supernatural chicago 2023: Whispers from the Coven Chris Allaun, 2024-10-08 Follow in the footsteps of a coven of witches in the 1940s as they dive deep into magical practice. Using the same storybook-style of teaching magic that Chris Allaun introduced in his previous book, *The Black Book of Johnathan Knotbristle*, the reader will find an incredibly hands-on system of witchery designed to heighten their magical prowess and refine their skills in the Art. Each chapter is set up as a journal entry from a different member of the coven, and through each entry the reader is shown how to weave spells to bring protection, reveal the truth, or even reenter a dream. They'll also be shown how to conjure spirits, influence another's thoughts, and to capture the heart of one they love. It would be all too easy to see a coven such as this operating in the 1940s—meeting under the cloak of night, conversing with the spirit world, and conjuring a breadth of magic that could withstand the test of time. While the coven itself may dwell mostly in the mind and heart of the witch, Chris Allaun has creatively incorporated actual folklore from Chicago, his now hometown, which will go on to inspire all readers to build their own magical practice off their own living, breathing landscape, wherever that may be.

supernatural chicago 2023: Landscape, Religion, and the Supernatural Matthias Egeler, 2021-07-13 This book is the first study to tackle the relationship between landscape and religion in-depth. Author Matthias Egeler overviews previous theories of the relationship between landscape and religion and then pushes this theorizing further with a rich case study: the supernatural landscape of the Icelandic Westfjords. There, religion and the supernatural--from churches to elf hills--are ubiquitous in the landscape and, as Egeler shows, this example sheds entirely new light on core aspects of the relationship between landscape, religion, and the supernatural.

supernatural chicago 2023: Mozart Tim Carter, Distinguished Professor of Music Emeritus Tim Carter, 2025-09-10 Why do Mozart's musical works in major and minor keys sound so different from each other, and what creative insights might these differences reveal? In *Mozart: A Tale of Two Keys*, Tim Carter explores the composer's instrumentation, tuning, and temperament techniques, offering new insights into his symphonies and sonatas.

supernatural chicago 2023: **Critical Faith** Joni Schwartz-Chaney, 2024-04-23 Near hysteria has erupted in the media, state and federal legislatures, community boards, and churches around critical race theory (CRT). Despite the term's history, development, and clearly defined meaning, it has become a catch-all for white America's fears, deflections, and equivocations on race, society, and the law. Christians are no exception. Their critiques routinely claim that CRT is rewriting of American history, that it is anti-democratic, and even heretical. *Critical Faith* presents a counter argument to these claims and insists that CRT is a tool to grapple with the thorny issue of race in both society and the church. In a reasoned tone, *Critical Faith* defines the origins of CRT, explains what the theory is, and demonstrates its merits from teaching experiences of the author. Schwartz-Chaney argues that CRT is the victim of what Patricia Williams calls definitional theft, and that by recovering its original meaning, Christians can move past mischaracterizations and caricatures toward a more nuanced view of race, racism, and the tools available to make progress in the church and in society.

supernatural chicago 2023: *Spiritualism's Place* Averill Earls, Sarah Handley-Cousins, Marissa C. Rhodes, Elizabeth Garner Masarik, 2024-10-15 In *Spiritualism's Place*, four friends and scholars who produce the acclaimed *Dig: A History Podcast*, share their curiosity and enthusiasm for uncovering stories from the past as they explore the history of Lily Dale. Located in western New York State, the world's largest center for Spiritualism was founded in 1879. Lily Dale has been a home for Spiritualists attempting to make contact with the dead, as well as a gathering place for reformers, a refuge for seekers looking for alternatives to established paths of knowledge, and a target for skeptics. This intimate history of Lily Dale reveals the role that this fascinating place has played within the history of Spiritualism, as well as within the development of the women's suffrage and temperance movements, and the world of New Age religion. As an intentional community devoted to Spiritualist beliefs and practices, Lily Dale brings together multiple strands in the social and religious history of New York and the United States over the past 150 years: feminism, social reform, utopianism, new religious movements, and cultural appropriation. Podcasters and historians alike, Averill Earls, Sarah Handley-Cousins, Elizabeth Garner Masarik, and Marissa C. Rhodes each identify one site in Lily Dale and one theme that its history illuminates. They use those sites and themes to approach Lily Dale not as debunkers but as inquisitive researchers and storytellers. At the same time, they also reflect on their own relationships contending that it's never quite possible to separate grief, hope, faith, and friendship from understandings of the past. *Spiritualism's Place* breaks myths, unveils unexpected stories, and finds new ways to contemplate Spiritualism's role in American history.

