pdf goodnight moon: Human Missions to Mars Donald Rapp, 2023-01-01 In this book, Donald Rapp looks at human missions to Mars from a technological perspective. He divides the mission into a number of stages: Earth's surface to low-Earth orbit (LEO); departing from LEO toward Mars; Mars orbit insertion and entry, descent and landing; ascent from Mars; trans-Earth injection from Mars orbit and Earth return. A mission to send humans to explore the surface of Mars has been the ultimate goal of planetary exploration since the 1950s, when von Braun conjectured a flotilla of 10 interplanetary vessels carrying a crew of at least 70 humans. Since then, more than 1,000 studies were carried out. This third edition provides extensive updating and additions to the last edition, including new sections, and many new figures and tables, and references.

pdf goodnight moon: Tales of Literacy for the 21st Century Maryanne Wolf, 2016-06-24 The Literary Agenda is a series of short polemical monographs about the importance of literature and of reading in the wider world and about the state of literary education inside schools and universities. The category of 'the literary' has always been contentious. What is clear, however, is how increasingly it is dismissed or is unrecognised as a way of thinking or an arena for thought. It is sceptically challenged from within, for example, by the sometimes rival claims of cultural history, contextualized explanation, or media studies. It is shaken from without by even greater pressures: by economic exigency and the severe social attitudes that can follow from it; by technological change that may leave the traditional forms of serious human communication looking merely antiquated. For just these reasons this is the right time for renewal, to start reinvigorated work into the meaning and value of literary reading. Being Literate in the 21st Century wrestles with critical, timely questions for 21st-century society. How does literacy change the human brain? What does it mean to be a literate or a non-literate person in the present digital culture: for example, what will be lost in the present reading brain, and what will be gained with different mediums than print? What are the consequences of a digital reading brain for the literary mind and for writing itself? Can knowledge about the reading brain and advances in technology offer new forms of literacy and new forms of knowledge to the peoples in remote regions of the world who would never otherwise become literate? By using both research from cognitive neuroscience, psycholinguistics, child development, and education, and considering literary examples from world literature, Maryanne Wolf plots a course that seeks to preserve the deepest forms of reading from the past, while developing the cognitive skills necessary for this century's next generation.

pdf goodnight moon: Democracy in Picturebooks from Sweden and United States, 2000-2020 Mary Alice Barksdale, Getahun Yacob Abraham, 2021-10-18 Democracy in Picturebooks from Sweden and the United States, 2000-2020 explores democracy-themed picturebooks written for

children between the ages of three and ten. With multiple analyses of picturebooks throughout the twenty-first century, the authors illustrate how picturebooks can play a vital role in the development of children's perceptions about the different principles of democracy. From a holistic perspective, these books can be seen as the starting point for socializing children who will come to lead and participate in democratic societies themselves. The multi-pronged approach in this research introduces: (a) concepts underlying the role of picturebooks in familiarizing children with concepts about democracy, (b) research methods for picturebook analyses, (c) exploration of specific exemplar picturebooks that address democratic principles, (d) how picturebooks link democracy with human qualities, (e) utilizing democracy-themed picturebooks in the home and the school. This project holds the promise of promoting meaningful instruction of democracy through the use of picturebooks.

pdf goodnight moon: The Final Four of Everything Mark Reiter, Richard Sandomir, 2009-12-15 Edited by Mark Reiter and Richard Sandomir, and featuring contributions from experts on everything from breakfast cereal and movie gunfights to First Ladies and bald guys, *The Final Four of Everything* celebrates everything that's great, surprising, or silly in America, using the foolproof method of bracketology to determine what we love or hate-and why. As certain to make you laugh as it will start friendly arguments, *The Final Four of Everything* is the perfect book for know-it-alls, know-a-littles, and anyone with an opinion on celebrity mugshots, literary heroes, sports nicknames, or bacon. Bracketology is a unique way of organizing information that dates back to the rise of the knockout (or single elimination) tournament, perhaps in medieval times. Its origins are not precisely known, but there was genius in the first bracket design that hasn't changed much over the years. You, of course, may be familiar with the bracket format via the NCAA basketball tournament pairings each March. If you've ever watched ESPN or participated in a March Madness office pool, you know what a bracket looks like. *The Final Four of Everything* takes the idea one step further, and applies the knockout format to every category BUT basketball. In areas where taste, judgment, and hard-earned wisdom really matter, we've set out to determine, truly, the Final Four of Everything.

