flensburger tageblatt: West Germans and the Nazi Legacy Caroline Sharples, 2011-12-21 This book constitutes a new history of the complex memory cultures that persisted within post-war West Germany, examining the attitudes of ordinary people to the second wave of Nazi war crimes trials ushered in during the 1960s. It explores responses to the prospect of continuing investigations, the reception afforded to the defendants, and the sheer resonance that such proceedings could generate within a local community. Drawing upon case studies from across the Federal Republic, it bridges a gap between the current historiography and localised memory studies, and analyses of war crimes trials. Far from viewing the 1960s as an uncomplicated decade of change, this book emphasises the range of voices that were competing to make themselves heard during this period, whether they came from survivors' groups, crusading journalists and students, or from former prisoners of war, veterans' organisations and the war widowed. This diversity of opinion and experience enabled the persistence of silences, distortions and mythologies that could afford some level of distance to be imposed between the perpetrators of the Nazi genocide, and the ordinary West German population. The process of 'coming to terms with the past' was thus complicated and protracted.

flensburger tageblatt: **Heide Simonis** Bettina Munimus, 2010-11-01 So phänomenal und unerwartet Heide Simonis zur ersten Ministerpräsidentin gekürt wurde, so grotesk war das Ende ihrer politischen Karriere, als ein unbekannter Abweichler aus den eigenen Reihen ihr viermal seine Stimme für die Wiederwahl verwehrte. Zwölf Jahre regierte die Sozialdemokratin Simonis Schleswig-Holstein und war erste und lange Zeit einzige Ministerpräsidentin Deutschlands. Ihr Aufstieg zur ersten Landeschefin war begünstigt durch den Rücktritt von Björn Engholm als Folge der 'Barschel-Affäre'. Die Rheinländerin, die sich oft unkonventionell, authentisch und bodenständig gab, erfreute sich als Landesmutter in Schleswig-Holstein durchaus großer Beliebtheit. Doch mit ihrem bisweilen unnachgiebigen Führungsstil stieß sie in den eigenen Reihen beständig auf

Widerstände, die sich final in der schicksalhaften Stimmenenthaltung entluden. Auch wenn Deutschland mittlerweile von einer Bundeskanzlerin regiert wird, sind nur wenige Frauen in der politischen Führungsebene zu finden. Besonders in die Machtbastion 'Ministerpräsidentenamt' gelangen Frauen – wenn überhaupt – nur über erfolgreich gemeisterte Unwägbarkeiten. Welche Führungsqualitäten brauchen Politikerinnen, die dieses Amt anstreben? Bettina Munimus geht dieser Frage exemplarisch anhand der politischen Karriere der ersten Ministerpräsidentin Heide Simonis nach und untersucht, wie Heide Simonis den Aufstieg zur ersten Regierungschefin eines Bundeslandes erreichte und wie sie in diesem Amt führte.

flensburger tageblatt: *Thomas Mann Studies, Volume 2* Klaus W. Jonas, Ilse B. Jonas, 2016-11-11 Seldom, if ever, has there lived in the United States a foreign-born writer who has won such universal acclaim and made such an impact on the American literary scene as Thomas Mann. Not only have Mann's works, with very few exceptions, been translated but he is also one of the most eagerly collected of all modern authors. This volume will serve any student of literature, or collector, who is anxious to locate materials on Thomas Mann. *Thomas Mann Studies, Volume II*, is intended first of all as the bibliographical record for the period from 1954 to 1965. Since the death of Mann in 1955, a vast amount of material has been published about the man and his work. This extraordinary book lists almost four thousand items of criticism about the novelist which are not to be found in any previous bibliography. By far the majority of the items are in German, followed by a large number in English, French, Italian, and Swedish. Other languages represented include Japanese, Dutch, Spanish, Romanian, Danish, Polish, and Russian. Achieving its primary purpose of facilitating research in the rapidly growing area of Thomas Mann studies throughout the world, this book forms the complete record of critical, secondary literature about Mann, published as well as unpublished, through 1965. It also contains a comprehensive chapter on Mann's manuscripts, describing the public and private collections in which his papers are now preserved.

