mary in cursive: The Poems of Lady Mary Wroth Josephine A. Roberts, 1992-09-01 Although her poems are little known today, Lady Mary Wroth was one of the most accomplished women writers of the English Renaissance. Her poems were circulated among many of the leading authors of her time, including Ben Jonson, who praised her work for its profound understanding of the nature of romantic love. Lady Mary's sonnet cycle, *Pamphilia to Amphilanthus*, was the first English sequence to be written from a woman's perspective. The Countesse of Montgomery's *Urania*, her romance interspersed with poetry, was one of the first works of prose fiction to be composed by an Englishwoman. In this complete edition of Lady Mary Wroth's verse, Josephine Roberts has brought together and annotated all 192 of the surviving poems, many of which have never been published before. As the eldest daughter of Sir Robert Sidney and Lady Barbara Gamage, Lady Mary took great pride in the Sidney literary heritage. During the years of her marriage she assumed the roles of both poet and patron, an example set for her by her father and her more famous uncle, Sir Philip Sidney. She further followed the precedent of her uncle by choosing for her own work the artistic forms that he had favored -- the sonnet sequence, pastoral romance, and pastoral drama. As a young woman, Lady Mary belonged to Queen Anne's intimate circle, but in the years following her husband's death she suffered a precipitous decline in social status. She violated the social taboos of her age by becoming the mistress of her first cousin, William Herbert, earl of Pembroke, and bearing him two illegitimate children. Her artistic efforts aroused equal controversy when, after the publication of her prose romance, the *Urania*, several prominent noblemen attacked her for portraying their private lives under the guise of fiction. Despite these obstacles -- and the added burden of the unpaid debts that were the legacy of her disappointing marriage -- Lady Mary maintained an independent spirit and trusted in an ability to make her own decisions. In her prose works she lashed out at the hypocrisies of life at court; in her poetry she wrote of more personal concerns -- the treacherousness of emotion, the eternal elusiveness of love. Rising above well-worn Elizabethan conceits, the best of Lady Mary's poems reveal an ambivalence toward romance and a wise understanding of the vicissitudes of human emotion.

mary in cursive: Texts and Artefacts Larry W. Hurtado, 2017-11-30 The essays included in this volume present Larry W. Hurtado's steadfast analysis of the earliest Christian manuscripts. In these chapters, Hurtado considers not only standard text-critical issues which seek to uncover an earliest possible version of a text, but also the very manuscripts that are available to us. As one of the pre-eminent scholars of the field, Hurtado examines often overlooked 2nd and 3rd century artefacts, which are among the earliest manuscripts available, drawing fascinating conclusions about the features of early Christianity. Divided into two halves, the first part of the volume addresses text-critical and text-historical issues about the textual transmission of various New Testament writings. The second part looks at manuscripts as physical and visual artefacts themselves, exploring the metadata and sociology of their context and the nature of their first readers, for the light cast upon early Christianity. Whilst these essays are presented together here as a republished collection, Hurtado has made several updates across the collection to draw them together and to reflect on the developing nature of the issues that they address since they were first written.

mary in cursive: *Copying Early Christian Texts* Alan Mugridge, 2016-07-19 It is widely believed that the early Christians copied their texts themselves without a great deal of expertise, and that some copyists introduced changes to support their theological beliefs. In this volume, however, Alan Mugridge examines all of the extant Greek papyri bearing Christian literature up to the end of the

4th century, as well as several comparative groups of papyri, and concludes that, on the whole, Christian texts, like most literary texts in the Roman world, were copied by trained scribes. Professional Christian scribes probably became more common after the time of Constantine, but this study suggests that in the early centuries the copyists of Christian texts in Greek were normally trained scribes, Christian or not, who reproduced those texts as part of their trade and, while they made mistakes, copied them as accurately as any other texts they were called upon to copy.

Presenting key textual, historical, and methodological information, the volume exemplifies new and diverse approaches to the study of women's writing. The book is clearly divided into three sections, covering: how women learnt to write and how their work was circulated or published; how and what women wrote in the places and spaces in which they lived, worked, and worshipped; and the different kinds of writing women produced, from poetry and fiction to letters, diaries, and political prose. This structure makes the volume readily adaptable to course usage. The Companion is enhanced by an introduction that lays out crucial framework and critical issues, and by chronologies that situate women's writings alongside political and cultural events.

mary in cursive: D Is for Dysfunctional-And Doo Wop: Songs of a Hoosier Schizo Mary Ellen Stepanich Phd, 2013-06-03 Author Mary Ellen Stepanich, with tongue firmly in cheek, answers the question, How do you turn a normal, happy-go-lucky, poor, small-town girl of the Midwest into a push-me-pull-me, multi-married, mass-of-inner-conflicts schizophrenic? In her memoir, she shares the personal (and mostly true) story of her family's dysfunction. The eldest daughter of the family, she started out as an average, happy, and innocent little girl. Her voice was soon crushed, however, by disastrous value programming--the tacit and implicit lessons taught by parents, teachers, peers, relatives, and even the geographical and cultural environment. These learned values can become immutable unless the person receiving them can finally recognize that these behaviors do not benefit their lives--and then boldly choose to ignore them. All Mary Ellen has wanted out of life was someone to listen to her, and now her voice is finally heard. Her tale, one of systematic abuse and silence, is told with refreshing honesty and humor. She was one of a generation born on the cusp between the Great Depression and the New Deal, and as a result she was programmed to become anything but the confident, assertive adult she has fought to create. In her story, there is hope.

Woods, 2024-08-01 Reading texts or direct messages, communicating through speech or sign language, and viewing artwork are all among the many ways people share news, ideas, and feelings with one another. Communication and its technologies are what allow us to do that. As ancient civilizations formed, people developed spoken and written languages and communication tools. They designed and improved alphabets and writing systems to record information, created paper from plants or animal skins, and invented tools such as block printing and the printing press to help copy books and other long texts faster. Whether coming up with new technologies or innovating existing ones,

ancient peoples were always finding ways to better communicate with one another. From finger painting to postal systems, find out how early societies created and innovated the technologies that led to modern communication tools.
