sikata sengupta: *The Judicialization of Politics in Pakistan* Waris Husain, 2018-03-28 Since 2007, the Supreme Court of Pakistan has emerged as a dominant force in Pakistani politics through its hyper-active use of judicial review, or the power to overrule Parliament's laws and the Prime Minister's acts. This hyper-activism was on display during the Supreme Court's unilateral disqualification of Prime Minister Yousef Raza Gilani in 2012 under the leadership of Chief Justice Iftikhar Chaudhry. Despite the Supreme Court's practical adoption of restraint subsequent to the retirement of Chief Justice Chaudhry in 2013, the Court has once again disqualified a prime minister, Nawaz Sharif, due to allegations of corruption in 2017. While many critics have focused on the substance of the Court's decisions in these cases, sufficient focus is not paid to the amorphous case-selection process of the Supreme Court of Pakistan. In order to compare the relatively unregulated process of case-selection in Pakistan to the more structured processes utilized by the Supreme Courts of the United States' and India, this book aims to understand the historical roots of judicial review in each country dating back to the colonial era extending through the foundational period of each nation impacting present-day jurisprudence. As a first in its kind, this study comparatively examines these periods of history in order to contextualize a practical prescription to standardize the case-selection process in the Supreme Court of Pakistan in a way that retains the Court's overall power while limiting its involvement in purely political issues. This publication offers a critical and comparative view of the Supreme Court of Pakistan's recent involvement in political disputes due to the lack of a discerning case-selection system that has otherwise been adopted by the Supreme Courts of India and the United States' to varying degrees. It will be of interest to academics in the fields of Asian Law, South Asian Politics and Law and Comparative Law.

sikata sengupta: *The Rule of Law in Developing Countries* Chowdhury Ishrak Ahmed Siddiky, 2018-02-12 Bangladesh, one of the most densely populated countries in the world and second in South Asia, is known for its natural disasters, floods and political violence. However, the country plans to become a middle-income country by 2020 due to rapid economic growth led by strong and vibrant garments and pharmaceutical sectors. A developing country, Bangladesh cannot reach its true potential if there is a weak legal system and the executive have no regard for the rule of law. This book discusses and analyses the legal system of Bangladesh. It studies the various weaknesses and whether the judiciary of the country is really independent. International experts, scholars and lawyers with significant experience of working in Bangladesh and at international agencies and universities examine the role of the judiciary in maintaining the rule of law in the country and the critical role it can play in strengthening democracy. The chapters show the various roles played by the judiciary in promoting its independence and thereby strengthening democracy in the country. The first book to analyse the role of the judiciary and the various weaknesses in the legal system of Bangladesh, it is a relevant case study in the context of developing countries. The problems found in the legal system of Bangladesh prevail in most of the developing countries in Asia, Africa and Latin America. The book will be of interest to academics in the field of development studies, South Asian Studies and Asian Law.

sikata sengupta: *Documentary Film in India* Giulia Battaglia, 2017-11-22 This book maps a hundred years of documentary film practices in India. It demonstrates that in order to study the development of a film practice, it is necessary to go beyond the classic analysis of films and filmmakers and focus on the discourses created around and about the practice in question. The book navigates different historical moments of the growth of documentary filmmaking in India from the colonial period to the present day. In the process, it touches upon questions concerning practices and discourses about colonial films, postcolonial institutions, independent films, filmmakers and filmmaking, the influence of feminism and the articulation of concepts of performance and performativity in various films practices. It also reflects on the centrality of technological change in different historical moments and that of film festivals and film screenings across time and space.

Grounded in anthropological fieldwork and archival research and adopting Foucault's concept of 'effective history', this work searches for points of origin that creates ruptures and deviations taking distance from conventional ways of writing film histories. Rather than presenting a univocal set of arguments and conclusions about changes or new developments of film techniques, the originality of the book is in offering an open structure (or an open archive) to enable the reader to engage with mechanisms of creation, engagement and participation in film and art practices at large. In adopting this form, the book conceptualises 'Anthropology' as also an art practice, interested, through its theoretico-methodological approach, in creating an open archive of engagement rather than a representation of a distant 'other'. Similarly, documentary filmmaking in India is seen as primarily a process of creation based on engagement and participation rather than a practice interested in representing an objective reality. Proposing an innovative way of perceiving the growth of the documentary film genre in the subcontinent, this book will be of interest to film historians and specialists in Indian cinema(s) as well as academics in the field of anthropology of art, media and visual practices and Asian media studies.