pdf goodnight moon: Sexual Aggression Against Children Jerome Blackman, Kathleen Dring, 2016-01-29 In *Sexual Aggression Against Children: Pedophiles' and Abusers' Development, Dynamics, Treatability, and the Law*, Drs. They address the legal and mental health professions' minimization of the horrific nature of child sexual abuse, explain how to assess pedophiles' treatability, and discuss cases of adolescent and adult predators. Also, developmental analysis of sexual predation is integrated with a review of judicial decisions regarding civil commitment and punishment of abusers. The authors suggest how courts, evaluators, and legislatures can preserve constitutional rights of sexual offenders while prioritizing protection of children.

pdf goodnight moon: *The Aesthetic of Play* Brian Upton, 2021-02-02 A game designer considers the experience of play, why games have rules, and the relationship of play and narrative. The impulse toward play is very ancient, not only pre-cultural but pre-human; zoologists have identified play behaviors in turtles and in chimpanzees. Games have existed since antiquity; 5,000-year-old board games have been recovered from Egyptian tombs. And yet we still lack a critical language for thinking about play. Game designers are better at answering small questions (Why is this battle boring?) than big ones (What does this game mean?). In this book, the game designer Brian Upton analyzes the experience of play--how playful activities unfold from moment to moment and how the rules we adopt constrain that unfolding. Drawing on games that range from Monopoly to Dungeons & Dragons to Guitar Hero, Upton develops a framework for understanding play, introducing a set of critical tools that can help us analyze games and game designs and identify ways in which they succeed or fail.

pdf goodnight moon: *Escaping Gravity* Lori Garver, 2022-06-21 A former NASA deputy administrator recounts how she battled greed and corruption to revolutionize the agency and usher in a new space age. *Escaping Gravity* is former NASA Deputy Administrator Lori Garver's firsthand account of how a handful of revolutionaries overcame the political patronage and bureaucracy that

threatened the space agency. The success of Elon Musk's SpaceX, Jeff Bezos's Blue Origin, Richard Branson's Virgin Galactic, and countless other commercial space efforts were preceded by decades of work by a group of people Garver calls "space pirates." Their quest to transform NASA put Garver in the crosshairs of Congress, the aerospace industry, and hero-astronauts trying to protect their own profits and mythology within a system that had held power since the 1950s. As the head of the NASA transition team for President-elect Barack Obama and second-in-command of the agency, Garver drove policies and funding that enabled commercial competition just as the capabilities and resources of the private sector began to mature. She was determined to deliver more valuable programs, which required breaking the self-interested space-industrial cycle that, like the military, preferred to spend billions of taxpayer dollars on programs aimed to sustain jobs and contracts in key congressional districts. The result: more efficiency and greater progress. Including insider NASA conversations and insights on how the US space industry has been transformed to become the envy of the world and is ushering in a new space age, *Escaping Gravity* offers a blueprint for how to drive productive and meaningful change. Praise for *Escaping Gravity* "Former NASA official Lori Garver offers a front-row seat to the decades-long struggles within and among space bureaucrats and space billionaires. Bring popcorn, as you bear witness to an untold slice of space history." —Neil deGrasse Tyson, Astrophysicist and author of *Space Chronicles: Facing the Ultimate Frontier* "We are living at the most exciting time in space exploration since the Apollo era, in part because the world's largest space agency, NASA, got around to trying something new, the funding of commercial crews. Lori Garver tells it like it is . . . or was for a woman effecting change at NASA despite men of the military industrial complex—and their cost-plus contracts. It wasn't rocket science, it was much harder than that. Don't take my word(s) for it; read this book." —Bill Nye, CEO, The Planetary Society "A scathing memoir that shows the ugly side of NASA while offering hope for a better future for the space agency." —Kirkus Reviews

pdf goodnight moon: Madam Speaker Marc Sandalow, 2008-04-15 Unthinkable just a generation ago, Hillary Clinton's run for the presidency and Nancy Pelosi's ascension to Speaker of the House have cast the spotlight on American political women as never before. In the 230 years of this country's history, never has a woman—let alone a mother and a grandmother—risen to such a position of power as Nancy Pelosi did when she assumed her role as the first female Speaker of the House, third in line for the presidency. In *Madam Speaker*, Marc Sandalow, an esteemed journalist and political analyst who covered Pelosi for decades, offers a richly nuanced portrait of the woman who made history. He charts Pelosi's political roots, honing in on her father, who spent five terms in Congress and stored hundreds of copies of the Congressional Record under her bed, and goes on to examine how Pelosi, who didn't run for political office until she was 47 years old, juggled her family life and fought hard to forge a place for herself in Washington, ultimately becoming one of the most influential voices in our nation. Based on hundreds of interviews with Pelosi's colleagues, family, and friends—and the Speaker herself—Sandalow culls together insightful anecdotes and political analysis to chronicle Pelosi's meteoric rise and controversial tenure. *Madam Speaker* illuminates the inspiring life of a woman who has already made history.
