spark notes macbeth: Adapting Macbeth William C. Carroll, 2022-01-27 In this study, William C. Carroll analyses a wide range of adaptations and appropriations of Macbeth across different media to consider what it is about the play that compels our desire to reshape it. Arguing that many of these adaptations attempt to 'improve' or 'correct' the play's perceived political or aesthetic flaws, Carroll traces how Macbeth's popularity and adaptability stems from several of its formal features: its openly political nature; its inclusion of supernatural elements; its parable of the dangers of ambition; its violence; its brevity; and its domestic focus on a husband and wife. The study ranges across elite and popular culture divides: from Sir William Davenant's adaptation for the Restoration stage (1663-4), an early 18th-century novel, The Secret History of Mackbeth and Verdi's Macbeth, through to 20th- and 21st-century adaptations for stage and screen, as well as contemporary novelizations, young adult literature and commercial appropriations that testify to the play's

absorption into contemporary culture.

spark notes macbeth: *Tense-Switching in Classical Greek* Arjan A. Nijk, 2022-02-02 Tense is at its most interesting when it behaves badly. In this book Arjan Nijk investigates the variation between the past and present tenses to refer to past events in Classical Greek and beyond. Adopting a cognitive approach to the issue, he argues that the use of the present for preterite depends on the activation of implicit conceptual scenarios in which the gap between the past and the present is bridged. The book is distinguished from previous accounts by its precision in describing these conceptual scenarios, the combination of linguistic theorising with philological and statistical methods, the size of the corpus under investigation and the explicitly cross-linguistic scope. It provides a complete overview of the phenomenon of tense switching in Classical Greek, as well as new theoretical perspectives on deixis and viewpoint, and is important for classicists, narratologists and linguists of every stamp. spark notes macbeth: The Jungian Art. The Jungian Persona in Shakespeare's works Aleksandra Vujovic, 2022-01-28 Document from the year 2021 in the subject English Language and Literature Studies - Literature, grade: A, , language: English, abstract: This work deals with various characters from Shakespeare's works and analyses them according to the Jungian Art. In the individuation process, Shakespeare sides with Jung related to the role and importance of the concept of free will. None of Shakespeare's heroes follow their fate as an externally imposed, inevitable chain of events which lead to their doom. Rather, it is their lack of self-knowledge and self-control as a sign of their failed individuation that causes their tragic ends. These characters embody a soul which is in many ways great and noble, but which has a fatal flaw which plays the role of fate. In Jungian terms, fate can be interpreted as unrecognized psychological processes or archetypes that are not dealt with, which therefore influence or lead the actions of the ego conscience. Shakespeare explores in depth these flaws to which the tragic hero, after an inner conflict, fails to attempt to deal

with the archetypal psychic forces. The result is that the tragic hero loses his soul, the link to the archetype of Self as both the motivator and the goal of the individuation process. In that regard, when we examine, for example, Othello, it is obvious that the cause of his crisis and ruin is psychological and that his intellectual confusion is not the cause but rather the result of the chaos in his psyche. In Jungian terms, Othello, as the ego consciousness, struggles and fails to understand and establish a functioning relationship with both Iago and Desdemona, respectively seen as his shadow and anima. The importance of dealing with these archetypes as a means of reaching psychic balance as one of the indicators of a successfully ongoing individuation process, is described from a Jungian point of view.
