portrayal of the hardships faced by an undocumented family navigating the medical and educational systems in the United States. Claudia Garcia crossed the border because her toddler, Natalia, could not hear. Leaving behind everything she knew in Mexico, Claudia recounts the terror of migrating alone with her toddler and the incredible challenges she faced advocating for her daughter's health in the United States. When she arrived in Texas, Claudia discovered that being undocumented would mean more than just an immigration status—it would be a way of living, of mothering, and of being discarded by even those institutions we count on to care. Elizabeth Farfán-Santos spent five years with Claudia. As she listened to Claudia's experiences, she recalled her own mother's story, another life molded by migration, the US-Mexico border, and the quest for a healthy future on either side. Witnessing Claudia's struggles with doctors and teachers, we see how the education and medical systems enforce undocumented status and perpetuate disability. At one point, in the midst of advocating for her daughter, Claudia suddenly finds herself struck by debilitating pain. Claudia is lifted up by her comadres, sent to the doctor, and reminded why she must care for herself. A braided narrative that speaks to the power of stories for creating connection, this book reveals what remains undocumented in the motherhood of Mexican women who find themselves making impossible decisions and multiple sacrifices as they build a future for their families.

In this volume, Nuila follows the lives of five uninsured Houstonians as their struggle for survival leads them to a hospital where insurance comes second to genuine care. Each patient eventually lands at Ben Taub, the county hospital where Dr. Nuila has worked for over a decade. Nuila delves with empathy into the experiences of his patients, braiding their dramas into a singular narrative that contradicts the established idea that the only way to receive good healthcare is with good insurance. As readers follow twists and turns in each patient's story, it's impossible to deny that our system is broken--and that Ben Taub's innovative model, which emphasizes people over payments, could help light the path forward--Provided by publisher.

harris gold card: Sound Mind, Sound Body Kenneth R. Pelletier, 1995-06 In this dramatic new approach to understanding personal health, Dr. Pelletier shows how lifelong good health is far more dependent on a positive, purposeful life orientation than on aerobic workouts and rigid low-fat diets. He challenges the medical community's long-accepted focus on the disease model and proposes a positive new health paradigm. Sound Mind, Sound Body examines the lives of people who are rarely ill, who manage aging successfully, or who cope extremely well with both acute and chronic illness -- and describes how they do it. Among Dr. Pelletier's fascinating findings: -- People who overcome serious illness or physical trauma in childhood are often actually strengthened -- not debilitated -- by the experience. -- People who enjoy a sense of belonging and a real connection with others generally pass through periods of intense stress and remain untouched by illness. -- Altruistic work is closely related to the ability to overcome life-threatening crises and disease. -- There is a healthy way of being ill, which can help a person manage such chronic problems as arthritis and heart disease. In addition, Sound Mind, Sound Body offers practical, effective techniques to help anyone achieve physical, mental, and emotional equilibrium and enjoy a lifetime of optimal health.
