txmdv: Stealing Cars John A. Heitmann, Rebecca H. Morales, 2014-05 The technology-thwarting car thief has become as advanced as the cars themselves. As early as 1910 Americans recognized that cars were easy to steal and, once stolen, hard to find, especially since cars looked much alike. Model styles and colors eventually changed, but so did the means of making a stolen car disappear. Though changing license plates and serial numbers remain basic procedure, thieves have created highly sophisticated networks to disassemble stolen vehicles, distribute the parts, and/or ship the altered cars out of the country. Stealing cars has become as technologically advanced as the cars themselves. John A. Heitmann and Rebecca H. Morales's study of automobile theft and culture examines a wide range of related topics that includes motives and methods, technological deterrents, place and space, institutional responses, international borders, and cultural reflections. Only recently have scholars begun to move their focus away from the creators and manufacturers of the automobile to its users. *Stealing Cars* illustrates the power of this approach, as it aims at developing a better understanding of the place of the automobile in the broad texture of American life. There are many who are fascinated by aspects of automobile history, but many more readers enjoy the topic of crime—motives, methods, escaping capture, and of course solving the crime and bringing criminals to justice. *Stealing Cars* brings together expertise from the history of technology and cultural history as well as city planning and transborder studies to produce a compelling and detailed work that raises questions concerning American priorities and values. Drawing on sources that include interviews, government documents, patents, sociological and psychological studies, magazines, monographs, scholarly periodicals, film, fiction, and digital gaming, Heitmann and Morales tell a story that highlights both human creativity and some of the paradoxes of American life.

txmdv: *What Every Teen Should Know about Texas Law* L. Jean Wallace, Christopher F. Cypert, 2018-05-01 From reviews of earlier editions: "Young people get into legal trouble for two reasons: they do not know what the law is, and they do not stop to think about the consequences of their actions. This book would make a good text for a preparation for life class. . . . The book is

written in plain language, unencumbered by a lot of legal citations, and with no expectation that the reader will have any working knowledge of the law.” —Texas Bar Journal “A book any parent should consider giving their child. . . . But before you do, take a look at it yourself. No matter the title, Wallace’s book . . . contains information everyone—not just 18-year-olds—should know.” —Austin American-Statesman What Every Teen Should Know about Texas Law is the only single-source guide for accurate, easy-to-understand information about most areas of civil law in Texas. L. Jean Wallace drew on years of experience as a students’ attorney at Texas Tech University to inform young adults about the areas of law that affect them most: driving and car ownership, pranks and crimes (including alcohol and drug offenses), personal relationships, employment and consumer concerns, and living on their own. She illustrated her points with true, sometimes humorous, stories of young adults’ encounters with the law. For this new edition, municipal judge Christopher F. Cypert has completely updated the book to reflect the current state of the law. He covers specific topics that are now mandated to be taught in schools, including the proper way to interact with peace officers during traffic stops and other in-person encounters, as well as internet-era misbehaviors such as sexting and cyberbullying. Like Wallace, Cypert has helped many young people navigate the sometimes confusing processes of the legal world, often loaning earlier editions of this book to young offenders in his court. Both authors’ real-world experience and legal expertise ensure that What Every Teen Should Know about Texas Law is indeed a complete and practical guide for assuming the responsibilities of adulthood—as well as a good refresher course for all legal-age Texans.

txmdv: A Fragment Too Far Dudley Lynch, 2019-10-01 True Detective meets X-Files in the first installment of the Luke McWhorter series Nine physicists are dead. The medical examiner has determined that the victims died from drinking coffee laced with rat poison. The owner of the house, Professor Thaddeus Huntgardner, isn’t suspected, but his claim that a piece of the debris from Roswell’s 1947 UFO crash was hidden in Flagler might be true. Enter Luther “Luke” Stephens McWhorter, a Yale Divinity School-educated West Texas sheriff with all the right questions. Is the fragment real? If so, who is trying to locate it? And what has fueled the byzantine activities of Abbot County’s two secret societies for the past 70 years? txmdv: Texas Secessionists Standoff Donna Marie Miller, 2023-01-28 On April 27, 1997, Richard Lance McLaren and his followers in the so-called “Republic of Texas (ROT)” militia held Joe and Margaret Ann Rowe hostage inside their own home at the Davis Mountain Resort, near Fort Davis,

