As hydraulic systems become more integral to modern machinery, understanding the properties, applications, and benefits of HLP 22 hydraulic oil is essential for engineers, technicians, and operators alike.

What is HLP 22 Hydraulic Oil?

HLP 22 hydraulic oil is a specific grade of hydraulic fluid classified according to the ISO 6743-4 standard. The "HLP" designation stands for "Hydraulic Oil with a high viscosity index and anti-wear properties," while the number "22" indicates its viscosity grade at 40°C. This oil is characterized by its ability to maintain performance over a wide range of temperatures, making it suitable for various operating conditions.

Viscosity and Performance

The viscosity of HLP 22 hydraulic oil is measured at 22 centistokes (cSt) at 40°C. This viscosity level ensures that the oil can flow easily through hydraulic systems while maintaining sufficient thickness to provide adequate lubrication and power transmission. The viscosity index (VI) of HLP 22 is typically high, meaning its viscosity changes minimally with temperature fluctuations, ensuring consistent performance.
