

climate change word search answer key

Climate change word search answer key can be an engaging tool for educators, students, and anyone interested in learning about the critical topic of climate change. Word searches not only serve as a fun activity but also help reinforce vocabulary and concepts related to global warming, environmental science, and sustainability. This article will explore the components of a climate change word search, the significance of the terms involved, and provide an answer key for a sample puzzle.

Understanding Climate Change

Climate change refers to significant alterations in temperature, precipitation patterns, and other atmospheric conditions over extended periods. The causes of climate change can be natural, such as volcanic eruptions or changes in solar energy, but the current state of climate change is predominantly driven by human activities.

Key Concepts in Climate Change

1. **Greenhouse Gases:** These gases trap heat in the atmosphere, contributing to the greenhouse effect. Major greenhouse gases include:
 - Carbon Dioxide (CO₂)
 - Methane (CH₄)
 - Nitrous Oxide (N₂O)
 - Water Vapor (H₂O)
2. **Global Warming:** A rise in average global temperatures due to increased concentrations of greenhouse gases.
3. **Carbon Footprint:** The total amount of greenhouse gases that are emitted directly or indirectly by human activities, typically measured in equivalent tons of CO₂.
4. **Climate Action:** Efforts and policies aimed at mitigating climate change and its impacts, including reducing emissions, conserving energy, and transitioning to renewable energy sources.
5. **Sustainability:** The practice of meeting present needs without compromising the ability of future generations to meet their own needs, often emphasizing ecological balance.

Creating a Climate Change Word Search

Designing a word search focused on climate change can be an effective educational strategy. The process includes selecting relevant vocabulary, constructing the grid, and ensuring that it is suitable for the intended audience.

Vocabulary Selection

When creating a word search, it's essential to include vocabulary that reflects the various aspects of climate change. Here are some suggested words to include:

- Renewable
- Emissions
- Pollution
- Sustainability
- Ecosystem
- Biodiversity
- Deforestation
- Ice Melt
- Adaptation
- Mitigation
- Fossil Fuels
- Climate
- Greenhouse
- Carbon
- Agriculture
- Conservation

Constructing the Word Search Grid

1. Grid Size: Determine the dimensions of the grid based on the number of words chosen and their lengths. A typical size could be 15x15 or 20x20.
2. Placement of Words: Words can be placed horizontally, vertically, diagonally, and even backward to increase difficulty.
3. Filling the Grid: After placing all the words, fill the remaining spaces with random letters.
4. Creating a Word List: Provide a list of the words to find, which can be included at the top or bottom of the puzzle.

Sample Climate Change Word Search

Below is a sample layout of a word search puzzle that incorporates the

vocabulary discussed earlier:

...

R E N E W A B L E F O S S I L
O L I C U O P E E M I S S I O N
E N A D A P T A T I O N C E O S
P T A E P X N I T R O U S O X I
E B I O D I V E R S I T Y T H E
R E I C E M E L T N A O C O N S
A O L H Z A D M I T I G A T I O
T L G C L I M A T E O O E S N T
I O E S O U S T A I N A B I L I
O I C O N S E R V A T I O N G A
N O E D I S A S T E R E S O C
S E M I T I G A T I O N H O P T
T A O D E F O R E S T A T I O N
E M I S S I O N A D C H O F O R
M U L G E O S Y S T E M E S N E
S U S T A I N A B I L I T Y T H
...

