

house tree person test scoring manual

House Tree Person Test Scoring Manual is a crucial resource for psychologists and mental health professionals who administer this projective psychological test. The House Tree Person (HTP) test is designed to assess an individual's emotional functioning, personality traits, and interpersonal relationships through their drawings of a house, a tree, and a person. Scoring and interpreting these drawings requires a comprehensive understanding of the test's principles, techniques, and the psychological theories that underpin it. This article will delve into the key components of the HTP test scoring manual, offering insights into its structure, scoring criteria, and interpretative framework.

Understanding the House Tree Person Test

The HTP test was developed by John N. Buck in the 1940s. It is a projective test, meaning it encourages individuals to project their feelings, thoughts, and experiences onto the drawings they create.

Components of the HTP Test

The test consists of three main components:

1. House: Represents the individual's environment, family life, and personal security.
2. Tree: Symbolizes the individual's growth, stability, and emotional resilience.
3. Person: Reflects the individual's self-image, relationships, and social interactions.

Each of these components provides unique insights into the individual's psyche, and together they paint a comprehensive picture of their emotional and psychological state.

Scoring the HTP Test

The scoring manual for the HTP test provides detailed guidelines on how to evaluate the drawings. Proper scoring is essential for accurate interpretation and understanding of the individual's psychological profile.

General Scoring Guidelines

When scoring the HTP test, professionals should consider the following aspects:

- Content: What is depicted in the drawings? Are there any notable symbols or motifs?
- Form: How are the drawings executed? Consider the size, proportions, and details.
- Color: The use of color can signify different emotional states. For instance, vibrant colors might indicate positive feelings, while darker shades may suggest negativity or depression.

- Placement: Where elements are positioned on the page can provide insights into the individual's thought processes and priorities.
- Overall Impression: The subjective feeling the drawings evoke can also be a valuable insight into the individual's emotional state.

Specific Scoring Criteria

The scoring manual includes specific criteria for each component of the HTP test. Here's a breakdown of what to look for:

House Drawing

- Structure: Is the house drawn with stability (e.g., a solid roof, strong walls) or is it more chaotic?
- Doors and Windows: Are they present, open, or closed? Open doors can indicate openness to others, while closed doors may suggest isolation.
- Details: Are there any additional features, such as a fence or garden? These may represent boundaries or personal interests.

Tree Drawing

- Roots: Well-defined roots may signify stability and strong foundations, while absent or weak roots can indicate insecurity.
- Trunk: The trunk's thickness and strength can represent the individual's confidence and resilience.
- Branches and Leaves: These elements can indicate growth and aspirations. Sparse branches may suggest limited emotional development.

Person Drawing

- Proportions: Are the features exaggerated or minimized? This can indicate self-perception and self-esteem.
- Facial Expression: The emotional expression can provide insight into how the individual feels about themselves and their interactions with others.
- Clothing and Accessories: These can reflect social identity and personal values.

Interpreting the Results

Once scoring is completed, the next step is interpretation. This should be done with caution and should take into account the individual's background, current circumstances, and any other psychological assessments they may have undergone.

Combining Scores for Insights

- Integrative Approach: It's essential to consider the scores from all three components together. For instance, a strong house drawing combined with a weak tree may indicate a secure home environment but a lack of personal growth.
- Patterns: Look for recurring themes or patterns across the drawings. These can be indicative of underlying issues or strengths.

Common Interpretations

- Positive Indicators: A well-structured house, a sturdy tree, and a smiling person typically suggest a healthy emotional state and positive self-image.
- Red Flags: Drawings that depict isolation, instability, or lack of detail may warrant further exploration and discussion with the individual.

Application of the HTP Test in Clinical Practice

The HTP test is widely used in various settings, including clinical psychology, counseling, and educational assessments.

Clinical Use

- Therapeutic Insights: The drawings can reveal areas of concern that may not be easily expressed verbally, making them a valuable tool in therapy.
- Assessment of Progress: Re-administering the HTP test over time can help track changes in the individual's emotional and psychological state.

Educational Use

- Student Assessments: Educators can use the HTP test to gain insights into students' emotional well-being, helping to identify those who may need additional support.
- Career Counseling: Understanding a student's personality and emotional landscape can assist in guiding them towards suitable career paths.

Conclusion

The **House Tree Person Test Scoring Manual** serves as an essential guide for practitioners seeking to understand and interpret the nuanced drawings created by individuals. By employing structured scoring criteria and a comprehensive interpretative framework, mental health professionals can unlock valuable insights into their clients' emotional and psychological states. The HTP test not only enriches the understanding of an individual's personality but also fosters deeper therapeutic relationships, paving the way for more effective interventions and positive outcomes. As with any psychological assessment, it is important for practitioners to remain aware of the limitations

of the HTP test and to use it as part of a broader assessment strategy that includes clinical interviews and other evaluation tools.