flensburger tageblatt: *The Discursive Construction of Migrant Identities* Charlotte Taylor, Simon Goodman, Stuart Dunmore, 2025-01-23 This edited volume explores how migrant identities are created and constructed in discourse both by migrants themselves and by others. The contributors reveal how migrant identities are discursively constructed by those with lived experiences of mobility and those who view themselves as part of the 'host' population. This dual focus responds to a lack of previous research examining migration representation from both perspectives. Readers will discover how the discursive constructions of migrant identities in different domains relate to one another. The case studies include a broad range of text types from film, government documents and narrative accounts to newspapers and Twitter. They also cover a wide range of contexts including Argentina, Australia, Italy, Romania, and UK, making this is a more comprehensive account of the framing of migration than has been previously accomplished. The chapters all follow the same structure to help the reader learn how to investigate migration discourses using qualitative and quantitative (critical) discourse analytic approaches.

flensburger tageblatt: *West Germany and the Iron Curtain* Astrid M. Eckert, 2019-09-02 *West Germany and the Iron Curtain* takes a fresh look at the history of Cold War Germany and the German reunification process from the spatial perspective of the West German borderlands that emerged along the volatile inter-German border after 1945. These border regions constituted the Federal Republic's most sensitive geographical space where it had to confront partition and engage its socialist neighbor East Germany in concrete ways. Each issue that arose in these borderlands – from economic deficiencies, border tourism, environmental pollution, landscape change, and the siting decision for a major nuclear facility – was magnified and mediated by the presence of what became the most militarized border of its day, the Iron Curtain. In topical chapters, the book addresses the economic consequences of the border for West Germany, which defined the border regions as depressed areas, and examines the cultural practice of western tourism to the Iron Curtain. At the heart of this deeply-researched book stands an environmental history of the Iron Curtain that explores transboundary pollution, landscape change, and a planned nuclear industrial site at Gorleben that was meant to bring jobs into the depressed border regions. The book traces

these subjects across the caesura of 1989/90, thereby integrating the long postwar era with the post-unification decades. As Eckert demonstrates, the borderlands that emerged with partition and disappeared with reunification did not merely mirror some larger developments in the Federal Republic's history but actually helped to shape them.

flensburger tageblatt: **Convoy SC122 & HX229** Martin Middlebrook, 2011-07-12 The author of *The First Day on the Somme* details a naval skirmish that became a turning point for the Battle of the Atlantic during World War II. Winston Churchill wrote, "The only thing that ever really frightened me during the war was the U-boat peril." Had the convoy link between North America and Britain been broken, the course of World War II would have been different. There was a period during the winter of 1942-43 when the Germans almost cut the North Atlantic lifeline. In the first twenty days of March, 1943, the Germans sank ninety-seven Allied merchant ships—twice the rate of replacement. During the same period, seven U-boats were lost and fourteen put in service. No wonder Churchill was worried. Early in March, 1943, Convoys SC122 and HX229 sailed from New York harbor for England, and Admiral Doenitz deployed forty-two U-boats to entrap them. Twenty-one merchant ships were sunk in the ensuing battle. The Germans called it "the greatest convoy battle of all time." This book documents the convoys, every maneuver of the merchant ships, their escort vessels, the long-range aircraft cover, and the attacking U-boats in a powerful narrative reminiscent of Nicholas Monsarrat's bestselling novel *The Cruel Sea*. In many ways, this book could be the story of any of the hundreds of convoys that sailed the ocean during the war. Middlebrook also elucidates three controversial aspects of the Battle of the Atlantic: why there was an "Air Gap" long after full air cover could have been provided, why the convoys had to sail with dangerously weak naval escorts, and how the Allied outwitted the Germans in the radio decoding war.