Word List:

- Renewable
- Emissions
- Pollution
- Sustainability
- Ecosystem
- Biodiversity
- Deforestation
- Ice Melt
- Adaptation
- Mitigation
- Fossil Fuels
- Climate
- Greenhouse
- Carbon
- Agriculture
- Conservation

Climate Change Word Search Answer Key

The answer key for the climate change word search can help individuals verify their findings. Below is a guide to where each word can be located in the grid:

1. Renewable: Row 1, Columns 1-9 (Horizontal)
2. Emissions: Row 2, Columns 5-13 (Horizontal)
3. Pollution: Row 2, Columns 9-17 (Vertical, starting from Row 2)
4. Sustainability: Row 10, Columns 1-15 (Horizontal)

5. Ecosystem: Row 9, Columns 2-10 (Vertical, starting from Row 2)
6. Biodiversity: Row 5, Columns 1-12 (Horizontal)
7. Deforestation: Row 13, Columns 1-14 (Horizontal)
8. Ice Melt: Row 6, Columns 4-11 (Horizontal)
9. Adaptation: Row 3, Columns 5-14 (Horizontal)
10. Mitigation: Row 12, Columns 1-11 (Horizontal)
11. Fossil Fuels: Row 1, Columns 10-20 (Horizontal)
12. Climate: Row 8, Columns 3-9 (Horizontal)
13. Greenhouse: Row 12, Columns 4-14 (Horizontal)
14. Carbon: Row 4, Columns 5-10 (Diagonal)
15. Agriculture: Row 6, Columns 1-12 (Horizontal)
16. Conservation: Row 10, Columns 1-12 (Horizontal)

Benefits of Using Word Searches in Climate Education

Incorporating word searches into climate education can provide a variety of benefits:

- Engagement: Students are often more engaged with interactive activities than with traditional lectures.
- Reinforcement of Vocabulary: Word searches help reinforce the terms associated with climate change, aiding in retention and understanding.
- Critical Thinking: Searching for words encourages critical thinking and problem-solving skills as students navigate through the puzzle.
- Accessibility: Word searches can be tailored to different age groups and knowledge levels, making them a versatile tool in educational settings.

Conclusion

The climate change word search answer key serves not only as a solution guide but also as an entry point into the larger discussion about climate change. By engaging with the vocabulary and concepts through interactive activities, learners can deepen their understanding of the critical issues facing our planet. Given the urgency of climate change, every educational tool that raises awareness and fosters understanding is vital for empowering individuals to take action for a sustainable future.

Frequently Asked Questions

What is a climate change word search?

A climate change word search is a puzzle where players look for words related to climate change within a grid of letters.

What types of words are commonly found in climate change word searches?

Common words include 'global warming', 'greenhouse gases', 'carbon footprint', 'renewable energy', and 'sustainability'.

How can a climate change word search be educational?

It helps raise awareness about climate change terminology and concepts, making learning fun and engaging.

Where can I find climate change word search puzzles?

You can find them in educational websites, environmental organizations, or printable puzzle resources online.

Is there an answer key available for climate change word searches?

Yes, most educational resources provide an answer key to help users check their solutions.

Can climate change word searches be used in classroom activities?

Absolutely! They can be used as an interactive tool to teach students about climate change in a fun and engaging way.

[Climate Change Word Search Answer Key](#)

climate change word search answer key: Climate Change Big Book Gr. 5-8 Erika Gasper, 2008-09-01 Get a well-rounded look at the causes, effects, and reduction of Climate Change with our 3-book BUNDLE. Start by providing insight into the science of our atmosphere with Climate Change: Causes. Create your own model of the carbon cycle. See firsthand how nitrogen-fixing bacteria can replace nitrogen fertilizers. Next, understand the Effects of Climate Change on the environment and human life. Observe a homemade melting ice sheet to understand its effect on sea level. Then, create a model to show rising sea level in action. Finally, explore creative ways to Reduce human consumption and output. Design your own dream car that runs on alternative fuel. Find out what you can do to lower your own greenhouse gas emissions. Each concept is paired with hands-on activities. Written to Bloom's Taxonomy and STEAM initiatives, additional crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: Climate Change: Effects Gr. 5-8 Erika Gasper-Gombatz, 2008-09-01 Students gain an understanding of the effects of climate change on the environment and human life. Our resource explores how the evolution of human society is affected by the climate. Start by going back in time and exploring the ice ages from Earth's past. Learn about the lives of early humans, and how climate has affected where they move and live. Observe a

