Understanding Property and Casualty Insurance

Property and casualty insurance is a broad category of insurance that encompasses various types of coverage aimed at protecting individuals and businesses from financial losses. This insurance is divided into two main segments:

1. Property Insurance

Property insurance provides coverage for the policyholder's physical assets, including:

- Real estate (homes, buildings)
- Personal property (furniture, electronics, vehicles)
- Business property (inventory, equipment)

This type of insurance typically covers risks such as fire, theft, vandalism, and certain natural disasters. It ensures that the policyholder can recover financially in the event of a loss.

2. Casualty Insurance

Casualty insurance, on the other hand, protects against liability claims arising from injuries or damages caused to other people or their property. It includes:

- General liability insurance
- Workers' compensation insurance

- Professional liability insurance

Casualty insurance is vital for businesses and professionals as it provides a safety net against unforeseen legal claims and expenses.