Frequently Asked Questions

What is the House-Tree-Person (HTP) test used for?

The HTP test is a projective psychological assessment tool used to evaluate a person's personality, emotional functioning, and interpersonal relationships through their drawings of a house, a tree, and a person.

How is the scoring for the House-Tree-Person test typically conducted?

Scoring is usually based on qualitative and quantitative analysis of the drawings, focusing on aspects such as size, placement, detail, and emotional expression in the artwork, as well as the narrative provided by the subject.

What are some key elements to look for in the 'house' drawing during scoring?

In the 'house' drawing, evaluators typically look for features like the roof type, windows, doors, and overall structure, which can indicate the individual's feelings about safety, security, and home life.

What might a large tree drawing signify in the HTP test?

A large tree may suggest a strong sense of self, growth, and stability, whereas a small or barren tree could indicate feelings of insecurity, lack of support, or emotional challenges.

How does the person's drawing contribute to the overall assessment in the HTP test?

The person's drawing provides insight into self-image and interpersonal dynamics, with aspects such as the figure's size, position, and facial expression reflecting the subject's self-esteem and social relationships.

Why is it important for practitioners to be trained in the HTP scoring manual?

Proper training in the HTP scoring manual ensures that practitioners can accurately interpret the drawings and underlying psychological themes, leading to more reliable assessments and effective therapeutic interventions.

House Tree Person Test Scoring Manual

house tree person test scoring manual: Handbook of Personality Assessment Irving B. Weiner, Roger L. Greene, 2011-01-31 This comprehensive, balanced guide to personality assessment, written by two of the foremost experts in the field, is sure to become the gold standard of texts on this topic. The Handbook of Personality Assessment covers everything from the basics, including a historic overview and detailed discussion of the assessment process and its psychometric foundations, to valuable sections on conducting the assessment interview and the nature, interpretation, and applications of the most popular self-report (objective) and performance-based (projective) measures. A concluding section of special topics such as computerized assessment, ethical and legal issues, and report writing are unique to this text.

house tree person test scoring manual: Casualties Of Childhood Bobbie Kaufman, Agnes Wohl, 2013-05-24 Against the backdrop of powerful case vignettes and their accompanying House, Tree, Person and Kinetic Family Drawings, the discussion focuses primarily on the essential link between childhood sexual abuse and specific developmental problems. Given that sexual abuse is commonly directed toward latency-age young people, it is imperative that this connection be given greater emphasis in the literature. The book represents an important step in that direction. In sum, the authors bring to life the full dimension of sexual victimization, its meaning and consequences for the individual, the family, and by extension, the society. For therapists of all persuasions, it is a much-needed resource.

house tree person test scoring manual: Interpreting Projective Drawings Marvin Leibowitz, 2013-06-17 The use of drawings to discover emotions, attitudes, and personality traits not verbally stated by a client is a valuable and widely used technique in psychoanalysis and psychotherapy. In this book, the author offers a highly practical introduction to the use and interpretation of projective drawings. Grounding his approach in self psychology, Dr. Leibowitz provides detailed information on how to interpret house, tree, man, woman, and animal drawings. By pairing clinical case examples with general interpretation guidelines, the book offers a thorough examination of projective drawings, making it a valuable text for beginners and an important reference source for the seasoned clinician. Interpreting Projective Drawings contains an impressive array of drawings, with over 175 total illustrations. Almost half of these drawings are from comprehensive case studies that follow adult patients from the beginning phase of treatment to their one-year (or more) status. These include over 30 chromatic illustrations that clearly demonstrate the importance of color in projective drawing interpretation. In addition to detailed information on how to interpret these five types of achromatic and chromatic drawings, the book also contains an appendix that offers examiner instructions, instructions for self-administration, and adjective lists to aid in interpretation. Together, these components make Interpreting Projective Drawings an essential resource for any mental health professional interested in using drawings to their fullest effect in their practice.