homemade melting ice sheet to understand its effect on sea level. Then, create a model to show rising sea level in action. Find out if climate change has any effect on the rise of extreme weather experienced in recent years. Learn about the dangers to human health, such as mosquitoes, heat stroke and pollution. See how changes in climate affect an area's economy by virtually destroying the farming industry. Finally, choose one ecosystem and find out how climate change is affecting it. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: *Climate Change: Causes Gr. 5-8 Erika Gasper-Gombatz, 2019-04-17* Provide students with insight into the science of our atmosphere and the effects of humanity's actions on the Earth System. Our resource gives a scientific perspective on climate change that will help students separate fact from fiction. Investigate the different layers of the atmosphere. Conduct an experiment to see just how an object's color affects how much radiation it absorbs. Find out what effect rising temperatures have on Earth's oceans. Create your own model of the carbon cycle. Explain how the residence time of methane in the atmosphere could help people fight climate change. Learn what effects ozone has on human health. See firsthand how nitrogen-fixing bacteria can replace nitrogen fertilizers. Figure out why synthetic gases were banned, and how long their effects will stay in the atmosphere. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: Climate Change: Causes: Global Warming Gr. 5-8 Erika Gombatz-Gasper, 2019-07-01 ***This is the chapter slice Global Warming from the full lesson plan Climate Change: Causes*** Provide students with insight into the science of our atmosphere and the effects of humanity's actions on the Earth System. Our resource gives a scientific perspective on climate change that will help students separate fact from fiction. Investigate the different layers of the atmosphere. Conduct an experiment to see just how an object's color affects how much radiation it absorbs. Find out what effect rising temperatures have on Earth's oceans. Create your own model of the carbon cycle. Explain how the residence time of methane in the atmosphere could help people fight climate change. Learn what effects ozone has on human health. See firsthand how nitrogen-fixing bacteria can replace nitrogen fertilizers. Figure out why synthetic gases were banned, and how long their effects will stay in the atmosphere. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: *Climate Change: Reduction Gr. 5-8 Erika Gasper-Gombatz, 2008-09-01* Explore creative ways to reduce human consumption and output in an effort to help clean up our planet and reduce operating costs. Advocates and skeptics of Climate Change will both benefit from our valuable resource. Start by looking ahead at Earth's future and finding out how warm it will get. Design your own dream car that runs on alternative fuel. Research different transportation choices in your region and create a pamphlet to showcase them. Find out about product life cycles and what industries can do to lower their emissions. Create a plan of your own green city that will run completely on clean energy. Learn how green buildings work and what components go into creating this fascinating technology. See what other countries are doing to create communities free of carbon dioxide emissions and waste. Then, find out what you can do to lower your own greenhouse gas emissions. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: Climate Change: Effects: Climate and Ecosystems Gr. 5-8 Erika Gombatz-Gasper, 2019-07-01 ***This is the chapter slice Climate and Ecosystems from the full lesson plan Climate Change: Effects*** Students gain an understanding of the effects of climate change on the environment and human life. Our resource explores how the evolution of human society is affected by the climate. Start by going back in time and exploring the ice ages from Earth's past. Learn about the lives of early humans, and how climate has affected

