

fourth turning 2026

Fourth Turning 2026 refers to the anticipated societal and political upheaval that is expected to unfold around the year 2026, as suggested by the generational theory posited by William Strauss and Neil Howe in their influential book "The Fourth Turning: An American Prophecy." This theory proposes that history operates in cycles, each lasting roughly 80-100 years, consisting of four distinct "turnings" that correspond to generational archetypes. Understanding the implications of the Fourth Turning can provide valuable insights into potential future developments in society, politics, and culture.

The Generational Theory Explained

The Four Turnings

According to Strauss and Howe, each turning reflects a different phase in the social and political landscape:

1. **The High:** A period of prosperity and institutional confidence, which typically follows a crisis. Society is unified and focused on building and improving structures.
2. **The Awakening:** A time of spiritual renewal and questioning of established norms. Individuals begin to challenge the status quo and seek personal fulfillment.
3. **The Unraveling:** A period marked by individualism and societal fragmentation. Confidence in institutions wanes, and people become increasingly disillusioned with governance and societal structures.
4. **The Crisis:** The Fourth Turning itself, characterized by a profound upheaval that can manifest through wars, revolutions, or significant societal shifts. This crisis is often a catalyst for the reformation of society.

Generational Archetypes

In addition to the turnings, Strauss and Howe identify four generational archetypes:

1. **Prophet:** Born during a High, these individuals are visionaries and often challenge established norms during the Awakening.
2. **Nomad:** Born during an Awakening, these people are pragmatic and often become the backbone of society during the Unraveling.
3. **Hero:** Born during a Crisis, Heroes are often celebrated for their achievements and are instrumental in rebuilding society.
4. **Artist:** Born during a High, Artists are sensitive and creative individuals who contribute to cultural renewal during the High.

The Current Context: The Third Turning

As of 2023, we find ourselves in the Unraveling phase of the current cycle, which began around the early 2000s. This period has been characterized by increasing social fragmentation, political polarization, and a general sense of disillusionment with institutions. Issues such as economic inequality, climate change, and social justice movements exemplify the challenges that have led to widespread unrest.

Signs of the Unraveling

Several indicators highlight the ongoing Unraveling:

- Political Polarization: Increasing division between political parties, leading to gridlock and heightened tensions.
- Cultural Conflicts: Rising debates over identity politics, social justice, and community values.
- Economic Disparities: A growing wealth gap that fuels discontent and drives social movements.

Anticipating the Fourth Turning: 2026 and Beyond

Potential Triggers of the Crisis

As we approach 2026, several factors could potentially trigger the Fourth Turning:

1. Geopolitical Tensions: Heightened conflicts between major powers, such as the U.S., China, and Russia, could lead to military confrontations.
2. Economic Instability: A global economic downturn or financial crisis could exacerbate existing inequalities and lead to widespread unrest.
3. Climate Crisis: The impacts of climate change may create significant challenges, including resource scarcity and mass migrations, exacerbating social tensions.
4. Technological Disruption: Rapid advancements in technology, coupled with ethical dilemmas surrounding AI and privacy, may lead to societal upheaval.

Historical Precedents

Looking back at previous Fourth Turnings can provide context for what may come:

- The American Revolution (1776): A response to colonial oppression, leading to the formation of a new nation.
- The Civil War (1860-1865): A crisis that resolved deep-seated issues of slavery and state rights, resulting in a redefined society.
- The Great Depression and World War II (1929-1945): A period that reshaped global power dynamics and led to the establishment of a new world order.

Implications of the Fourth Turning

Societal Restructuring

The Fourth Turning typically leads to significant societal restructuring. Individuals and communities may need to adapt to new realities, leading to:

- Reinvented Institutions: Existing institutions may either transform significantly or collapse, paving the way for new structures that better reflect contemporary values and needs.
- Community Resilience: A focus on local communities and grassroots movements may emerge, emphasizing self-sufficiency and collaboration.

New Leadership

The leadership landscape is likely to change during the Fourth Turning. Heroes, as defined by Strauss and Howe, will emerge as influential figures able to rally communities and initiate change. This may manifest through:

- Grassroots Movements: A rise in local leaders who advocate for social justice, environmental sustainability, and community well-being.
- Political Realignments: New political coalitions may form, focusing on unity and practical solutions rather than divisiveness.