house tree person test scoring manual: A Cross-Cultural Psychological Assessment Manual Alan Raphael, R. Lauren Miller, Theresa Jones, Charles Golden, 2023-07-11 This user-friendly manual provides a cross-cultural psychological assessment battery, including projective methods. Authors outline a new, empirically validated, reliable system, which seeks to update the scoreable and interpretable factors and entwine commonly respected “tried and true” graphomotor tests, thereby maximizing their efficacy in the assessment of significant psychological traits in children and adults. Because of its use as a gender fair, culture free, language free testing method, it will be a valuable asset in all areas of current psychological assessment. The CCPAB test takes approximately 20 to 40 minutes to administer, and does not require any administration materials that most practitioners would not have readily available. The CCPAB can be used by evaluators on its own or in conjunction with other psychological and neuropsychological test data, as well as by mental health treatment providers seeking a quick and accurate way to assess the psychological

functioning of individuals aged six years and older. Multiple appendices contain information on scoring criteria, scoring keys, and a wealth of sample questions which will also be a useful resource for evaluators. This manual is appropriate for users ranging from graduate-level students in training and supervision to even the most skilled assessment psychologists for quick and valid assessment of a wide range of clients.

house tree person test scoring manual: Handbook of Nonverbal Assessment R. Steve McCallum, 2017-02-21 The second edition of this comprehensive volume presents methods for nonverbal assessment of diverse individuals, such as persons with speech or hearing deficits, limited English skills, or emotional problems. Chapters provide a contemporary context for nonverbal evaluations, accompanied by descriptions of best practices in detecting bias in cognitive tests, multicultural assessment, cross-battery assessment of nonverbal cognitive ability, and psychological and physiological influences on assessment. The book discusses nonverbal assessment of cognition and intelligence as well as related domains, such as academic skills, neurocognitive functioning, personality, and behavior issues. Guidelines for using common nonverbal assessment tools and strategies feature the most up-to-date information on administration and scoring, psychometric properties, and strengths and limitations. Best practices for testing diverse children and adults and using reliable, valid, and fair assessment instruments are emphasized throughout the book. Featured instruments in the Handbook include: The Universal Nonverbal Intelligence Test, Second Edition (UNIT2). The newest version of the Leiter International Performance Scale (Leiter-3). The Wechsler Nonverbal Scale of Ability (WNV). The Comprehensive Test of Nonverbal Intelligence, Second Edition (CTONI-2). The Test of Nonverbal Intelligence. The General Ability Measure for Adults (GAMA). The Second Edition of the Handbook of Nonverbal Assessment is a must-have resource for researchers and graduate students in school and clinical child psychology, speech and language pathology, educational technology, social work, and related disciplines as well as clinicians, professionals, and in-service educators of diverse students.

house tree person test scoring manual: Handbook on Optimizing Patient Care in Psychiatry Amresh Shrivastava, Avinash De Sousa, Nilesh Shah, 2022-11-21 This handbook examines current mental health research, challenges in patient care, and advances in clinical psychiatry with the aim of improving approaches toward the screening of at-risk individuals, facilitating access to care, and supervising rehabilitation. Combining evidence-based research with clinical case studies, international experts provide detailed, holistic insights into our understanding of mental disorders through biological, social, interpersonal, and economical lenses. Models of intervention, prevention, and treatment are provided, along with methods for continued care and patient advocacy. Finally, experts analyze the future of psychiatric research and mental health care. Readers will gain greater understanding of the finer nuances of handling psychiatric cases and a holistic perspective of optimizing patient care within this field. This innovative book contributes to the development of community management of various psychiatric disorders and will be of interest to case managers, mental health workers, doctors, nurses, and many more.

house tree person test scoring manual: Drawings in Assessment and Psychotherapy Leonard Handler, Antoinette D. Thomas, 2013-11-20 Drawing is a language, projected by children and adults, reflecting their joy and pain. It is used extensively by clinical psychologists, art therapists, social workers, and other mental health professionals in the assessment and treatment of children, adolescents, adults, and couples. This book brings together a renowned group of professionals to analyze the research and application of the most popular assessment and treatment tools. Tests discussed include the Draw-a-Person Test, the House-Tree-Person Test, the Kinetic Family Drawing Test, the Art Therapy-Projective Imagery Assessment, and the Wartegg Drawing Completion Test. Working with sexually and physically abused children, assessing clients with anorexia nervosa, and the influence of osteopathic treatment on drawings are some of the special topics considered. Numerous case studies are also included.

house tree person test scoring manual: Handbook of Clinical Child Psychology C. Eugene Walker, Michael C. Roberts, 2001-01-30 The increasing focus on children's welfare has given rise to

tremendous growth in the field of child psychology, and the past decade has witnessed significant advances in research in this area.