where they move and live. Observe a homemade melting ice sheet to understand its effect on sea level. Then, create a model to show rising sea level in action. Find out if climate change has any effect on the rise of extreme weather experienced in recent years. Learn about the dangers to human health, such as mosquitoes, heat stroke and pollution. See how changes in climate affect an area's economy by virtually destroying the farming industry. Finally, choose one ecosystem and find out how climate change is affecting it. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: Climate Change: Reduction: Lowering Your Greenhouse Gas Emissions Gr. 5-8 Erika Gombatz-Gasper, 2019-07-01 ****This is the chapter slice Lowering Your Greenhouse Gas Emissions from the full lesson plan Climate Change: Reduction**** Explore creative ways to reduce human consumption and output in an effort to help clean up our planet and reduce operating costs. Advocates and skeptics of Climate Change will both benefit from our valuable resource. Start by looking ahead at Earth's future and finding out how warm it will get. Design your own dream car that runs on alternative fuel. Research different transportation choices in your region and create a pamphlet to showcase them. Find out about product life cycles and what industries can do to lower their emissions. Create a plan of your own green city that will run completely on clean energy. Learn how green buildings work and what components go into creating this fascinating technology. See what other countries are doing to create communities free of carbon dioxide emissions and waste. Then, find out what you can do to lower your own greenhouse gas emissions. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: Climate Change: Effects: Extreme Weather Gr. 5-8 Erika Gombatz-Gasper, 2019-07-01 ****This is the chapter slice Extreme Weather from the full lesson plan Climate Change: Effects**** Students gain an understanding of the effects of climate change on the environment and human life. Our resource explores how the evolution of human society is affected by the climate. Start by going back in time and exploring the ice ages from Earth's past. Learn about the lives of early humans, and how climate has affected where they move and live. Observe a homemade melting ice sheet to understand its effect on sea level. Then, create a model to show rising sea level in action. Find out if climate change has any effect on the rise of extreme weather experienced in recent years. Learn about the dangers to human health, such as mosquitoes, heat stroke and pollution. See how changes in climate affect an area's economy by virtually destroying the farming industry. Finally, choose one ecosystem and find out how climate change is affecting it. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: Climate Change: Reduction: Transportation Gr. 5-8 Erika Gombatz-Gasper, 2019-07-01 ****This is the chapter slice Transportation from the full lesson plan Climate Change: Reduction**** Explore creative ways to reduce human consumption and output in an effort to help clean up our planet and reduce operating costs. Advocates and skeptics of Climate Change will both benefit from our valuable resource. Start by looking ahead at Earth's future and finding out how warm it will get. Design your own dream car that runs on alternative fuel. Research different transportation choices in your region and create a pamphlet to showcase them. Find out about product life cycles and what industries can do to lower their emissions. Create a plan of your own green city that will run completely on clean energy. Learn how green buildings work and what components go into creating this fascinating technology. See what other countries are doing to create communities free of carbon dioxide emissions and waste. Then, find out what you can do to lower your own greenhouse gas emissions. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: Climate Change: Effects: Sea Level Changes Gr. 5-8 Erika Gombatz-Gasper, 2019-07-01 ****This is the chapter slice Sea Level Changes from the full lesson**

plan Climate Change: Effects** Students gain an understanding of the effects of climate change on the environment and human life. Our resource explores how the evolution of human society is affected by the climate. Start by going back in time and exploring the ice ages from Earth's past. Learn about the lives of early humans, and how climate has affected where they move and live. Observe a homemade melting ice sheet to understand its effect on sea level. Then, create a model to show rising sea level in action. Find out if climate change has any effect on the rise of extreme weather experienced in recent years. Learn about the dangers to human health, such as mosquitoes, heat stroke and pollution. See how changes in climate affect an area's economy by virtually destroying the farming industry. Finally, choose one ecosystem and find out how climate change is affecting it. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: Climate Change: Reduction: Green Buildings

Gr. 5-8 Erika Gombatz-Gasper, 2019-07-01 **This is the chapter slice Green Buildings from the full lesson plan Climate Change: Reduction** Explore creative ways to reduce human consumption and output in an effort to help clean up our planet and reduce operating costs. Advocates and skeptics of Climate Change will both benefit from our valuable resource. Start by looking ahead at Earth's future and finding out how warm it will get. Design your own dream car that runs on alternative fuel. Research different transportation choices in your region and create a pamphlet to showcase them. Find out about product life cycles and what industries can do to lower their emissions. Create a plan of your own green city that will run completely on clean energy. Learn how green buildings work and what components go into creating this fascinating technology. See what other countries are doing to create communities free of carbon dioxide emissions and waste. Then, find out what you can do to lower your own greenhouse gas emissions. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: Climate Change: Causes: Greenhouse Gases: Ozone

