As certain to make you laugh as it will start friendly arguments, The Final Four of Everything is the perfect book for know-it-alls, know-a-littles, and anyone with an opinion on celebrity mugshots, literary heroes, sports nicknames, or bacon. Bracketology is a unique way of organizing information that dates back to the rise of the knockout (or single elimination) tournament, perhaps in medieval times. Its origins are not precisely known, but there was genius in the first bracket design that hasn't changed much over the years. You, of course, may be familiar with the bracket format via the NCAA basketball tournament pairings each March. If you've ever watched ESPN or participated in a March Madness office pool, you know what a bracket looks like. The Final Four of Everything takes the idea one step further, and applies the knockout format to every category BUT basketball. In areas where taste, judgment, and hard-earned wisdom really matter, we've set out to determine, truly, the Final Four of Everything.

goodnight moon book pdf: *Sexual Aggression Against Children* Jerome Blackman, Kathleen Dring, 2016-01-29 In *Sexual Aggression Against Children: Pedophiles' and Abusers' Development, Dynamics, Treatability, and the Law*, Drs. Blackman and Dring use multiple psychoanalytic principles to answer, "Why do people sexually abuse children?" and "Why are most abusers male"? They address the legal and mental health professions' minimization of the horrific nature of child sexual abuse, explain how to assess pedophiles' treatability, and discuss cases of adolescent and adult predators. Also, developmental analysis of sexual predation is integrated with a review of judicial decisions regarding civil commitment and punishment of abusers. The authors suggest how courts, evaluators, and legislatures can preserve constitutional rights of sexual offenders while prioritizing protection of children.

With multiple analyses of picturebooks throughout the twenty-first century, the authors illustrate how picturebooks can play a vital role in the development of children's perceptions about the different principles of democracy. From a holistic perspective, these books can be seen as the starting point for socializing children who will come to lead and participate in democratic societies themselves. The multi-pronged approach in this research introduces: (a) concepts underlying the role of picturebooks in familiarizing children with concepts about democracy, (b) research methods for picturebook analyses, (c) exploration of specific exemplar picturebooks that address democratic principles, (d) how picturebooks link democracy with human qualities, (e) utilizing democracy-themed picturebooks in the home and the school. This project holds the promise of promoting meaningful instruction of democracy through the use of picturebooks.

goodnight moon book pdf: *Tales of Literacy for the 21st Century* Maryanne Wolf, 2016-06-24 The *Literary Agenda* is a series of short polemical monographs about the importance of literature and of reading in the wider world and about the state of literary education inside schools and universities. The category of 'the literary' has always been contentious. What is clear, however, is how increasingly it is dismissed or is unrecognised as a way of thinking or an arena for thought. It is

sceptically challenged from within, for example, by the sometimes rival claims of cultural history, contextualized explanation, or media studies. It is shaken from without by even greater pressures: by economic exigency and the severe social attitudes that can follow from it; by technological change that may leave the traditional forms of serious human communication looking merely antiquated. For just these reasons this is the right time for renewal, to start reinvigorated work into the meaning and value of literary reading. Being Literate in the 21st Century wrestles with critical, timely questions for 21st-century society. How does literacy change the human brain? What does it mean to be a literate or a non-literate person in the present digital culture: for example, what will be lost in the present reading brain, and what will be gained with different mediums than print? What are the consequences of a digital reading brain for the literary mind and for writing itself? Can knowledge about the reading brain and advances in technology offer new forms of literacy and new forms of knowledge to the peoples in remote regions of the world who would never otherwise become literate? By using both research from cognitive neuroscience, psycholinguistics, child development, and education, and considering literary examples from world literature, Maryanne Wolf plots a course that seeks to preserve the deepest forms of reading from the past, while developing the cognitive skills necessary for this century's next generation.

goodnight moon book pdf: Children's books, brain development, and language acquisition Ralf Thiede, 2018-11-13 This book correlates English-speaking children's brain development and acquisition of language with the linguistic input that comes from children's books. Drawing from the most current research on the developing brain, the author demonstrates how language acquisition is exclusively interactive, and highlights the benefit that accrues when that interaction includes the exploratory language play found in early childhood literature. Through discussions of specific domains of grammar, the relation of these domains to children's literature through scaffolding, and the resultant linguistic and cognitive advantages for the child, this volume offers an innovative approach to early brain maturation.

goodnight moon book pdf: The Importance of Being Little Erika Christakis, 2017-02-07 "Christakis . . . expertly weaves academic research, personal experience and anecdotal evidence into her book . . . a bracing and convincing case that early education has reached a point of crisis . . . her book is a rare thing: a serious work of research that also happens to be well-written and personal . . .