house tree person test scoring manual: *Teaching and Learning Personality Assessment* Leonard Handler, Mark J. Hilsenroth, Mark Hilsenroth, 2013-06-17 How do we move from an understanding of the administration, scoring, and interpretation of responses on various personality assessment instruments to the ability to put our understanding into words and communicate it effectively to referral agents and to patients themselves? And how do we transmit that ability to students? *Teaching and Learning Personality Assessment* strives to fill a gap in the literature and in many training programs. The editors have assembled a group of renowned clinicians, noted not only for their own acumen in personality assessment but also for their teaching talent, who present in detail time-tested techniques for teaching assessment. Readers have the opportunity to sit beside these seasoned mentors and learn their special skills. Numerous examples illustrate the key concepts. For every instructor of personality assessment who has ever pondered ways to organize a course or to convey difficult material, and for every student who has worried about how to translate theory into practice, in the context of a course or on his or her own, this book will offer enlightenment and provide uniquely practical assistance. It will be important reading for psychologists and trainees at every level of experience. Its clear style, vivid anecdotes, frank discussion of disagreements in the field, and innovative ideas make it an excellent text for both introductory and advanced courses.

house tree person test scoring manual: *The House-tree-person Technique* John N. Buck, 1966

house tree person test scoring manual: *Assessment in the Creative Arts Therapies* Stephen Snow, 2009

house tree person test scoring manual: *The Assessment of Child and Adolescent Personality* Howard M. Knoff, 2002-12-31 Now available in paper for the first time, this volume brings together leading contributors to provide a comprehensive review of theory, research, and practice in child and adolescent personality assessment. Organized for easy reference, the book is divided into four parts. Part I summarizes basic theories, issues, and concepts, setting forth a framework for assessment as a hypothesis-generating, problem-solving process. Part II describes and evaluates a wide range of relevant approaches, tests, and techniques, marshaling the available data and reviewing administration procedures, scoring, and interpretation. In Part III, the process by which personality assessment is translated into effective intervention strategies and programs for children is examined in depth. A summary of major perspectives and recommended practices is presented in Part IV, which also considers future needs and directions for the field.

house tree person test scoring manual: *Visual Acuity of Children, United States* Jean Roberts, Kenneth R. Duyan, 1970

house tree person test scoring manual: *Psychological Assessment in South Africa* Sumaya Laher, Kate Cockcroft, 2013-01-01 This book provides an overview of the research related to psychological assessment across South Africa. The thirty-six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field. Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments. *Psychological Assessment in South Africa* provides in-depth coverage of a range of areas within the broad field of psychological assessment, including research conducted with various psychological instruments. The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment. The book therefore has the potential to function both as an academic text for graduate students, as well as a specialist resource for professionals, including psychologists, psychometrists, remedial teachers and human resource practitioners.

house tree person test scoring manual: *Children Draw And Tell* Marvin Klepsch, Laura Logie, 2014-05-22 First published in 1988. Child therapists have long been fascinated by children's

human figure drawings and what they reveal about self-image, feelings, and family relationships. Now this comprehensively researched volume provides a valuable introduction to using children's human figure drawings as projective measures in a variety of settings. The principles for interpreting drawings, as well as general and specific indicators, are illustrated in 85 children's drawings. Part I on The Theory deals with the background of projective psychology, discussing art as a projective technique and emphasizing that all behavior, including drawings, reflects personality, attitudes and values. The authors examine the major methods of obtaining diagnostic information and recommend the use of several methods for best results. Part II on The Application examines in detail the projective use of children's human figure drawings to evaluate personality, relationships (particularly in families), group values, and attitudes. In each area, research is presented, directions for administration of various tests are given, and guidelines for interpretation are offered. Significant factors are revealed in numerous children's drawings, accompanied by clinical comments. Of special interest is the presentation of original research on group values among Canadian Indian (Saskatchewan Cree) children and on attitudes of young children toward teachers, doctors and other authority figures as revealed in human figure drawings. For psychologists, social workers, teachers and other child-care professionals, as well as students in these fields, this is an indispensable basic guide to interpreting human figure drawings.

house tree person test scoring manual: Minority and Cross-cultural Aspects of Neuropsychological Assessment F.R. Ferraro, 2002-01-01 Minority and Cross-Cultural Neuropsychological Assessment pulls together neuropsychological assessment issues across a wide range of minority groups and populations currently underserved. Included are chapters related to African-Americans, Asian/Pacific Islanders, Hispanic/Latinos, Native Americans, and Rural Populations. Some minority groups have not been as widely studied or examined as other groups from a neuropsychological assessment perspective. This book will fill this obvious void. Other chapters are devoted to traditions and trends in clinical neuropsychology, and there is a section that examines the future of minority and cross-cultural issues in neuropsychological assessment. The current literature regarding minority and cross-cultural issues in neuropsychological assessment is quite scattered and it is the goal of this book to provide a more thorough review and refinement of the issues presented.

