which detail from the text presents macgregor s viewpoint: A John Haught Reader John F. Haught, 2018-11-06 Classical Christian theologies came to expression at a time when the universe seemed relatively fixed and unchanging. The otherworldly spiritual instincts of many religions reflected a static, vertical, and hierarchical understanding of the natural world. Today, however, especially because of developments in the sciences, it appears that the universe is still coming into being. The writings offered in this book reflect their author's belief that if the universe is unfinished, new thoughts about God and all the traditional theological topics are essential to make sense of it all. John Haught argues that the universe is best understood according to the metaphor of drama rather than design. This means that the most important question in science and theology today is not whether the intricate complexity of life points to a deity, or even how God acts in nature, but whether the cosmic drama as a whole carries a meaning. Unfortunately, the devotional life of most religious people on our planet still presupposes an essentially immobile universe. Christian instruction, for example, continues to nurture an otherworldly piety that estranges nature unnecessarily from God. The readings in this book, however, suggest that the ancient Abrahamic hope for the coming of God from out of the future may now become the foundation of a scientifically up-to-date theology of nature that affirms divine transcendence without robbing nature of its significance.

which detail from the text presents macgregor s viewpoint: Brazilian Folk Narrative Scholarship (RLE Folklore) Mary MacGregor-Villarreal, 2015-02-11 Although Brazilian scholars have collected and studied folklore since the second half of the nineteenth century, their work has gone largely unnoticed by folklorists working in other parts of the world. With the exception of anthropologists who occasionally study the folk literature of indigenous peoples in Brazil, few foreigners are familiar with, or even aware of, the kinds of folklore studies that have been undertaken in that country. This work, first published in 1994, aims to characterize the nature of Brazilian narrative studies and trends; to discuss and assess the roots of the apparent preoccupations, approaches and objectives of traditional narrative scholarship in Brazil; to examine Brazilian folklore scholarship in light of Euro-American research; and to point out the results and accomplishments of Brazilian research while simultaneously indicating possibilities for new directions in research.

which detail from the text presents macgregor s viewpoint: Divine Sovereignty and Human Responsibility D. A. Carson, 2002-01-07 Both theology and philosophy wrestle with the tension that exists between the sovereignty of God and human response. In Christianity, this tension is particularly acute as God is understood to be both omnipotent and benevolent. This tension underlies numerous other questions: about the nature of God, the meaning of human freedom and choice, the concept of divine repentance, the reign of God and supremely, the significance of the incarnation. Dr. Carson brings clear, scholarly insights and finely-honed exegetical skills to this all-pervasive issue, seeing it not so much as a problem to be solved as a framework to be explored. He examines the sovereignty-responsibility themes in the Old Testament, intertestamental literature and in the theology of John's gospel and concludes with a reflection on the theological implications for ministry and mission today.