sikata sengupta: *New Perspectives on India and Turkey* Smita Jassal, Halil Turan, 2018-04-09 India and Turkey, Asia Minor and the Subcontinent of Hindustan, and the Ottomans and Mughals have had shared histories of contact, engagement, and dialogue over the centuries. Much of northern India was under the control of rulers from Central Asia since at least the thirteenth century. Startling glimpses of the presence of Turkic-speaking peoples from Central Asia are still visible, for example, in north Indian material cultures - languages, cuisine, religion, architecture, and medicine. This book places the Indian subcontinent side by side with the Turkic-speaking world, both past and present, in order to understand one geographical context in relation to the other. The juxtaposition of the two countries throws up some startling commonalities as well as considerable differences, and it is the variations as well as the similarities that allow for comparability. By exploring historical connections and providing a comparative perspective in terms of spirituality and religion, social movements, political economy, and foreign policy, the book initiates productive cross-cultural conversations, allowing concerns from one location to illuminate the other. The book is split into five parts: History and Memory, Nationhood and Leadership, Secularism, Debating Development, and claiming the City. The first comparison of the Subcontinent and present-day Turkey, the book emphasizes the importance of cross-regional comparative analysis in order to overcome some of the pitfalls of area-focused analysis. Filling a gap in the existing literature, it will be of interest to scholars in various disciplines, including politics, religion, history, urbanization, and development in the Middle East and Asia.

The contents focus on latest research and current problems in various branches of mechanical engineering. Some of the topics discussed include fracture and failure analysis, fuels and alternative fuels, combustion and IC engines, advanced manufacturing technologies, powder metallurgy and rapid prototyping, industrial engineering and automation, vibrations and control engineering, automobile engineering, fluid mechanics and machines, heat transfer, composite materials, micro and nano-engineering for energy storage and conversion, and modeling and simulations. The book is useful for researchers and professionals in mechanical engineering.

sikata sengupta: *Cultural Entrenchment of Hindutva* Daniela Berti, Nicolas Jaoul, Pralay Kanungo, 2020-11-29 The book reflects on the discreet influence of Hindutva in situations/places

outside or at the margins of its organisational and mobilisational arena, where people denying any commitment to the Sangh Parivar, incidentally, show affinities and parallelisms with its discourse and practice. This study looks at Hindutva's entrenchment not so much as an orchestration from above but more as an outcome of a process that evolves in relation to specific social and cultural milieus. The contributors analyse Hindutva's entrenchment, emphasising on the ethnography of the forms of mediation and/or convergence produced in certain contexts. The 11 case studies highlight three different dynamics of Hindutva's cultural entrenchment. The first section gathers cases where RSS-affiliated organisations have set up specific cultural or artistic programmes at the regional level, involving the meditation of local people whose interest in these programmes does not necessarily mean that they endorse the Hindutva agenda completely. The next deals with convergence and refers to cases where the followers gather around a charismatic personality, whose precepts and practice may bring them towards a closer affinity with the Hindutva programme. The last section deals with the contexts of resistance, where social milieus engaged in opposing Hindutva may, in fact, paradoxically, and even inadvertently, imbibe some of its ideas and practices in order to contest its claims.

sikata sengupta: Sardar Patel Harish K. Thakur, 2025-06-27 The political landscape of India has undergone significant transformation in the twenty-first century. With the rise of the Bharatiya Janata Party as a strong nationalist force, historical figures such as Sardar Patel, Vinayak Damodar Savarkar, and Deendayal Upadhyaya have been projected as key heroes of the freedom struggle alongside others. This has led to a redefinition and reprioritization of the leadership profile of the Indian independence movement. This book tries to understand Sardar Patel not from the traditional approach of viewing him just as an integrator of princely states or Iron Man but investigate the different dimensions of Patel's thinking towards India. It discusses his ideas on secularism and minorities, status of women, ideas on cleanliness and environment, scheduled castes, Indian administration, farmers and agricultural rights and land reforms, India's foreign policy and relations with its neighbours especially China and the greater world powers. First of its kind, this book will be of interest to scholars and researchers of Indian politics, Indian history, Nationalist movement, political sociology, and South Asian history.

sikata sengupta: Pedagogy for Religion Parna Sengupta, 2011-08-13 Offering a new approach to the study of religion and empire, this innovative book challenges a widespread myth of modernity—that Western rule has had a secularizing effect on the non-West—by looking closely at missionary schools in Bengal. Parna Sengupta examines the period from 1850 to the 1930s and finds that modern education effectively reinforced the place of religion in colonial India. Debates over the mundane aspects of schooling, rather than debates between religious leaders, transformed the everyday definitions of what it meant to be a Christian, Hindu, or Muslim. Speaking to our own time, Sengupta concludes that today's Qur'an schools are not, as has been argued, throwbacks to a premodern era. She argues instead that Qur'an schools share a pedagogical frame with today's Christian and Muslim schools, a connection that plays out the long history of this colonial encounter.

