hatchet answer key: *The Architecture of the Language Faculty* Ray Jackendoff, 1997 Ray Jackendoff steps back to survey the broader theoretical landscape in linguistics, in an attempt to identify some of the sources of the widely perceived malaise with respect to much current theorizing. Over the past twenty-five years, Ray Jackendoff has investigated many complex issues in syntax, semantics, and the relation of language to other cognitive domains. He steps back in this new book to survey the broader theoretical landscape in linguistics, in an attempt to identify some of the sources of the widely perceived malaise with respect to much current theorizing. Starting from the Minimalist necessity for interfaces of the grammar with sound, meaning, and the lexicon, Jackendoff examines many standard assumptions of generative grammar that in retrospect may be seen as the product of historical accident. He then develops alternatives more congenial to contemporary understanding of linguistic phenomena. *The Architecture of the Language Faculty* seeks to situate the language capacity in a more general theory of mental representations and to connect the theory of grammar with processing. To this end, Jackendoff works out an architecture that generates multiple co-constraining structures, and he embeds this proposal in a version of the modularity hypothesis called Representational Modularity. Jackendoff carefully articulates the nature of lexical insertion and the content of lexical entries, including idioms and productive affixes. The resulting organization of the grammar is compatible with many different technical realizations, which he shows can be instantiated in terms of a variety of current theoretical frameworks. When the death of her parents leaves her too destitute to pursue her academic career and she receives a letter from a distant relative on Great Misery Island, Marigold decides she must do what any person of superior sense and greater-than-average curiosity would: she mounts her trusty bicycle and heads up the craggy, fog-shrouded coast of New England for a date with fate. Marigold spies a body floating in the stormy waters surrounding the island, and her suspicions immediately turn to her hostile, weapon-wielding relatives when one of the local girls turns up missing. And she might not be the only one. When another dead body is found in the garden of the estate, Marigold finds herself accused. She must enlist the help of an eccentric, colorful cast of friends and found family to save herself—and everything she holds dear.