Texas, and demanded the release of jailed ROT members Jo Ann Turner and Robert Jonathan Scheidt. McLaren's demand initiated a seven-day standoff with local law enforcement and the Texas Rangers that came to be called the "Republic of Texas War." Opening with a foreword by the FBI negotiator who served as an on-site consultant throughout the crisis, author Donna Marie Miller presents the first full-length book treatment of the events leading up to McLaren's "declaration of war" and its aftermath. The result is an absorbing account of manipulation by a leader as charismatic as he was deluded; of misinformed individuals motivated by desperation who aligned themselves with an extremist; and of law enforcement officials caught in the tension between their duty to protect the public and their desire to avoid a repeat of disasters like those at Ruby Ridge, Idaho, and the Branch Davidian compound outside Waco, Texas. Central to the story is Jo Ann Turner, a frantic woman drowning in debt who was drawn into the false ideology espoused by McLaren, which eventually led to her personal undoing. Based on archival research and interviews with persons involved—including McLaren, who has been incarcerated since 1998—this riveting account provides a multifaceted perspective of the historical incident and a detailed chronicle of a modern American anti-government militia, its victims, and the events that led to its eventual downfall.

txmdv: *Civil Rights and Liberties in the 21st Century* John C. Domino, 2018-04-19 This up-to-date analysis of the Supreme Court's landmark rulings on civil rights and liberties is a discussion of the facts, legal issues, and constitutional questions surrounding those rulings. Domino's book serves as either a core text in courses on civil liberties and civil rights, or as a supplementary text in courses on constitutional law and the judiciary. The book is written in the belief that the key to understanding constitutional law is not having the right answers but asking the right questions. It encourages students to be critical thinkers and provides a historical context so students can better understand competing social, legal, and political interests affecting the Supreme Court's decisions today. The text also includes numerous short excerpts from some of the more influential, eloquent, and controversial Supreme Court opinions to illustrate the handiwork of the powerful legal minds who have helped to shape our society. It reminds us that the Court is not an abstract legal mechanism, but rather a group of human beings with divergent opinions. New to the Fourth Edition Up-to-date discussion of recent rulings, from the standpoint of the Court as a Cultural Tribunal, including: freedom of expression, including hate speech and the historic Citizens United case on campaign finance freedom of religion, including prayer during public meetings and the controversial Hobby Lobby case on corporate religious belief social issues, including reproductive rights & abortion and the landmark Obergefell case on same-sex marriage New section on obscenity and the First Amendment, including discussion of Internet pornography Expanded discussion of the use of GPS and thermal scanning technology by law enforcement and issues surrounding mobile phone privacy The nomination and confirmation politics surrounding the death of Antonin Scalia, the failed nomination of Merrick Garland, and the confirmation of Trump appointee Neil Gorsuch Analysis and comparison of the Roberts Court to the Rehnquist, Burger, and Warren Courts, revisiting the question of counterrevolution that set the theme for previous editions

txmdv: *Big-Time Sports in American Universities* Charles T. Clotfelter, 2019-02-21 For almost a century, big-time college athletics has been a wildly popular but consistently problematic part of American higher education. The challenges it poses to traditional academic values have been recognized from the start, but they have grown more ominous in recent decades, as cable television has become ubiquitous, commercial opportunities have proliferated, and athletic budgets have ballooned. In the second edition of his influential book *Big-Time Sports in American Universities*, Clotfelter continues to examine the role of athletics in American universities, building on his argument that commercial sports have become a core function of the universities that engage in them. Drawing on recent scandals on large-scale college campuses and updates on several high-profile court cases, Clotfelter brings clear economic analysis to the variety of problems that sports raise for university and public policy, providing the basis for the continuation of constructive conversations about the value of big-time sports in higher education.

txmdv: Impaired-driving Program Assessments: a Summary of Recommendations (1991 to 2003). Darrell W. Johnson, 2004 The National Highway Traffic Safety Administration (NHTSA) developed an assessment process that gives States an opportunity to conduct a review of their efforts to control impaired driving by an outside team of nationally recognized experts. Each assessment examines a State's overall program and presents recommendations to improve or enhance it. NHTSA reviewed 38 State assessment reports and found 2,982 individual recommendations, including 852 that were identified as priority recommendations by the teams. Most of the recommendations fit into 10 thematic areas: (1) increasing deterrence by prioritizing enforcement efforts and enhancing the arrest, prosecution, and adjudication process; (2) improving public information and education efforts related to prevention and deterrence; (3) remedying problems involving DUI data and records (reporting requirements, offender tracking systems, data linkages, uniform traffic citations); (4) enacting new laws or revising existing laws aimed at increasing the deterrence and/or prevention of DUI; (5) enhancing training for law enforcement, prosecution, and judicial personnel; (6) evaluating programs and activities to combat impaired driving; (7) providing sufficient resources for treatment and rehabilitation; (8) improving inter/intra-governmental coordination and cooperation; (9) providing funding (including self-sufficiency) to provide for adequate resources (personnel, equipment); and (10) developing or increasing task forces and/or community involvement.