supernatural chicago 2023: *Psychology of Gun Violence* Janet Shibley Hyde, 2025-07-15 What motivates people to buy guns? To carry them? To use them? In this urgent and necessary call for action, Janet Shibley Hyde combines incisive cultural analysis with cutting-edge psychological research to offer science-based strategies and practical solutions of reform for the problem of gun violence in America. Gun violence in the U.S. claims tens of thousands of lives each year. We need a solution more urgently than ever, yet progress is halted from both sides as they fail to understand one another—while some urge for a ban on guns, others are insistent on retaining their firearms. In *The Psychology of Gun Violence*, Dr. Janet Shibley Hyde shows that in order to bring the epidemic of gun violence under control, we must first understand the psychology of gun ownership, mass shootings, and gun culture in America. Drawing on her research as a developmental psychologist, Hyde investigates the motivations behind gun use and misuse to transform readers' understanding of American gun violence and ultimately provide solutions rooted in scientific research. Through psychological research, actionable strategies and real-world 'good news' stories that show progress is not only possible, but happening, *The Psychology of Gun Violence* will empower readers to take action to reduce gun violence and bolster public health both in their community and their country.

supernatural chicago 2023: *Demons in the USA* Michael E. Heyes, 2024-09-24 *Demons in the USA* argues that the discourse on the demonic that developed in the nineteenth century continues to exert a powerful hold over the American spiritual imagination. The book begins by tracing the conservative Christian encounter with Spiritualism in the nineteenth century and the mode of thinking about the demonic which developed. As Spiritualism's core principles reappeared in the New Age, Christian interlocutors once more drew on this anti-Spiritualist paradigm to condemn the movement. This condemnation is absorbed by and amplified through the film *The Exorcist*. The author considers how the success of the film disseminates the anti-Spiritualist paradigm in surprising ways, entangling it with entertainment, science, and politics such that it influences psychology, the Satanic Panic of the 1980s, and the contemporary QAnon movement. This entanglement points to the broader argument of the work: While we may wish to think of a film as entertainment (and thus, having no bearing on reality) or demonic material as religious (and thus exempt from categories like politics or science), the truth is that categories are not so easily separated. The author contends that the need to enforce the boundaries of such categories (and the failure to do so) is a hallmark of the intellectual construct of modernity, and that those who believe in demons in the contemporary United States are surprisingly modern in their views. The book

grounds the importance of media to the twentieth-and twenty-first- century religious experience, arguing that the United States of today would not be possible without *The Exorcist* and its products. Demons in the USA will be of particular interest to scholars dealing with religion in America, those with a focus on religion and film, or those involved with contemporary demonology.

supernatural chicago 2023: Meta Television Erin Giannini, 2024-03-18 The idea of metatextuality is frequently framed as a recent television development and often paired with the idea that it represents genre exhaustion. US television, however, with its early “live” performances and set-bound sitcoms, always suggested an element of self-awareness that easily shaded into metatextuality even in its earliest days. Meta Television thus traces the general history of US television’s metatextuality throughout television’s history, arguing that TV’s self-awareness is nothing new—and certainly not evidence of a period of aesthetic exhaustion—but instead is woven into both its past and present practice, elucidated through case studies featuring series from the 1970s to the present day—many of which have not been critically analyzed before—and the various ways they deploy metatext to both construct and deconstruct their narratives. Further, Meta Television asserts that this re- and de-construction of narrative and production isn’t just a reward to the savvy and/or knowledgeable viewer (or consumer), but seeks to make broader points about the media we consume—and how we consume it. This book explores the ways in which the current metatextual turn, in both the usual genres in which it appears (horror and sci-fi/fantasy) and its movement into drama and sitcom, represents the next turn in television’s inherent self-awareness. It traces this element throughout television’s history, growing from the more modest reflexivity of programs’ awareness of themselves, as created objects in a particular medium, to the more significant breaking of the fictive illusion and therefore the perceived distance between the audience and the series. Erin Giannini shows how the increased currency of metatextual television in the contemporary era can be tied to a viewership well-versed in its stories and production as well as able and willing to “talk back” via social media. If television reflects culture to a certain extent, this increased reflexivity mirrors that “responsive” audience as a consequence of the lack of distance that metafiction embraces. As Robert Stam traced the use—and implications—of reflexivity in film and literature, this book does the same for television, further problematizing John Ellis’s glance theory in terms of both production and spectatorship.

