Baruch chapters 4-5 in the following successive steps. The first step is a structural analysis of the three different units of the chapters, 4:5-29; 4:30-5:6; 5:7-9, during which the structure of the greater units (strophes, cantos) will be investigated, together with the structural relationship of these units with each other. After this, the biblical background of the passages is explored. The Scriptural passages that prove to be authoritative or influential for the author(s) of the Baruch passages give clues as to the particular interest and intention of the author(s). This step is supplemented by an inquiry into the tradition historical background of the prophetic psalms. Finally, I close this short monograph with some basic comments on several formative issues of Baruch 4:5-5:9. The book is written for the interest of scholars of Second Temple Judaism, biblical interpretation, and the effective history of Scripture.

evski: Hugging the Shore John Updike, 2013-01-15 WINNER OF THE NATIONAL BOOK CRITICS CIRCLE AWARD "Writing criticism is to writing fiction and poetry as hugging the shore is to sailing in the open sea," writes John Updike in his Foreword to this collection of literary considerations. But the sailor doth protest too much: This collection begins somewhere near deep water, with a flotilla of short fiction, humor pieces, and personal essays, and even the least of the reviews here—those that "come about and draw even closer to the land with another nine-point quotation"—are distinguished by a novelist's style, insight, and accuracy, not just surface sparkle. Indeed, as James Atlas commented, the most substantial critical articles, on Melville, Hawthorne, and Whitman, go out as far as Updike's fiction: They are "the sort of ambitious scholarly reappraisal not seen in this country since the death of Edmund Wilson." With *Hugging the Shore*, Michiko Kakutani wrote, Updike established himself "as a major and enduring critical voice; indeed, as the pre-eminent critic of his generation."

evski: Greek Diaspora and Migration since 1700 Dimitris Tziouvas, 2016-04-22 The Greek diaspora is one of the paradigmatic historical diasporas. Though some trace its origins to ancient Greek colonies, it is really a more modern phenomenon. Diaspora, exile and immigration represent three successive phases in Modern Greek history and they are useful vantage points from which to analyse changes in Greek society, politics and culture over the last three centuries. Embracing a wide range of case studies, this volume charts the role of territorial displacements as social and cultural agents from the eighteenth century to the present day and examines their impact on communities, politics, institutional attitudes and culture. By studying migratory trends the aim is to map out the transformation of Greece from a largely homogenous society with a high proportion of emigrants to a more diverse society inundated by immigrants after the end of the Cold War. The originality of this book lies in the bringing together of diaspora, exile and immigration and its focus on developments both inside and outside Greece.

evski: Christian Apocrypha Jean-Michel Rössli, Tobias Nicklas, 2014-07-16 In very different ways the writings of the New Testament have shaped cultures until today. The *Novum Testamentum Patristicum* project will give a full documentation of ancient Christian receptions of the New Testament in late antiquity. This volume focuses on the different mainly narrative receptions of New Testament texts in ancient Christian apocryphal literature. While it has been accepted for a long time that apocryphal writings mainly wanted to fill the gaps of New Testament texts in more or less fantastic ways, the articles in this volume discover a rich and very different variety of re-writings, relectures, and receptions of New Testament texts, motifs and ideas.

Here are trenchant appreciations of fiction by, among many others, Austen, Balzac, Dickens, Tolstoy, James, Conrad, Lawrence, Le Guin, and Sebald. evski: [Social Media at BBC News](#) Valerie Belair-Gagnon, 2015-02-11 Since the emergence of social media in the journalistic landscape, the BBC has sought to produce reporting more connected to its audience while retaining its authority as a public broadcaster in crisis reporting. Using empirical analysis of crisis news production at the BBC, this book shows that the emergence of social media at the BBC and the need to manage this kind of material led to a new media logic in which tech-savvy journalists take on a new centrality in the newsroom. In this changed context, the politico-economic and socio-cultural logic have led to a more connected newsroom involving this new breed of journalists and BBC audience. This examination of news production events shows that in the midst of transformations in journalistic practices and norms, including newsgathering, sourcing, distribution and impartiality, the BBC has reasserted its authority as a public broadcaster.
