agilemind login: *Managing Healthcare Projects Using DSDM and Agile Project Management* Oswin Kakumanu, 2024-12-23 *Managing Healthcare Projects Using DSDM and Agile Project Management: A Comprehensive Guide for Professionals* provides a comprehensive guide to implementing agile project management (Agile PM) in healthcare. Dynamic systems development method (DSDM) is an agile project delivery framework initially used as a software development method and was originally sought to provide some discipline to the rapid application development method. Agile PM is a method that emphasises flexibility, cooperation, and iterative development, which can be especially useful in healthcare where rapid adaptability to changing circumstances is required. Traditional project management methodologies may not always be appropriate in the healthcare industry due to unique obstacles and constraints. This book addresses these issues and offers practical advice on how to use agile ideas and practices in healthcare projects. It covers a variety of topics, all specialised to the healthcare environment, such as project planning, stakeholder involvement, risk management, and quality assurance. Healthcare organisations are increasingly

recognising the value of agility in thriving in a competitive market and meeting the changing requirements of patients and staff. Agile PM has been proved in several industries to improve efficiency, stakeholder satisfaction, and overall project outcomes. Agility is critical in the healthcare sector in particular for effectively responding to crises like the COVID-19 epidemic and enabling the development of Healthcare 4.0. This book is an excellent resource for healthcare workers looking to embrace Agile PM practices. Its focus on healthcare and practical instruction sets it apart and makes it relevant to the demands of the industry. Adopting agile methodologies allows healthcare organisations to improve project outcomes, increase stakeholder satisfaction, and effectively respond to the industry's dynamic problems.

agilemind login: *API: Agile Partnership Index* Stephan J.B. Heuscher, 2022-11-17 Die Fähigkeit, sich schnell auf Veränderungen einzustellen, wird immer wichtiger. Agilität wird als Schlüssel zum Erfolg angesehen und sie wird von der Software-Entwicklung ausgehend in immer mehr Branchen erfolgreich umgesetzt. Service-Organisationen, deren Leistung auf Software aufbaut, werden mehr und mehr zu agilen Organisationen. Dabei geht die Agilisierung meist von der Software-Entwicklung oder Produkt-Parametrisierung aus. Diese ist oft nicht integraler Teil der Organisation, sondern wird durch spezialisierte Partner erbracht. Eine Partnerschaft wird beidseitig angestrebt; kundenseitig, um die hohe Abhängigkeit abzusichern und lieferanten-seitig, um stabile Profite zu erzielen. Die Unterschiede in der Erfahrung in Agilität und in der Kultur sind für Kunde und Lieferanten eine grosse Herausforderung, die sie spüren, jedoch nicht quantitativ messen können. Diese Thesis schlägt ein Modell, das Agile Partnership Index Modell (API-Modell), zur Messung des aktuellen Stands der partnerschaftlich agilen Zusammenarbeit vor und validiert dieses. Zwei Lücken der aktuellen Forschung werden adressiert: 1) die Messung von agiler Zusammenarbeit zwischen zwei Partnern, 2) die kombinierte Messung von Partnerschaft und Agilität in der Zusammenarbeit. Die Validierung des API-Modells erfolgt durch eine Umfrage zur partnerschaftlich agilen Zusammenarbeit in drei Vorhaben der öffentlichen Verwaltung des Kantons Bern und der Einordnung der Ergebnisse durch Agilitäts-Experten. Das API-Modell wurde initial und aufgrund der Validierung iterativ weiterentwickelt. Das Resultat der Thesis ist ein praktisch validiertes und verbessertes API-Modell inklusive Fragebogen zur Messung von Partnerschaft, Agilität und partnerschaftlich agiler Zusammenarbeit. Das pragmatische und einfach verständliche API-Modell ist direkt einsetzbar.
