective endocarditis and arrhythmias that may modify patient management are also considered. Epidemiologic data illustrate the increasing prevalence of valvular disease in the population. In addition, the book reviews new and emerging knowledge about the molecular and cellular basis of myocardial dysfunction and heart failure in various forms of valvular disease, and new information about the potential roles of alternative medicine, blood conservation and minimally invasive surgical techniques. A particular highlight is a 'debate' between paired chapters on the appropriateness of mitral valve surgery for patients with less than severe mitral regurgitation of ischemic etiology. Compiling the most up-to-date and authoritative information in the field, this book will be of great value not only to cardiologists and cardiac surgeons, but also to medical students, medical and surgical residents, cardiology and cardiac surgery fellows and general internists.

rapaport report: From Blood Diamonds to the Kimberley Process Franziska Bieri, 2016-04-15 In the late 1990s, several non-governmental organizations (NGOs) focused world attention on the issue of conflict diamonds which funded wars, massive death, and refugee crises across Central and West Africa. Several governments, NGOs, and key industry players engaged in negotiations under the so-called Kimberley Process (KP). A voluntary global agreement came into effect leading to a substantial decline in illicit diamond trade. Despite its importance in international affairs, the KP remains understudied in academia. Franziska Bieri's book provides the first comprehensive account of the KP and is the first to reveal how NGOs have become critical actors in their own right, possessing the ability to directly influence policies and to participate in the decision making and the implementation of global agreements. In developing this argument, Bieri explains: why the NGO campaign to raise awareness was successful; why a rapid and comprehensive resolution on such a complex global problem was possible; how the tripartite negotiations between states, NGOs, and industry developed during the implementation of the agreement, which is an on-going process. Based on extensive personal interviews with prominent campaigners, leading bureaucrats, and industry officials, hundreds of KP publications, official UN documents, industry news, and NGO reports, this timely book allows for a much needed engagement in contemporary debates about the campaign against conflict diamonds, the Kimberley Process, and the themes defining today's global governance arena.
