awareness.

"Taking Charge of Your Fertility"

The book covers a variety of topics, including:

- The science of the menstrual cycle

- Addressing common reproductive health concerns

Weschler's book emphasizes the importance of tracking menstrual cycles, which can lead to better health outcomes for women. By understanding their bodies, women can make informed decisions about family planning, improve their chances of conception, and identify potential health issues.

Fertility Awareness Method (FAM)

Weschler advocates for the Fertility Awareness Method (FAM), a natural approach to understanding and managing fertility. The FAM includes:

1. Tracking basal body temperature

2. Observing cervical mucus changes

4. Recognizing ovulation signs

This method empowers women to identify their fertile windows, making it easier to conceive or avoid pregnancy without the use of hormonal contraceptives. Weschler's approach is particularly beneficial for those who prefer a natural method of family planning.

Toni Weschler's work has transcended individual education; it has contributed to a broader movement towards increasing awareness and understanding of women's health issues. Her emphasis on self-advocacy encourages women to take an active role in their reproductive health.

Breaking the Stigma

Historically, discussions around menstruation and reproductive health have been shrouded in stigma and misinformation. Weschler's candid approach helps demystify these topics. It explicates the concept of rhetorical ingenuity—the creation of rhetorical means for specific and technical, yet extremely personal, situations. At a time when women's health concerns are at the center of national debate, this rhetorical ingenuity provides means for women to uncover latent sources of oppression in women's health and medicine and to influence matters of research, funding, policy, and everyday access to healthcare in the face of exclusion and disenfranchisement. This accessible collection will be inspiring reading for academics and students in health communication, medical humanities, and women's studies, as well as for activists, patients, and professionals.

toni weschler: Prospect Park West Amy Sohn, 2009-09-01 In Amy Sohn's smart, sexy, satirical peek into the bedrooms and hearts of Prospect Park West, the lives of four women come together during one long, hot Brooklyn summer. The lives of these four Brooklynite women look basic on the outside—but inside, each woman feels a building frustration with life that could burst any second. Frustrated Oscar-winning actress Melora Leigh, eager to relieve the pressures of raising her adopted toddler, feels the seductive pull of kleptomania; Rebecca Rose, missing her formerly robust sex life, begins a dangerous flirtation with handsome neighborhood celebrity Lizzi O'Donnell, so-called former lesbian, wonders what draws her to women despite her sexy husband and adorable baby; and Karen Bryan Shapiro consumes herself with a powerful obsession that is sure to complete her perfect life—snagging the ultimate three-bedroom apartment in a well-maintained, P.S. 321-zoned co-op building. As the women's paths intertwined (and sometimes collide), each must struggle to keep her man, her sanity...and her playdates.

toni weschler: Humanae Vitae, 50 Years Later Theresa Notare, 2019-06-28 In the life of the Catholic Church, the papal encyclical *Humanae vitae* represents a deepening of understanding regarding the nature of married love and the transmission of life. Despite fifty years (1968-2018) since it's promulgation, many Catholics have yet to discover the treasure of these rich teachings. This volume therefore seeks to elucidate the encyclical's reaffirmation of the divine plan. It does this in a unique way by providing essays from experts of various disciplines that include history, theology, science, medicine, law, and governmental policy. The occasion of the fiftieth anniversary of *Humanae vitae* offers a teaching moment. In this compendium, experts representing a variety of disciplines including history, culture, theology, medicine, law, and psychology present their reflections upon God's divine plan as described in *Humanae vitae*. The authors first presented this work in an abbreviated form at a symposium held at The Catholic University of America (April 4-6, 2018). Here, their presentations are substantively developed and hopefully will encourage further scholarly work. Ultimately, their purpose is to help the reader arrive at a more positive understanding of the teachings found in *Humanae vitae*. Although designed for the educated reader, the essays presume that when the teachings of *Humanae vitae* are embraced by men and women, they can contribute to the healing of the wounds of a world broken by sin but redeemed by Christ.

toni weschler: *Labor Day* Eleanor Henderson, Anna Solomon, 2014-04-15 Thirty acclaimed writers share their personal birth stories—the extraordinary, the ordinary, the terrifying, the sublime, the profane It's an elemental, almost animalistic urge—the expectant mother's hunger for birth narratives. Bookstores are filled with month-by-month pregnancy manuals, but the shelves are virtually empty of artful, entertaining, unvarnished accounts of labor and delivery—the stories that new mothers need most. Here is a book that transcends the limits of how-to guides and honors the act of childbirth in the twenty-first century. Eleanor Henderson and Anna Solomon have gathered true birth stories by women who have made self-expression their business, including Cheryl Strayed, Julia Glass, Lauren Groff, Dani Shapiro, and many other luminaries. In *Labor Day*, you'll read about women determined to give birth naturally and others begging for epidurals; women who pushed for hours and women whose labors were over practically before they'd started; women giving birth to twins and to ten-pound babies. These women give birth in the hospital, at home, in bathtubs, and, yes, even in the car. Some revel in labor, some fear labor, some feel defeated by labor, some are fulfilled by it—and all are amazed by it. You will laugh, weep, squirm, perhaps groan in recognition, and undoubtedly gasp with surprise. And then you'll call every mother or mother-to-be that you know and say You MUST read *Labor Day*. toni weschler: *Fertility Technology* Donna J. Drucker, 2023-03-07 A concise overview of fertility technology—its history, practical applications, and ethical and social implications around the world. In the late 1850s, a physician in New York City used a syringe and glass tube to inject half a drop of sperm into a woman's uterus, marking the first recorded instance of artificial insemination. From

that day forward, doctors and scientists have turned to technology in ever more innovative ways to facilitate conception. Fertility Technology surveys this history in all its medical, practical, and ethical complexity, and offers a look at state-of-the-art fertility technology in various social and political contexts around the world. Donna J. Drucker's concise and eminently readable account introduces the five principal types of fertility technologies used in human reproduction—artificial insemination; ovulation timing; sperm, egg, and embryo freezing; in vitro fertilization; and IVF in uterine transplants—discussing the development, manufacture, dispersion, and use of each. Geographically, it focuses on countries where innovations have emerged and countries where these technologies most profoundly affect individuals and population policies. Drucker's wide-ranging perspective reveals how these technologies, used for birth control as well as conception in many cases, have been critical in shaping the moral, practical, and political meaning of human life, kinship, and family in different nations and cultures since the mid-nineteenth century.