Gr. 5-8 Erika Gombatz-Gasper, 2019-07-01 **This is the chapter slice Greenhouse Gases: Ozone from the full lesson plan Climate Change: Causes** Provide students with insight into the science of our atmosphere and the effects of humanity's actions on the Earth System. Our resource gives a scientific perspective on climate change that will help students separate fact from fiction. Investigate the different layers of the atmosphere. Conduct an experiment to see just how an object's color affects how much radiation it absorbs. Find out what effect rising temperatures have on Earth's oceans. Create your own model of the carbon cycle. Explain how the residence time of methane in the atmosphere could help people fight climate change. Learn what effects ozone has on human health. See firsthand how nitrogen-fixing bacteria can replace nitrogen fertilizers. Figure out why synthetic gases were banned, and how long their effects will stay in the atmosphere. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: Climate Change: Reduction: Masdar City Gr. 5-8

Erika Gombatz-Gasper, 2019-07-01 **This is the chapter slice Masdar City from the full lesson plan Climate Change: Reduction** Explore creative ways to reduce human consumption and output in an effort to help clean up our planet and reduce operating costs. Advocates and skeptics of Climate Change will both benefit from our valuable resource. Start by looking ahead at Earth's future and finding out how warm it will get. Design your own dream car that runs on alternative fuel. Research different transportation choices in your region and create a pamphlet to showcase them. Find out about product life cycles and what industries can do to lower their emissions. Create a plan of your own green city that will run completely on clean energy. Learn how green buildings work and what components go into creating this fascinating technology. See what other countries are doing to create communities free of carbon dioxide emissions and waste. Then, find out what you can do to lower your own greenhouse gas emissions. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also

included.

climate change word search answer key: Climate Change: Causes: Greenhouse Gases: Methane Gr. 5-8 Erika Gombatz-Gasper, 2019-07-01 **This is the chapter slice Greenhouse Gases: Methane from the full lesson plan Climate Change: Causes** Provide students with insight into the science of our atmosphere and the effects of humanity's actions on the Earth System. Our resource gives a scientific perspective on climate change that will help students separate fact from fiction. Investigate the different layers of the atmosphere. Conduct an experiment to see just how an object's color affects how much radiation it absorbs. Find out what effect rising temperatures have on Earth's oceans. Create your own model of the carbon cycle. Explain how the residence time of methane in the atmosphere could help people fight climate change. Learn what effects ozone has on human health. See firsthand how nitrogen-fixing bacteria can replace nitrogen fertilizers. Figure out why synthetic gases were banned, and how long their effects will stay in the atmosphere. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: Harry's Helpers-Climate Change Elisabeth Daube, 2024-05-24 Climate Change made kid-friendly! Learn about causes and impacts of Climate Change! Discover nature and Earth's diverse inhabitants! Learn how you can help save the Earth and become a Harry's Helper! Engage in fun activities and experiments!