house tree person test scoring manual: Handbook of Pediatric Neuropsychology Andrew S. Davis, 2010-10-25 By far, the most comprehensive and detailed coverage of pediatric neuropsychology available in a single book today, Davis provides coverage of basic principles of pediatric neuropsychology, but overall the work highlights applications to daily practice and special problems encountered by the pediatric neuropsychologist. Cecil R. Reynolds, PhD Texas A&M University The breadth and depth of this body of work is impressive. Chapters written by some of the best researchers and authors in the field of pediatric neuropsychology address every possible perspective on brain-behavior relationships culminating in an encyclopedic text. This [book] reflects how far and wide pediatric neuropsychology has come in the past 20 years and the promise of how far it will go in the next. Elaine Fletcher-Janzen, EdD, NCSP, ABPdN The Chicago School of Professional Psychology ...it would be hard to imagine a clinical situation in pediatric neuropsychology in which this book would fail as a valuable resource.--Archives of Clinical Neuropsychology I believe there is much to recommend this hefty volume. It is a solid reference that I can see appreciating as a resource as I update my training bibliography.--Journal of the International Neuropsychological Society This landmark reference covers all aspects of pediatric neuropsychology from a research-based perspective, while presenting an applied focus with practical suggestions and guidelines for clinical practice. Useful both as a training manual for graduate students and as a comprehensive reference for experienced practitioners, it is an essential resource for those dealing with a pediatric population. This handbook provides an extensive overview of the most common medical conditions that neuropsychologists encounter while dealing with pediatric populations. It also discusses school-based issues such as special education law, consulting with school staff, and reintegrating children back into mainstream schools. It contains

over 100 well-respected authors who are leading researchers in their respective fields. Additionally, each of the 95 chapters includes an up-to-date review of available research, resulting in the most comprehensive text on pediatric neuropsychology available in a single volume. Key Features: Provides thorough information on understanding functional neuroanatomy and development, and on using functional neuroimaging Highlights clinical practice issues, such as legal and ethical decision-making, dealing with child abuse and neglect, and working with school staff Describes a variety of professional issues that neuropsychologists must confront during their daily practice, such as ethics, multiculturalism, child abuse, forensics, and psychopharmacology

house tree person test scoring manual: Advances in the House-tree-person Technique
John N. Buck, Emanuel Frederick Hammer, 1969

house tree person test scoring manual: Handbook of Psychological and Educational Assessment of Children Cecil R. Reynolds, Randy W. Kamphaus, 2018-10-16 The two volumes of the Handbook of Psychological and Educational Assessment of Children, Second Edition, cover all aspects of child and adolescent assessment. Leading clinical scientists summarize the state of the science of assessment paradigms, instruments, and methods. With an emphasis on practical clinical considerations, chapters also delve into issues related to test development, psychometrics, and bias. Conveniently designed for reference or text use, this vast knowledge base has been synthesized into two volumes which may be purchased separately or together. INTELLIGENCE, APTITUDE, AND ACHIEVEMENT surveys assessment of intelligence, learning styles, and academic achievement; covers historical issues and psychometric methods; and addresses diversity issues, ethical concerns, and special topics in mental testing. PERSONALITY, BEHAVIOR, AND CONTEXT reviews the use of projective methods, interviewing and observation, and objective methods of assessing personality and behavior; discusses the assessment of specific syndromes and symptoms; and presents tools for assessing adaptive skills and the family context.

house tree person test scoring manual: Tools of the Trade Stephanie L. Brooke, 2004 This new edition with its revised title provides critical reviews of art therapy tests along with some new reviews of assessments and updated research in the field. It is comprehensive in its approach to considering reliability and validity evidence provided by test authors. Additionally, it reviews research on art therapy assessments with a variety of patient populations. The book contains helpful suggestions regarding the application of art therapy assessments. Specific areas covered include individual, group, family, and multicultural assessment techniques. The desirable and undesirable features of a variety of art therapy assessments are deliberated. The book critiques a series of art therapy assessments - from traditional art therapy approaches to current releases. The goal of this work is to assist mental health professionals in selecting assessments that yield reliable and valid clinical information regarding their clients. Of special interest is the author's approach to writing the results of a series of art therapy assessments in an effort to provide a more complete indication of client dynamics and issues. It will be a valuable resource for practitioners who use art therapy as an adjunct or primary therapy, and it will serve to enhance clinical skills, making therapy more effective for each patient who participates in the assessment process.