engaging and important.” --Washington Post What kids need from grown-ups (but aren't getting)...an impassioned plea for educators and parents to put down the worksheets and flash cards, ditch the tired craft projects (yes, you, Thanksgiving Handprint Turkey) and exotic vocabulary lessons, and double-down on one, simple word: play. --NPR The New York Times bestseller that provides a bold challenge to the conventional wisdom about early childhood, with a pragmatic program to encourage parents and teachers to rethink how and where young children learn best by taking the child's eye view of the learning environment To a four-year-old watching bulldozers at a construction site or chasing butterflies in flight, the world is awash with promise. Little children come into the world hardwired to learn in virtually any setting and about any matter. Yet in today's preschool and kindergarten classrooms, learning has been reduced to scripted lessons and suspect metrics that too often undervalue a child's intelligence while overtaxing the child's growing brain. These mismatched expectations wreak havoc on the family: parents fear that if they choose the “wrong” program, their child won't get into the “right” college. But Yale early childhood expert Erika Christakis says our fears are wildly misplaced. Our anxiety about preparing and safeguarding our children's future seems to have reached a fever pitch at a time when, ironically, science gives us more certainty than ever before that young children are exceptionally strong thinkers. In her pathbreaking book, Christakis explains what it's like to be a young child in America today, in a world designed by and for adults, where we have confused schooling with learning. She offers real-life solutions to real-life issues, with nuance and direction that takes us far beyond the usual prescriptions for fewer tests, more play. She looks at children's use of language, their artistic expressions, the way their imaginations grow, and how they build deep emotional bonds to stretch the boundaries of their small worlds. Rather than clutter their worlds with more and more stuff, sometimes the wisest course for us is to learn how to get out of their way. Christakis's message is energizing and reassuring: young children are inherently powerful, and they (and their parents) will flourish when we learn new ways of restoring the vital early learning environment to one that is best suited to the littlest learners. This bold and pragmatic challenge to the conventional wisdom peels back the mystery of childhood, revealing a place that's rich with possibility.

goodnight moon book pdf: Homeschooling and Libraries Vera Gubnitskaia, Carol Smallwood, 2020-04-30 As families are looking for better ways to educate their children, more and more of them are becoming interested and engaged in alternative ways of schooling that are different, separate, or opposite of the traditional classroom. Homeschooling has become ever more creative and varied as families create custom-tailored curricula, assignments, goals, and strategies that are best for each unique child. This presents a multitude of challenges and opportunities for information institutions, including public, academic, school, and special libraries. The need for librarians to help homeschool families become information and media literate is more important than ever. This collection of essays provides a range of approaches and strategies suggested by skilled professionals as well as veteran homeschool parents on how to best serve the diverse needs and learning experiences of homeschooled youth. goodnight moon book pdf: Restless in Sleep Country Paul Huebener, 2024-05-14 Sleep, and the lack of it, is a public obsession and an enormous everyday quandary. Troubled sleep tends to be seen as an individual problem and personal responsibility, to be fixed by better habits and tracking gadgets, but the reality is more complicated. Sleep is a site of politics, culture, and power. In *Restless in Sleep Country* Paul Huebener pulls back the covers on cultural representations of sleep to show how they are entangled with issues of colonialism, homelessness, consumer culture, technology and privacy, the exploitation of labour, and the effects of the Covid-19 pandemic. Even though it almost entirely evades direct experience, sleep is the subject of a variety of potent narratives, each of which can serve to clarify and shape its role in our lives. In Canada, cultural visions of slumber circulate through such diverse forms as mattress commercials, billboards, comic

books, memoirs, experimental poetry, and bedtime story phone apps. By guiding us through this imaginative landscape, Huebener shows us how to develop a critical literacy of sleep. Lying down and closing our eyes is an act that carries surprisingly high stakes, going beyond individual sleep troubles. *Restless in Sleep Country* illuminates the idea of sleep as a crucial site of inequity, struggle, and gratification.

goodnight moon book pdf: No Kids Allowed Michelle Ann Abate, 2020-10-13 Children's literature isn't just for children anymore. This original study explores the varied forms and roles of children's literature—when it's written for adults. What do Adam Mansbach's *Go the F**k to Sleep* and Barbara Park's *MA! There's Nothing to Do Here!* have in common? These large-format picture books are decidedly intended for parents rather than children. In *No Kids Allowed*, Michelle Ann Abate examines a constellation of books that form a paradoxical new genre: children's literature for adults. Distinguishing these books from YA and middle-grade fiction that appeals to adult readers, Abate argues that there is something unique about this phenomenon. Principally defined by its form and audience, children's literature, Abate demonstrates, engages with more than mere nostalgia when recast for grown-up readers. Abate examines how board books, coloring books, bedtime stories, and series detective fiction written and published specifically for adults question the boundaries of genre and challenge the assumption that adulthood and childhood are mutually exclusive.
