**speech therapy activities pdf: *Communication Interventions with Deaf People*** , 2025-06-12 *Communication Interventions with Deaf People* concerns the application of spoken, signed, and written language interventions with deaf and hard of hearing children, young people, and adults. Historically, communication interventions with deaf people have prioritised spoken language and considered it to be the most 'appropriate' and 'normal' accomplishment. With over forty contributors, the research and professional experience of experts working with deaf people, across national borders, is presented. Individual chapters describe the ways that services are delivered and detail different aspects of communication interventions, presenting the current evidence base and indicating areas where further research is needed.

Like other countries, in Hong Kong, inclusive education has been promoted through Integrated Education (IE) and the Whole-School Approach (WSA). Recently, the government has introduced the induction of Special Educational Needs Coordinator (SENCO) in each Hong Kong school to help diverse students, especially students with special educational needs (SEN) and to develop inclusive teaching and learning practices. This book is one of the first to examine the influence of contextual and Chinese cultural factors in the field of inclusive education, in regard to how schools support students with diverse learning needs and SEN. It also offers an account of context-specific measures towards promoting inclusive education. This book will help scholars and school practitioners in Asia in particular and in the West, in general, develop a comprehensive understanding of context-specific inclusive practices in education for students with diverse learning needs.
