**coming of age in mississippi chapter summary: Troubling the Waters** Cheryl Lynn Greenberg, 2010-03-15 Was there ever really a black-Jewish alliance in twentieth-century America? And if there was, what happened to it? In *Troubling the Waters*, Cheryl Greenberg answers these questions more definitively than they have ever been answered before, drawing the richest portrait yet of what was less an alliance than a tumultuous political engagement--but one that energized the civil rights revolution, shaped the agenda of liberalism, and affected the course of American politics as a whole. Drawing on extensive new research in the archives of organizations such as the NAACP and the Anti-Defamation League, Greenberg shows that a special black-Jewish political relationship did indeed exist, especially from the 1940s to the mid-1960s--its so-called golden era--and that this engagement galvanized and broadened the civil rights movement. But even during this heyday, she demonstrates, the black-Jewish relationship was anything but inevitable or untroubled. Rather, cooperation and conflict coexisted throughout, with tensions caused by economic clashes, ideological disagreements, Jewish racism, and black anti-Semitism, as well as differences in class and the intensity of discrimination faced by each group. These tensions make the rise of the relationship all the more surprising--and its decline easier to understand. Tracing the growth, peak, and deterioration of black-Jewish engagement over the course of the twentieth century, Greenberg shows that the history of this relationship is very much the history of American liberalism--neither as golden in its best years nor as absolute in its collapse as commonly thought.

**coming of age in mississippi chapter summary:** Intolerant Bodies Warwick Anderson, Ian R. Mackay, 2014-11-15 A history of autoimmunity that validates the experience of patients while challenging assumptions about the distinction between the normal and the pathological. Winner of the NSW Premier's History Award of the Arts NSW Autoimmune diseases, which affect 5 to 10 percent of the population, are as unpredictable in their course as they are paradoxical in their cause. They produce persistent suffering as they follow a drawn-out, often lifelong, pattern of remission and recurrence. Multiple sclerosis, lupus, rheumatoid arthritis, and type 1 diabetes—the diseases considered in this book—are but a handful of the conditions that can develop when the immune system goes awry. *Intolerant Bodies* is a unique collaboration between Ian Mackay, one of the prominent founders of clinical immunology, and Warwick Anderson, a leading historian of twentieth-century biomedical science. The authors narrate the changing scientific understanding of the cause of autoimmunity and explore the significance of having a disease in which one's body turns on itself. The book unfolds as a biography of a relatively new concept of pathogenesis, one that was accepted only in the 1950s. In their description of the onset, symptoms, and course of autoimmune diseases, Anderson and Mackay quote from the writings of Charles Dickens, Edgar Allan Poe, Joseph

Heller, Flannery O'Connor, and other famous people who commented on or grappled with autoimmune disease. The authors also assess the work of the dedicated researchers and physicians who have struggled to understand the mysteries of autoimmunity. Connecting laboratory research, clinical medicine, social theory, and lived experience, *Intolerant Bodies* reveals how doctors and patients have come to terms, often reluctantly, with this novel and puzzling mechanism of disease causation.

**coming of age in mississippi chapter summary: Spirituals** Kathleen A. Abromeit, 2015-01-01 Spirituals originated among enslaved Africans in America during the colonial era. They resonate throughout African American history from that time to the civil rights movement, from the cotton fields to the concert stage, and influenced everything from gospel music to blues and rap. They have offered solace in times of suffering, served as clandestine signals on the Underground Railroad, and been a source of celebration and religious inspiration. Spirituals are born from the womb of African American experience, yet they transcend national, disciplinary, and linguistic boundaries as they connect music, theology, literature and poetry, history, society, and education. In doing so, they reach every aspect of human experience. To make sense of the immense impact spirituals have made on music, culture, and society, this bibliography cites writings from a multidisciplinary perspective. This annotated bibliography documents articles, books, and dissertations published since 1902. Of those, 150 are books; 80 are chapters within books; 615 are journal articles, and 150 are dissertations, along with a selection of highly significant items published before 1920. The most recent publications included date from early 2014. Disciplines researched include music, literature and poetry, American history, religion, and African American Studies. Items included in the annotated bibliography are limited to English-language sources that were published in the United States and focus on African American spirituals in the United States, but there are a few select citations that focus on spirituals outside of the United States. Of the one thousand annotations, they are divided, roughly evenly, between: general studies and geographical studies; information about early spirituals; use of spirituals in art music, church music, and popular music; composers who based music on spirituals; performers of spirituals (ensembles and individuals); Bible, theology, and religious education; literature and poetry; pedagogical considerations, including the teaching of spirituals as well as prominent educators; reference works and a list of resources that were unavailable for review but are potentially useful. This book also offers considerable depth on particular topics such as the Fisk Jubilee Singers and William Grant Still with over thirty citations devoted to each. At the same time, materials included are quite diverse, with topics such as spirituals in Zora Neale Hurston's novels; bible studies based on spirituals; enriching the teaching of geography through spirituals; Marian Anderson's historic concert at the Lincoln Memorial; spiritual roots of rap; teaching dialect to singers; expressing African American religion in spirituals; Samuel Coleridge-Taylor's music; slave tradition of singing among the Gullah. The book contains indices by author, subject, and spiritual title. Additionally, an appendix of spirituals by biblical reference, listing both spiritual title to scriptural reference as well as scripture to spiritual title is included. T. L. Collins, Christian educator, compiled the appendix.

**coming of age in mississippi chapter summary: Hot** Mark Hertsgaard, 2018-04-01 An informative and vividly reported book that goes beyond the politics of climate change to explore practical ways we can adapt and survive ( San Francisco Chronicle). Journalist Mark Hertsgaard has reported on global warming for outlets including the New Yorker, NPR, Time, and Vanity Fair. But it was only after he became a father that he started thinking about the two billion young people worldwide who will spend the rest of their lives coping with mounting climate disruption. In *Hot*, he presents a well-researched blueprint for how all of us—parents, communities, companies, and countries—can navigate this unavoidable new era. Reporting from across the nation and around the world, Hertsgaard provides examples of ambitious attempts to mitigate the effects of sea-level rise, mega-storms, famine, and other threats—and an urgent message . . . that citizens and governments cannot afford to ignore ( The Boston Globe). This readable, passionate book is surprisingly

optimistic: Seattle, Chicago, and New York are making long-term, comprehensive plans for flooding and drought. Impoverished farmers in the already drought-stricken African Sahel have discovered how to substantially improve yields and decrease malnutrition by growing trees among their crops, and the technique has spread across the region; Bangladeshis, some of the poorest and most flood-vulnerable yet resilient people on earth, are developing imaginative innovations such as weaving floating gardens from water hyacinth that lift with rising water. Contrasting the Netherlands' 200-year flood plans to the New Orleans Katrina disaster, Hertsgaard points out that social structures, even more than technology, will determine success, and persuasively argues that human survival depends on bottom-up, citizen-driven government action. — Publishers Weekly His analysis of the impact of global warming on industries as different as winemaking and insurance is intriguing, and his well-supported conclusion that social change can beat back climate change is inspiring . . . an exceptionally productive approach to a confounding reality. — Booklist This is an important book. —Bill McKibben