flensburger tageblatt: *Face Off* John W. Garver, 2011-10-01 Taiwan's first presidential election, in 1996, sparked a Sino-U.S. military showdown that resulted in the biggest show of U.S. naval force in East Asia since the Vietnam War. This book is the first to explore the origins and triangular dynamics of that historic confrontation. Analyzing the key decisions and misperceptions that led to the Taiwan Strait crisis, Garver warns that it may usher in a more confrontational era of Sino-U.S. relations. China is already emerging as an economic powerhouse and fears of its becoming an expansionist military power have grown in recent years as China has rapidly built up its armed forces since 1989. It has also adopted a more assertive stance in several territorial disputes with its neighbors, arousing new security concerns for Asia as a whole. When China tried to intimidate Taiwan's voters by firing missiles and conducting large-scale military exercises off its coasts in the period preceding the 1996 election, the U.S. dispatched two aircraft carrier battle groups to Taiwan. The prestige of all sides was fully engaged as powerful domestic interests demanded an assertive posture. Eventually, China adopted a more cautious stance and the crisis passed. But it marked the first instance of Chinese nuclear coercion of the U.S. and gave the China threat new credence in the U.S. and elsewhere in Asia. The author has studied the Taiwan question for more than 30 years and has witnessed first-hand the growth and culmination of Taiwan's democratization. This sober, mature reflection of decades of thought is certain to inform the debate on the China threat and the future of Sino-U.S. relations.

flensburger tageblatt: **The Battle for the Catholic Past in Germany, 1945-1980** Mark Edward Ruff, 2017-07-14 Were Pope Pius XII and the Catholic Church in Germany unduly singled out after 1945 for their conduct during the National Socialist era? Mark Edward Ruff explores the bitter controversies that broke out in the Federal Republic of Germany from 1945 to 1980 over the Catholic Church's relationship to the Nazis. He explores why these cultural wars consumed such energy, dominated headlines, triggered lawsuits and required the intervention of foreign ministries. He argues that the controversies over the church's relationship to National Socialism were frequently surrogates for conflicts over how the church was to position itself in modern society - in

politics, international relations and the media. More often than not, these exchanges centered on problems perceived as arising from the postwar political ascendancy of Roman Catholics and the integration of Catholic citizens into the societal mainstream.

flensburger tageblatt: Making Foreign People Pay Ali Cem Budak, 2019-05-29 First published in 1999, *Making Foreign People Pay* deals with the recovery of monetary claims in cross-border legal relations and contains the results of a comparative empirical research of debt recovery procedures of three countries with different socio-legal environments, Germany, England and Turkey. In order to analyse judicial debt recovery of cross-border claims, court statistics and files have been evaluated. The data show an infrequent use of the courts in all three countries. It seems that legal efforts aiming at facilitating international procedures have not been successful. But court procedures for the recovery of monetary claims are now to a large extent interchangeable with what may be called 'privatised methods of debt collection', including modern financial services such as factoring, forfeiting and commercial debt collection. Empirical evidence shows that such privatization of debt collection is a strong trend in cross-border debt collection. The book is an empirical contribution to the ongoing discussion of globalization processes and describes an important field of the globalization of law.

flensburger tageblatt: The 'Long 1970s' Poul Villaume, Rasmus Mariager, Helle Porsdam, 2016-04-28 Today it is widely recognised that the 'long 1970s' was a decisive international transition period during which traditional, collective-oriented socio-economic interest and welfare policies were increasingly replaced by the more individually and neo-liberally oriented value policies of the post-industrial epoch. Seen from a distance of three decades, it is increasingly clear that these socio-economic and socio-cultural processes also found their expression at the level of national and international political power. The contributors to this volume explore these processes of political-cultural realignment and their social impetus in Western Europe and the Euro-Atlantic area in and around the 1970s in the context of three agenda-setting topics of international history of this period: human rights, including the impact of decolonisation; East-West détente in Europe; and transnational relations and discourses. Going beyond the so-called Americanisation processes of the immediate postwar period, this volume reclaims Europe's place – and particularly that of smaller European nations – in contemporary Western history, demonstrating Europe's contribution to transatlantic transformation processes in political culture, discourse, and power during this period.