supernatural chicago 2023: Some New World Peter Harrison, 2024-04-18 This masterful contribution to intellectual history offers a better understanding of secular modernity by focusing on 'naturalism', 'supernaturalism', and 'belief'.

supernatural chicago 2023: A Jungian and Evolutionary Approach to Psychology and Culture Stefano Carta, 2025-05-21 This ground-breaking book re-positions C.G. Jung's legacy, and the field of analytical psychology, within the panorama of contemporary knowledge in neurobiology, psychology, culture and anthropology. Within this new volume, Stefano Carta aims to provide a new, up-to-date way of understanding Jung's work, and to show the effect to which his central positions can be better understood in relation to topics such as the nature of the psyche, of the self, of the collective unconscious, and of archetypal theory. This book describes, with extensive substantiations and an original discussion, the transformation of psychological processes into cultural ones, leading to the formation of various forms of symbolic institutions. Spanning two volumes, which are also accessible as standalone books, and with international appeal and original and interdisciplinary in scope, they will be of great interest to Jungian scholars and analysts as well as students and those on Jungian-oriented training courses.

supernatural chicago 2023: Horrifying Children Lauren Stephenson, Robert Edgar, John Marland, 2024-03-07 *Horrifying Children* examines weird and eerie children's television and literature via critical analysis, memoir and autoethnography. There has been an explosion of interest in the impact of children's television and literature of the late twentieth century. In particular, the 1970s, '80s and '90s are seen as decades that shaped a great deal of the contemporary cultural landscape. Television of this period dominated the world of childhood entertainment, drawing freely upon literature and popular culture, like the Garbage Pail Kids and *Stranger Things*, and much of it

continues to resonate powerfully with the generation of cultural producers (fiction writers, screenwriters, directors, musicians and artists) that grew up watching the weird, the eerie and the horrific: the essence of 21st-century Hauntology. In these terms this book is not about children's television as it exists now, but rather as it features as a facet of memory in the 21st century. As such it is the legacy of these television programmes that is at the core of Horrifying Children. The 'haunting' of adults by what we have seen on the screen is crucial to the study. This collection directly addresses that which 'scared us' in the past inasmuch as there is a correlation between individual and collective cultural memory, with some chapters providing an opportunity for situating existing explorations and understandings of Gothic and Horror TV within a hauntological and experiential framework.

supernatural chicago 2023: Miracles and Wonders in the Middle Ages and Early Modern Period Albrecht Classen, 2025-10-20 Despite the assumption that we live today in a rather rationalist and mechanized world, there remain many aspects that neither medicine nor physics can fully explain. The Catholic Church continues to pronounce individuals as saints because scientifically confirmed miracles are associated with them. If we want to gain a solid understanding of the pre-modern history of mentality, emotions, and everyday culture, it proves to be highly revealing to examine what miracles and wonders had meant at that time, both in the theological and medical field, in the visual arts and literature. As a matter of fact, people both in the East and in the West have consistently flocked to pilgrimage sites all over the world in the hope that a miracle might happen and solve issues for them. The contributors to this volume, based on a symposium at the University of Arizona, May 2024, approach this critically important topic from many different perspectives, taking us from the early Middle Ages to the early modern age, examining hagiographical, medical, literary, and alchemical texts, discussing both miracles and wonders as relevant themes in the public discourses. Both the passage through Inferno and Purgatorio as the crucial pathway toward Paradiso and the experience of women's miraculous conception are identified as deeply impactful for the pre-modern world, and this both in Christian and Muslim cultures. Studying miracles and wonders through a kaleidoscope of different materials and concepts makes it possible to gain a closer understanding of people's mindsets, power structures, and the debate between medicine and religion. These topics were also greatly important in other cultures, as several papers on Arabic medieval literature indicate. Further, pursuing this global issue, we recognize easily that the separation line between the Middle Ages and the early modern period is only a modern construct and often not that helpful because the discourse on miracles and wonders has continued and influences even us today.