sikata sengupta: Contemporary Gender Formations in India Nandini Dhar, 2024-02-27 The volume discusses critical issues surrounding the developments in gender movements in the last two decades in India following the Delhi rape case and the ensuing massive protests in December 2012. A critical documentation of some of the key moments surrounding the contemporary gendered formations and radicalisms in South Asia, the chapters span questions of class, caste, sexuality, digital feminisms, and conflict zones. The book looks at anger, protest, and imaginations of resistance. It showcases the 'new' visibility that digital spaces have opened up to lend voice to survivors who are let down by traditional justice mechanisms and raises questions regarding 'individualized' modes of seeking justice as against traditional 'collective' voices that have always been a hallmark of movements. The volume analyses and criticizes the complicity of the state and the court as agents of reinforcing gender violence – an issue that has not been theorized enough by activists and scholars of violence. Further, it also delves into the #MeToo movement and the LoSHA, as both have raised contentious, controversial, and often conflicting debates on the nature of

addressing sexual harassment, particularly at the workplace. Calling for further debate and discussions of cyberspace, gender justice, sexual violence, male entitlement, and forms of neoliberal feminism, this volume will be of immense interest to scholars and researchers in the areas of women and gender studies, sociology and social theory, gender politics, political theory, democracy, protest movements, politics, media and the internet, political advocacy, and law and legal theory. It will also be a compelling read for anyone interested in gender justice and equal rights.

sikata sengupta: The YMCA in Late Colonial India Harald Fischer-Tiné, 2022-11-03 This book explores the history and agendas of the Young Men's Christian Association (YMCA) through its activities in South Asia. Focusing on interactions between American 'Y' workers and the local population, representatives of the British colonial state, and a host of international actors, it assesses their impact on the making of modern India. In turn, it shows how the knowledge and experience acquired by the Y in South Asia had a significant impact on US foreign policy, diplomacy and development programs in the region from the mid-1940s. Exploring the 'secular' projects launched by the YMCA such as new forms of sport, philanthropic efforts and educational endeavours, *The YMCA in Late Colonial India* addresses broader issues about the persistent role of religion in global modernization processes, the accumulation of American soft power in Asia, and the entanglement of American imperialism with other colonial empires. It provides an unusually rich case study to explore how 'global civil society' emerged in the late 19th and early 20th centuries, how it related to the prevailing imperial world order, and how cultural specificities affected the ways in which it unfolded. Offering fresh perspectives on the historical trajectories of America's 'moral empire', Christian internationalism and the history of international organizations more broadly, this book also gives an insight into the history of South Asia during an age of colonial reformism and decolonization. It shows how international actors contributed to the shaping of South Asia's modernity at this crucial point, and left a lasting legacy in the region.

sikata sengupta: **Women and The Hindu Right** Urvashi Butalia, Tanika Sarkar, 1995-06-30 This work attempts to break new ground by posing questions about women's activism within the Hindu right, a crucial issue that has barely been addressed. These essays look at gender within the framework of larger questions: the organizational history of the formation – still developing – we call the Hindu Right; its relationship to change in religious processes, economic developments, caste politics and constitutional crisis over the last few decades. The essays also pose difficult questions for the theory and practice of feminist politics which has tended to identify women's political activism with emancipatory politics. Right-wing movements, it has been assumed, have – because of their emphasis on "tradition" – an inverse relationship to women's politicization. Yet violently communal politics have pulled women into militant politics. What do these and other questions and paradoxes mean for the theory and practice of "feminist" politics, and how do right-wing strategies and tactics compare with those developed by radical women's groups?

sikata sengupta: **Bollywood's New Woman** Megha Anwer, Anupama Arora, 2021-06-18 *Bollywood's New Woman* examines Bollywood's construction and presentation of the Indian Woman since the 1990s. The groundbreaking collection illuminates the contexts and contours of this contemporary figure that has been identified in sociological and historical discourses as the "New Woman." On the one hand, this figure is a variant of the fin de siècle phenomenon of the "New Woman" in the United Kingdom and the United States. In the Indian context, the New Woman is a distinct articulation resulting from the nation's tryst with neoliberal reform, consolidation of the middle class, and the ascendancy of aggressive Hindu Right politics.

sikata sengupta: Estimating HANK for Central Banks Sushant Acharya, William Chen, Marco Del Negro, Keshav Dogra, Aidan Gleich, Shlok Goyal, Ethan Matlin, Donggyu Lee, Reca Sarfati, Sikata Sengupta, 2023 We provide a toolkit for efficient online estimation of heterogeneous agent (HA) New Keynesian (NK) models based on Sequential Monte Carlo methods. We use this toolkit to compare the out-of-sample forecasting accuracy of a prominent HANK model, Bayer et al. (2022), to that of the representative agent (RA) NK model of Smets and Wouters (2007, SW). We find that HANK's accuracy for real activity variables is notably inferior to that of SW. The results for consumption in particular are disappointing since the main difference between RANK and HANK is the replacement of the RA Euler equation with the aggregation of individual households' consumption policy functions, which reflects inequality.