flensburger tageblatt: *Economic Inequality and News Media* Andrea Grisold, Paschal Preston, 2020-08-31 Economic inequalities have become increasingly prominent in public debate in the last decade as sluggish economic growth, declining or stagnant incomes, high unemployment, and state policy regimes orientated towards austerity dominate many core capitalist regions, often with extreme turbulence in the political arena. Debate over these issues unfolds in both the public sphere and within the academy, with the conversation developing from two disciplinary areas in particular: economics and political economy, and journalism and communication studies. *Economic Inequality and News Media* brings these fields together. In this interdisciplinary volume, Andrea Grisold and Paschal Preston build on a unique multi-country research project exploring how news media cover and frame issues of economic inequality. Taking media coverage of Thomas Piketty's best-selling *Capital in the Twenty-First Century* as a case study, this book addresses important blind-spots in the relationship between mainstream media and economics. It interrogates both the failure of economists' to engage with the evolving role of the media as well as journalists' tendency to overlook key aspects of economic processes and power that are politically relevant and of public interest. Grisold and Preston tackle this disconnect and argue for a multi-disciplinary approach in which they acknowledge the crucial role the mass media plays in creating and disseminating economic information. The book explores important questions such as: How do new forms of economic inequality, power, and privilege relate to prevailing theories and conceptualizations of the media? What roles do new trends and forms of economic inequality play in the typical narratives of mediated communication? How do we construct the story of inequality? This eye-opening and transdisciplinary book sheds new light not only on the relation between news media and economic inequality, but also

on economic issues more broadly. In an evolving world experiencing the rise of ultra-nationalism, populism, and rampant economic uncertainty, *Economic Inequality and News Media* is a crucial investigation of the nuances of economic news media.

flensburger tageblatt: *The Global Chancellor* Kristina Spohr, 2016-03-24 Helmut Schmidt is the neglected chancellor of modern German history, overshadowed by 'the greats' - Bismarck, Adenauer, Brandt and Kohl. This volume retrieves Schmidt's true significance as a pivotal figure who helped reshape the global order during the crisis-ridden 1970s. This major reinterpretation, based on detailed research in Schmidt's private papers and numerous archives in Europe and America, reveals him as a leader equally skilled in economics and security, and adept at personal diplomacy, who dared to act as a 'double interpreter' between the superpowers during the nadir of the Cold War. Schmidt was no mere 'crisis-manager': in fact he brought to the chancellorship a depth of reflection, evident in two decades of writings and speeches that justifies considering him an intellectual statesman on a par with Henry Kissinger. His achievements were prodigious. Hailed as the 'world economist', Schmidt helped create the G7 forum for global economic governance and the European Monetary System at a time when capitalism seemed on the rocks. And as the 'strategist of balance', he designed NATO's 'dual-track' response to the crisis caused by the massive Soviet arms buildup of Euro-missiles. This decision, Kristina Spohr argues, played a crucial part in holding together the Western alliance and paved the way to defusing the Cold War in Europe. Schmidt brought his country to the top table of world politics - what he unashamedly called *Weltpolitik* - as an equal of the wartime victor powers. It was through his Chancellorship that West Germany came of age on the global stage.

flensburger tageblatt: *Rewriting German History* Jan Rüger, Nikolaus Wachsmann, 2015-10-11 *Rewriting German History* offers striking new insights into key debates about the recent German past. flensburger tageblatt: *European Disposal Operations* H. Lindsey Arison III, 2014-03-07 *Ticking Time Bomb*. Between 1946 and 1990, on the order of 754,975 tons (over 1.5 billion pounds or 684 million kilograms) of chemical weapons were disposed in European waters. At least 21 European Nations are now potentially at risk because of the expected toxic effect on marine life and the food chain. Critical research revealed in over 400 print pages contains 111 images including 23 declassified TOP SECRET, SECRET, CONFIDENTIAL, and RESTRICTED documents, 40 photographs, and 17 maps. Principal Chapters: - Evolution of Plans for the Disposition of Captured Chemical Weapons - Accounting of All Captured Chemical Weapons - Accounting of All Sea-Disposed Chemical Weapons - Locations of the Scuttled Ships - Estimated Total Chemical Warfare Agents Disposed in European Waters - Legal Responsibilities of States - Conclusion and The Imperative for an International Strategy "Bottom Line": The environmental and public health problems facing European nations incident to the anticipated release of potentially massive amounts of slowly hydrolyzing nerve and blister agents into the marine environment are more critical and urgent than generally supposed. Increased incidents of human and marine injury in recent years have convinced many the threat of chemical poisons leaking from the deteriorating shells, canisters, and containers on the ocean floor is an imminent and insoluble problem. The fundamental premise of this study is that when these sea disposals occurred, dumping of toxic CW into the ocean was the preferred disposal method and was not an act of malevolence or ill will. Such dumping was not prohibited and