supernatural chicago 2023: An Appeal to the World Alex Haskins, 2024-11-25 An Appeal to the World: Creolizing Domination in the Political Thought of Montesquieu, Fukuzawa, and Du Bois reconstructs how three distinguished political philosophers challenged transnational domination—namely, forms of arbitrary political and economic control across national borders—through distinct, but comparable, philosophical frameworks geared toward a range of global contexts. For Montesquieu, despotic formulations remain the most alarming kinds of domination but can effectively be resisted through an emphasis on contextualized forms of moderation. Fukuzawa's key concern with domination centers on dependent relations but can be resisted through an emphasis on contextualized forms of independence. Du Bois, for his part, remains primarily concerned with domination as it manifests in discriminatory ontologies, and he challenges these through an emphasis on contextualized solidarity and self-determination. An Appeal to the World creolizes these authors' reflections through three cases on Egypt, China, and England that feature across each author's writing, highlighting both shortcomings of each thinker's conclusions and how, collectively, they offer a more circumspect approach to resisting transnational domination. In so doing, An Appeal to the World challenges and seeks to conceptually and methodologically move beyond transnational good governance and developed/developing frameworks that continue to bedevil international organizations in the present.

supernatural chicago 2023: God and the Little Grey Cells Dan W. Clanton, Jr., 2024-05-16 Dan

W. Clanton, Jr. examines the presence and use of religion and Bible in Agatha Christie's Hercule Poirot novels and stories and their later interpretations. Clanton begins by situating Christie in her literary, historical, and religious contexts by discussing "Golden Age" crime fiction and Christianity in England in the late 19th-early 20th centuries. He then explores the ways in which Bible is used in Christie's Poirot novels as well as how Christie constructs a religious identity for her little Belgian sleuth. Clanton concludes by asking how non-majority religious cultures are treated in the Poirot canon, including a heterodox Christian movement, Spiritualism, Judaism, and Islam. Throughout, Clanton acknowledges that many people do not encounter Poirot in his original literary contexts. That is, far more people have been exposed to Poirot via "mediated" renderings and interpretations of the stories and novels in various other genres, including radio, films, and TV. As such, the book engages the reception of the stories in these various genres, since the process of adapting the original narrative plots involves, at times, meaningful changes. Capitalizing on the immense and enduring popularity of Poirot across multiple genres and the absence of research on the role of religion and Bible in those stories, this book is a necessary contribution to the field of Christie studies and will be welcomed by her fans as well as scholars of religion, popular culture, literature, and media.

supernatural chicago 2023: Cinematic Guerrillas Jie Li, 2023-12-26 Winner, 2025 Katherine Singer Kovács Book Award, Society for Cinema and Media Studies Winner, 2024 Moving Image Book Award, Kraszna-Krausz Foundation Winner, 2024 Choice Outstanding Academic Title Honorable Mention, 2025 Joseph Levenson Prize (post-1900), Association for Asian Studies How might cinema make revolution and mobilize the masses? In socialist China, the film exhibition network expanded from fewer than six hundred movie theaters to more than a hundred thousand mobile film projectionist teams. Holding screenings in improvised open-air spaces in rural areas lacking electricity, these roving projectionists brought not only films but also power generators, loudspeakers, slideshows, posters, live performances, and mass ritual participation, amplifying the era's utopian dreams and violent upheavals. *Cinematic Guerrillas* is a media history of Chinese film exhibition and reception that offers fresh insights into the powers and limits of propaganda. Drawing on a wealth of archives, memoirs, interviews, and ethnographic fieldwork, Jie Li examines the media networks and environments, discourses and practices, experiences and memories of film projectionists and their grassroots audiences from the 1940s to the 1980s. She considers the ideology and practice of "cinematic guerrillas"—at once denoting onscreen militants, off-the-grid movie teams, and unruly moviegoers—bridging Maoist iconography, the experiences of projectionists, and popular participation and resistance. Li reconceptualizes socialist media practices as "revolutionary spirit mediumship" that aimed to turn audiences into congregations, contribute to the Mao cult, convert skeptics of revolutionary miracles, and exorcise class enemies. *Cinematic Guerrillas* considers cinema's meanings for revolution and nation building; successive generations of projectionists; workers, peasants, and soldiers; women and ethnic minorities; and national leaders, local cadres, and cultural censors. By reading diverse, vivid, and often surprising accounts of moviegoing, Li excavates Chinese media theories that provide a critical new perspective on world cinema.