climate change word search answer key: Conservation: Waterway Habitat Resources: How Climate Change Can Affect Aquatic Ecosystems Gr. 5-8 George Graybill, 2017-05-11 **This is the chapter slice How Climate Change Can Affect Aquatic Ecosystems Gr. 5-8 from the full lesson plan Conservation: Waterway Habitat Resources** Students will become aware of aquatic ecosystems facing severe change around the globe. Our resource focuses on recognizing how climate change and human activities are affecting their delicate balances. Become an ecologist and list factors in an aquatic ecosystem as biotic or abiotic. Visit an aquatic ecosystem near your home and learn as much as you can through careful observations. Find out why some aquatic organisms have a hard time adapting to climate change. Explore the effects of human activity on aquatic ecosystems. Spend some time at your local aquarium to be a part of the aquatic ecosystem. Get a sense of what's to come as you look at the rate of extinction of marine species. Find out what we can do to restore aquatic dead zones. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, graphic organizers, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: Climate Change: Reduction: How Warm Will Earth Get? Gr. 5-8 Erika Gombatz-Gasper, 2019-07-01 **This is the chapter slice How Warm Will Earth Get? from the full lesson plan Climate Change: Reduction** Explore creative ways to reduce human consumption and output in an effort to help clean up our planet and reduce operating costs. Advocates and skeptics of Climate Change will both benefit from our valuable resource. Start by looking ahead at Earth's future and finding out how warm it will get. Design your own dream car that runs on alternative fuel. Research different transportation choices in your region and create a pamphlet to showcase them. Find out about product life cycles and what industries can do to lower their emissions. Create a plan of your own green city that will run completely on clean energy. Learn how green buildings work and what components go into creating this fascinating technology. See what other countries are doing to create communities free of carbon dioxide emissions and waste. Then, find out what you can do to lower your own greenhouse gas emissions. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: Climate Change: Causes: Greenhouse Gases: Nitrous Oxide Gr. 5-8 Erika Gombatz-Gasper, 2019-07-01 **This is the chapter slice Greenhouse Gases: Nitrous Oxide from the full lesson plan Climate Change: Causes** Provide students with insight into the science of our atmosphere and the effects of humanity's actions on the Earth System. Our resource gives a scientific perspective on climate change that will help students separate fact

from fiction. Investigate the different layers of the atmosphere. Conduct an experiment to see just how an object's color affects how much radiation it absorbs. Find out what effect rising temperatures have on Earth's oceans. Create your own model of the carbon cycle. Explain how the residence time of methane in the atmosphere could help people fight climate change. Learn what effects ozone has on human health. See firsthand how nitrogen-fixing bacteria can replace nitrogen fertilizers. Figure out why synthetic gases were banned, and how long their effects will stay in the atmosphere. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: Reducing Your School's Carbon Footprint: Your School and Climate Change Gr. 5-8 George Graybill, 2017-05-18 ****This is the chapter slice Your School and Climate Change Gr. 5-8 from the full lesson plan Reducing Your School's Carbon Footprint**** Bring climate change to the classroom by teaching students about their school's carbon footprint. Our resource helps students determine their school's carbon footprint and what they can do to make it smaller. Identify fossil fuels used at school and how they make your life more convenient. Brainstorm ways to reduce energy used in your school. Recognize the benefits of adding idle-free zones to your school. Explore events in the history of a slice of bread that caused the emission of greenhouse gases. Calculate the amount of carbon dioxide trees would remove from the atmosphere if they were planted around the perimeter of your school. Complete a project that will lead to a reduced school footprint. Find out how carbon offsets help reduce a school's carbon footprint. Written to Bloom's Taxonomy and STEAM initiatives, additional graphic organizers, carbon footprint calculator, crossword, word search, comprehension quiz and answer key are also included.

climate change word search answer key: Conservation: Ocean Water Resources: Climate Change and Salt Water Gr. 5-8 George Graybill, 2017-05-11 ****This is the chapter slice Climate Change and Salt Water Gr. 5-8 from the full lesson plan Conservation: Ocean Water Resources**** The oceans contain 97% of the Earth's water, cover 71% of its surface, and hold 50-80% of all life on the planet. Our resource explores the importance of conserving this vast area. Design a board game that illustrates the effects of climate change on Earth's oceans. See how the water cycle explains why most of Earth's salt water is found in the oceans. Find out how climate change will affect ocean currents, resulting in a dramatic change to the farming and fishing industries. Explain how an increase in human population can cause some salt lakes to shrink. Conduct a case study on a container ship that lost several containers in a storm in the north Pacific Ocean. Make your own salt water to represent Earth's oceans and experience what it would be like to visit them. Get tips on what we can do to help protect ocean water. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, graphic organizers, crossword, word search, comprehension quiz and answer key are also included.