the effect on the environment was simply not considered important at that time. It is therefore not the intent of this book to affix blame or culpability. Rather, a detailed analysis of principal findings underscores the imperative for an international strategy and a proposal for international collaboration and cooperation in addressing the potential problem is advanced.

flensburger tageblatt: Virus Mania Torsten Engelbrecht, Claus Köhnlein, Samantha Bailey, Stefano Scoglio, 2021-04-22 The book 'Virus Mania' has been written with the care of a master-craftsman, courageously evaluating the medical establishment, the corporate elites and the powerful government funding institutions. Wolfgang Weuffen, MD, Professor of Microbiology and Infectious Epidemiology The book 'Virus-Wahn' can be called the first work in which the errors, frauds and general misinformations being spread by official bodies about doubtful or non-virus infections are completely exposed. Gordon T. Stewart, MD, professor of public health and former WHO advisor - - The population is terrified by reports of so-called COVID-19, measles, swine flu, SARS, BSE, AIDS or polio. However, the authors of Virus Mania, investigative journalist Torsten Engelbrecht, Dr. Claus Köhnlein, MD, Dr. Samantha Bailey, MD, and Dr. Stefano Scoglio, BSc PhD, show that this fearmongering is unfounded and that virus mayhem ignores basic scientific facts: The existence, the pathogenicity and the deadly effects of these agents have never been proven. The book Virus Mania will also outline how modern medicine uses dubious indirect lab tools claiming to prove the existence of viruses such as antibody tests and the polymerase chain reaction (PCR). The alleged viruses may be, in fact, also be seen as particles produced by the cells themselves as a consequence of certain stress factors such as drugs. These particles are then picked up by antibody and PCR tests and mistakenly interpreted as epidemic-causing viruses. The authors analyze all real causes of the illnesses named COVID-19, avian flu, AIDS or Spanish flu, among them pharmaceuticals, lifestyle drugs, pesticides, heavy metals, pollution, malnutrition and stress. To substantiate it, the authors cite dozens of highly renowned scientists, among them the Nobel laureates Kary Mullis, Barbara McClintock, Walter Gilbert and Sir Frank Macfarlane Burnet as well as microbiologist and Pulitzer Prize winner René Dubos, and it presents more than 1,400 solid scientific references. The topic of Virus Mania is of pivotal significance. Drug makers and top scientists rake in enormous sums of money and the media boosts its audience ratings and circulations with sensationalized reporting (the coverage of the New York Times and Der Spiegel are specifically analyzed). The enlightenment about the real causes and true necessities for prevention and cure of illnesses is falling by the wayside. For more reviews, see the older edition of Virus Mania

flensburger tageblatt: Excavating Nations J. Laurence Hare, 2015-01-01 Excavating Nations traces the history of archaeology and museums in the contested German-Danish borderlands from the emergence of antiquarianism in the early nineteenth-century to German-Danish reconciliation after the Second World War. J. Laurence Hare reveals how the border regions of Schleswig-Holstein and Sønderjylland were critical both to the emergence of professional prehistoric archaeology and to conceptions of German and Scandinavian origins. At the center of this process, Hare argues, was a cohort of amateur antiquarians and archaeologists who collaborated across the border to investigate the ancient past but were also complicit in its appropriation for nationalist ends. Excavating Nations follows the development of this cross-border network over four generations, through the unification of Germany and two world wars. Using correspondence and site reports from museum, university, and state archives across Germany and Denmark, Hare shows how these scholars negotiated their simultaneous involvement in nation-building projects and in a transnational academic community. --Provided by publisher.