supernatural chicago 2023: Milieu Elisha Jane Cohn, 2025-04-15 In this creaturely theory of the novel, Elisha Cohn rethinks the status of animals in recent global fiction, arguing that literary representation of animals should matter to any reader invested in the novel as a form, and showing how literary style makes knowable our imperiled multispecies worlds. Cohn argues that the animal lives of contemporary fiction move beyond allegories of globalization's fracture of subjectivity by emphasizing the creaturely dimensions of narrative. This shift in focus registers through recent fiction's fascination with milieus: environments made perceptible through sentience that humans share with other creatures. Showing how theories of milieu—from Jacob von Uexküll, George Canguilhem, and Sylvia Wynter to recent studies in comparative cognition—converge with and are conceptually indebted to Indigenous and Black ontologies, Cohn argues that the milieu not only explains the centrality of animals to contemporary fiction, but also promotes dialogue across

disciplines invested in anti-hierarchic accounts of embodied life. Each chapter foregrounds formal resonances in texts from the mid-1990s through the present, including work by Téa Obreht, Yoko Tawada, NoViolet Bulawayo, Sigrid Nunez, Jesmyn Ward, Linda Hogan, Lucy Ellmann, Amitav Ghosh, and Aminatta Forna. Throughout, Cohn compellingly argues for the centrality of narrative voice in avoiding, deferring, or complicating modes of figuration and critical interpretation that confirm human privilege.

supernatural chicago 2023: *Postcolonial Historical Materialism* Filippo Menozzi, 2025-03-27 Through a reappraisal of the work of four major figures in critical theory – Ernst Bloch, Georg Lukács, Theodor Adorno, and Walter Benjamin – Filippo Menozzi rethinks the tradition of critical theory in relation to pressing concerns in postcolonial studies. Revealing these authors' continued relevance to urgent issues in the 21st century, from struggles against racism to social movements and the transmutations of global capitalism, Menozzi reimagines them as central to an alternative genealogy of critical theory that moves beyond their European provenance and the limitations of –Western Marxism–. In doing so, this book challenges, more broadly, the view of critical theory as steeped in Eurocentrism, culturally conservative, and politically defeatist. Contesting this in four chapters, *Postcolonial Historical Materialism* inserts Adorno, Lukács, Bloch, and Benjamin into key contemporary sites of militancy and debate. Engaging with a wide range of European and non-European sources, Menozzi proposes a new concept of –postcolonial historical materialism–, indicating how the heritage of critical theory can reopen global possibilities of utopia and revolution in a non-utopian age of global emergencies, social unrest, and the unfinished history of decolonisation.

supernatural chicago 2023: *The Bloomsbury Handbook of the Philosophy of the Historical Sciences and Big History* Aviezer Tucker, David Cernín, 2025-08-21 This handbook examines the philosophy of the historical sciences and their synthesis in concepts like Big or Deep History. Written by interdisciplinary philosophers, historians, and scientists, it acts as a valuable guide for anybody interested in scientific knowledge of the deep past, Big History, and the philosophy of science. The Bloomsbury Handbook of the Philosophy of the Historical Sciences and Big History is the first philosophical reference work to recognize that History is not what it used to be: the historical sciences, Deep History, Big History, and even the history of the Anthropocene have now expanded the scope of historiography beyond that of literate civilizations to cover all scientific inferences about the past, from the Big Bang through the history of the planet and the history of life to the history of humanity. Different views about the scope of History have ontological, epistemic, methodological, explanatory, ethical, and educational reasons and implications. The historical sciences and the knowledge they have generated are founded on theories of knowledge of the past, epistemology of history. The contributions in this book consider whether there are common epistemic properties to all the historical sciences that distinguish them from non-historical or theoretical sciences. The first part of the handbook examines the recent expansion of the scope of the historical sciences in Big History, natural history, global history, and environmental history, and older broader concepts of history like universal history and philosophy of history. The second part of the handbook addresses the ontology and epistemology of the past, including the basic concepts of the historical sciences such as origins, the end of history, determination and underdetermination, contingency and necessity, historical predictions and counterfactuals, and historical pseudoscience. The third part examines the philosophies of the special historical sciences, historical linguistics, textual criticism, geology, evolutionary biology, systematics, archaeology, cosmology, history of the environment, and most significantly, their integrations and combinations – for example, how genetics, archaeology, and historical linguistics have generated a whole new knowledge of deep human history. This collection offers an overview of what the philosophy of the historical sciences is and is becoming for students and experts alike.
