Projects highlighted in this book incorporate multiple modes of communication (e.g., visual, aural, textual) through various digital and print-based written formats. In addition, this book particularly focuses on the possibilities that this expanded view of literacy holds for emergent to advanced bilingual students and specific scaffolds necessary for supporting them. Our focus is specifically multilingual students as classrooms across the United States and other English-speaking countries around the world become more and more diverse. The book considers educators as active participants in social change and contributors to our overall goal of social justice for all. This book grew out of work conducted by doctoral students and former doctoral students, now faculty at various universities, from the Language and Literacy Learning in Multilingual Settings (LLMS) specialization in the Department of Teaching and Learning at the School of Education and Human Development at the University of Miami, Florida.
