navy midterms: Advances in Intelligent Tutoring Systems Roger Nkambou, Riichiro Mizoguchi, Jacqueline Bourdeau, 2010-09-21 May the Forcing Functions be with You: The Stimulating World of AIED and ITS Research It is my pleasure to write the foreword for Advances in Intelligent Tutoring Systems. This collection, with contributions from leading researchers in the field of artificial intelligence in education (AIED), constitutes an overview of the many challenging research problems that must be solved in order to build a truly intelligent tutoring system (ITS). The book not only describes some of the approaches and techniques that have been explored to meet these challenges, but also some of the systems that have actually been built and deployed in this effort. As discussed in the Introduction (Chapter 1), the terms "AIED" and "ITS" are often used interchangeably, and there is a large overlap in the researchers devoted to exploring this common field. In this foreword, I will use the term "AIED" to refer to the research area, and the term "ITS" to refer to the particular kind of system that AIED researchers build. It has often been said that AIED is "AI-complete" in that to produce a tutoring system as sophisticated and effective as a human tutor requires solving the entire gamut of artificial intelligence research (AI) problems.

navy midterms: Political Consultants and Campaigns Jason Johnson, 2018-04-19 Political Consultants and Campaigns: One Day to Sell examines the differences between how political science theory suggests campaigns should be run and how political consultants actually run campaigns. In the wake of consultants who effortlessly move from campaigners to policymakers, the dearth of knowledge about the attitudes, beliefs, and strategies of the consultants themselves is still a glaring absence in the analysis of American politics. How can we purport to know what is happening in American political campaigns if we don't know what is on the minds of the men and women who run them? This book provides a clearer understanding of modern-day political campaigns by revealing what is on the minds of the people who run them. With original data from consultants, campaign managers, and professional campaign schools, author Jason Johnson examines consultant behavior on message formation, policy positioning, candidate recruitment, Internet strategy, and negative advertising and compares these practices to existing political science theory. This groundbreaking research makes Political Consultants and Campaigns: One Day to Sell a must-have resource for all students of American politics, campaign managers, or anyone interested in how political campaigns in America are run.
