**chinese textbook pdf: Multiculturalism, Chinese Identity, and Education** Jason Cong Lin, 2022-11-02 In Chinese societies, Chinese identity is an important yet controversial topic. This book examines official understandings of Chinese identity in Mainland China and Hong Kong, exploring how the latest governments of Mainland China and Hong Kong conceptualize Chinese identity; how government-endorsed textbooks frame it in different subjects; and how a multicultural approach can enhance understanding of identity in both societies. Using content analysis to support his theoretical arguments, Lin offers an in-depth, updated, and detailed picture of how the governments of Mainland China and Hong Kong, and their endorsed textbooks, encourage people in these societies to respond to the question of who are we?. He also elaborates on how the current approach to

understanding Chinese identity can be harmful, and examines how a multicultural approach could better fit these Chinese contexts and enhance understanding of who are we?. Given that the question of identity causes trouble everywhere, and many countries are debating approaches to understanding diverse identities in their own societies, this book provides valuable insights into the Chinese perspective, to allow readers to more fully understand global frameworks of identity. This book will interest researchers and students in the fields of multiculturalism, multicultural education, national identity, identity politics, and China and Hong Kong studies.

**chinese textbook pdf: *Chinese Medicine and Healing*** TJ Hinrichs, Linda L Barnes, 2013-01-07 Chinese Medicine and Healing is a comprehensive introduction to a rich array of Chinese healing practices as they have developed through time and across cultures. Contributions from fifty-eight leading international scholars in such fields as Chinese archaeology, history, anthropology, religion, and medicine make this a collaborative work of uncommon intellectual synergy, and a vital new resource for anyone working in East Asian or world history, in medical history and anthropology,

and in biomedicine and complementary healing arts. This illustrated history explores the emergence and development of a wide range of health interventions, including propitiation of disease-inflicting spirits, divination, vitality-cultivating meditative disciplines, herbal remedies, pulse diagnosis, and acupuncture. The authors investigate processes that contribute to historical change, such as competition between different types of practitioner—shamans, Daoist priests, Buddhist monks, scholar physicians, and even government officials. Accompanying vignettes and illustrations bring to life such diverse arenas of health care as childbirth in the Tang period, Yuan state-established medical schools, fertility control in the Qing, and the search for sexual potency in the People's Republic. The two final chapters illustrate Chinese healing modalities across the globe and address the challenges they have posed as alternatives to biomedical standards of training and licensure. The discussion includes such far-reaching examples as Chinese treatments for diphtheria in colonial Australia and malaria in Africa, the invention of ear acupuncture by the French and its worldwide dissemination, and the varying applications of acupuncture from Germany to Argentina and Iraq.

**chinese textbook pdf: Learning and Teaching Chinese as a First Language** Sin Manw Sophia Lam, John Chi-Kin Lee, Chung Mou Si, 2024-06-28 In this book, the authors embark on a critical investigation of the complex field of Chinese language education, with a particular focus on exploring new trends and teaching and learning. They delve into the intricacies of language, education and its effectiveness in teaching Chinese as a first language. The book has three objectives: establishing a field of study in Chinese language learning and teaching, providing critical discussion and progressive insights on language education, and offering relevant pedagogical perspectives of learning and teaching Chinese as L1 and L2. The chapters investigate learning and teaching of Chinese in different aspects, including four skills, culture, literature, technology-assisted learning, and learners' identity. By focusing on the teaching practices of Chinese at different levels, it sheds light on teaching Chinese as a first language. Theoretically, it broadens the linguistic and geographical reach of previous works on language education that mainly examine English as a lingua franca or children's first language acquisition. Drawing upon theories in language learning, the book demonstrates the applicability of language theories in the first language and Chinese as a non-alphabetic language and examines the impact and effectiveness of some theories in Chinese learning and teaching. Academic researchers, teacher educators, teachers and students interested in Chinese language and education will find this a highly relevant text for its focus on curriculum, pedagogy and assessment of teaching Chinese as a first language.

**chinese textbook pdf: Ideology and Hegemony of English Foreign Language Textbooks**  
Ömer Gökhan Ulum, Dinçay Köksal, 2020-01-27 This volume investigates ideological and hegemonic practices in globally and locally written English as a Foreign Language (EFL) textbooks, and explores whether these textbooks reflect the values, beliefs and norms of the native-speaker society by examining their ideological components and the hegemonic practices by means of which the source society or state seeks to influence learners of the language. It also attempts to clarify EFL teachers' and students' views on the underlying ideology and hegemonic practices in globally and locally written EFL textbooks. Studies on the relationship between ideology, hegemony and textbooks in applied linguistics have become more prevalent in recent decades, as the emergence of critical theory, critical pedagogy, and critical thinking skills from the 1920s onwards has led scholars to adopt a more critical perspective towards EFL textbooks, especially with regard to elements of ideology and hegemony. These two terms encompass a plethora of components, ranging from nationalism to religion. At the same time, the importance of metanarratives originating from the tenets of modernism has declined from the 1960s onwards, the assumption being that the world has entered a new age called postmodernism and post-structuralism that emphasizes the role of individuals and rejects efforts to reinforce post-colonialism, the effects of which can be seen in EFL textbooks. Accordingly, taking the elements of ideology and hegemony into account remains a vital aspect in the analysis of EFL textbooks.
