mrea pdf: Das Ende der Antibiotika Rinke van den Brink, 2015-07-02 Seit einigen Jahren gibt es immer mehr Ausbrüche von multiresistenten Bakterien mit manchmal fatalen Folgen für Patienten. Das Rotterdamer Maasstad Krankenhaus, das Klinikum Bremen Mitte, die Uniklinik Leipzig, sie alle hatten mit ernsthaften Ausbrüchen zu kämpfen. In den Niederlanden kam es zu einer Q-Fieber-Epidemie in bis dahin unbekanntem Ausmaß. Deutschland bekam es mit einem bisher einzigartigen EHEC-Ausbruch zu tun. Lange waren Antibiotika das Wundermittel, das mit bakteriellen Infektionen kurzen Prozess machte und die Sterblichkeit bei Infektionskrankheiten drastisch sinken ließ. Inzwischen wird der Nachteil, der diese einzigartigen Mittel begleitet, immer schwerwiegender. Die Anwendung von Antibiotika führt unvermeidlich zu Resistenzen bei Bakterien und damit zur Unwirksamkeit der Antibiotika. In »Das Ende der Antibiotika« spricht Rinke van den Brink mit einer Auswahl von internationalen Experten und befragt sie nach möglichen Lösungen für das weltweite Problem der Antibiotikaresistenzen. Dabei wird eins sehr deutlich: Für die Bekämpfung von Antibiotikaresistenzen benötigt man einen internationalen Ansatz, wie er beispielsweise im EurSafety Health-net, dem euregionalen deutsch-niederländischen Netzwerk für Patientensicherheit und Infektionsschutz, umgesetzt wird (www.eursafety.eu).

Sadorf, 2024-04-04 The role of the rural education leader is complex and demanding, but the rewards of serving in a rural school district are innumerable. Learn how to work through challenges and maximize success in this often overlooked and underresourced field. In the United States, the umbrella term rural education applies to diverse place-based contexts ranging from remote mountain communities to midwestern agricultural areas to southwestern mesas and beyond. One thing these varied environments have in common is the need for creative, solutions-oriented leadership. In *The Resilient Rural Educator*, award-winning superintendent Melissa A. Sadorf draws on her extensive experience teaching and leading in a rural school district in Arizona to identify issues unique to rural education and explore ways to capitalize on local resources to provide the best possible education for all students. Topics Sadorf investigates in depth include the following: • Juggling multiple district roles while maintaining efficiency and effectiveness • Recruiting and retaining staff, teachers, and administrators in a rural area • Connecting students and families with needed services and resources • Solving the challenges of limited access to utilities such as broadband internet • Navigating the role of the rural school as the hub of the community • Managing community partnerships for mutually beneficial results Rural school districts serve approximately one in five students across the United States—students who deserve an equitable education. The insightful, innovative, and comprehensive strategies found in this book will help you and your district deliver that education to them.

Hunt, Simon Miles, 2021-12-15 In *The Reagan Moment*, the ideas, events, strategies, trends, and movements that shaped the 1980s are revealed to have had lasting effects on international relations: The United States went from a creditor to a debtor nation; democracy crested in East Asia and returned to Latin America; the People's Republic of China moved to privatize, decentralize, and open its economy; Osama bin Laden founded Al Qaeda; and relations between Washington and Moscow thawed en route to the Soviet Union's dissolution. *The Reagan Moment* places US foreign relations into global context by examining the economic, international, and ideational relationships that bound Washington to the wider world. Editors Jonathan R. Hunt and Simon Miles bring together a cohort of scholars with fresh insights from untapped and declassified global sources to recast Reagan's pivotal years in power. mrea pdf: *Exploring Mormon Thought* Blake T. Ostler, 2006-03-01 In volume 2 of the series, *Exploring Mormon Thought: The Problems of Theism and the Love of God*, Blake Ostler explores issues related to soteriology, or the theory of salvation. He argues that the commitment that God loves us and respects our dignity as persons entails that God must leave us free to choose whether to have a saving relationship with him. He explores the “logic of love” and argues that the LDS doctrine of a war in heaven embodies the commitment that God leaves us free to choose whether to enter into relationship with God. He explores the nature of inter-personal prayer and the contributions of LDS beliefs to a robust prayer dialogue. He offers a view consistent with LDS commitments that makes sense out of asking God to assist others, to alter the natural environment and to grow in relationship with God. He then turns to the concept of grace and argues that the traditional views lead to

insurmountable problems. He argues that though God does not owe any obligation to us to give us grace, God does so out of love. However, because divinity arises from loving relationships, he argues that God could not fail to give sufficient grace to all persons and remain a loving God.

mrea pdf: The Political Economy of Migration and Post-industrialising Australia Patrick Brownlee, 2020-08-31 During the 1980s and 1990s, Australia's migration intake turned rapidly towards recruiting business professionals, managers and entrepreneurs to support the country's entry into an economic system marked by global value chains. This book analyses the policy idea termed Productive Diversity, introduced by the Australian government as a way of conceptualising the belief that migrants would bring business acumen and a global outlook to help Australia compete as a trading nation. The book examines this germinal period of Australia's economic reorientation through a close inspection of policy documents, parliamentary hearings, economic and migration statistics, and interviews with the architects of the policy. It provides a comprehensive account of how the policy framework emerged, how it was implemented, and studies the rationale in recruiting self-starters and managers to connect with global trade flows. This work will be of interest to students and researchers of migration studies, especially Australian migration, diversity policies, sociology, multiculturalism, economics, development studies, and Asia-Pacific studies. The methods and data will also be of value to political economists and policy makers.

Commission on Physical Sciences, Mathematics, and Applications, Space Studies Board, Board on Physics and Astronomy, Committee on Astronomy and Astrophysics, 2000-02-01 The Committee on Astronomy and Astrophysics (CAA), at its meeting on September 8, 1997, was briefed on the legislative report accompanying the bill to authorize appropriations for fiscal years 1998 and 1999 for the National Science Foundation (NSF). The report raised a number of questions about trends in support for research in astronomy and the overall robustness of the programs providing that support. At its meeting, the CAA heard the views of NSF and the National Aeronautics and Space Administration (NASA) on these issues. In consultation with the Board on Physics and Astronomy, the Space Studies Board, and representatives of NASA and NSF, the committee accepted the task of studying three of the questions raised by the House Science Committee (HSC). It was intended that the results of the study would help guide federal support of basic research for the next decade and serve as analytical input to the new 2000 decadal survey of the Astronomy and Astrophysics Survey Committee (AASC). The study would not offer specific funding recommendations, but rather would provide a background analysis of the alignment between available resources, agency priorities, and the vitality of the basic research program.