Cultural Renaissance

Crisis often leads to cultural renewal. Artists and creative individuals may play a crucial role in shaping post-crisis society by:

- Fueling Innovations: New forms of expression through art, literature, and media can inspire and unite communities.
- Challenging Norms: A re-examination of cultural values may lead to the emergence of new ideologies and narratives.

Preparing for the Fourth Turning

While the Fourth Turning is often accompanied by upheaval and uncertainty, individuals and communities can take proactive steps to prepare:

1. Fostering Community Connections: Building strong local networks can provide support and resilience during times of crisis.
2. Engaging in Civic Activities: Participating in local governance and social movements can empower individuals to influence change.
3. Investing in Skills: Developing practical skills, such as self-sufficiency, mental health awareness, and conflict resolution, can enhance personal resilience.
4. Embracing Adaptability: Cultivating a mindset of flexibility and openness can help individuals navigate the uncertainties of the Fourth Turning.

Conclusion

The concept of the Fourth Turning 2026 evokes both concern and opportunity. While the potential for societal upheaval looms, it also presents a chance for renewal and reformation. By understanding the historical context and preparing for the challenges ahead, individuals and communities can position themselves to emerge stronger and more unified from the trials of the Fourth Turning. As we look toward 2026 and beyond, it is crucial to remain engaged, informed, and adaptable to the evolving landscape of our society.

Frequently Asked Questions

What is the Fourth Turning theory and how does it relate to 2026?

The Fourth Turning theory, proposed by historians William Strauss and Neil Howe, suggests that societal events occur in a cyclical pattern of four generational archetypes, culminating in a crisis or 'Fourth Turning.' According to this theory, 2026 is anticipated to be a key year in this cycle, marking a potential societal upheaval or transformation.

What key events are predicted to occur during the Fourth Turning in 2026?

While specific events are unpredictable, the Fourth Turning is often associated with significant social, political, and economic upheaval. Analysts suggest that 2026 could see intensified conflicts, shifts in governance, or major economic disruptions as societies navigate the challenges of this transformative period.

How does the Fourth Turning theory explain the behavior of generations leading up to 2026?

The Fourth Turning theory posits that each generation has a distinct role during the four turnings. Leading up to 2026, we may observe heightened activism and engagement among younger generations as they respond to the crises and challenges posed by their predecessors, reflecting the archetypal roles of the Hero and the Artist.

What lessons can society learn from previous Fourth Turnings?

Previous Fourth Turnings, such as the Great Depression and World War II, highlight the importance of unity, resilience, and collective action in overcoming crises. Societies can learn to prioritize collaboration and innovation in addressing emerging challenges as they approach 2026.

What role does technology play in the Fourth Turning leading to 2026?

Technology is likely to play a dual role during the Fourth Turning. On one hand, it can facilitate communication and mobilization for social movements; on the other, it may exacerbate divisions and conflicts, as disparities in access and control over technology become more pronounced in the lead-up to 2026.

How can individuals prepare for the potential impacts of the Fourth Turning in 2026?

Individuals can prepare by staying informed about social and political trends, building community networks, and developing skills that promote adaptability and resilience. Engaging in dialogue about shared values and collective goals can also help foster a supportive environment as society navigates the challenges of the Fourth Turning.

fourth turning 2026: *The Fourth Turning* William Strauss, Neil Howe, 2009-01-16 NATIONAL BESTSELLER • Discover the game-changing theory of the cycles of history and what past generations can teach us about living through times of upheaval—with deep insights into the roles that Boomers, Generation X, and Millennials have to play—now with a new preface by Neil Howe.

“One of the best efforts to give us an integrated vision of where we are going.”—The Wall Street Journal First comes a High, a period of confident expansion. Next comes an Awakening, a time of spiritual exploration and rebellion. Then comes an Unraveling, in which individualism triumphs over crumbling institutions. Last comes a Crisis—the Fourth Turning—when society passes through a great and perilous gate in history. William Strauss and Neil Howe will change the way you see the world—and your place in it. With blazing originality, *The Fourth Turning* illuminates the past, explains the present, and reimagines the future. Most remarkably, it offers an utterly persuasive prophecy about how America’s past will predict what comes next. Strauss and Howe base this vision on a provocative theory of American history. The authors look back five hundred years and uncover a distinct pattern: Modern history moves in cycles, each one lasting about the length of a long human life, each composed of four twenty-year eras—or “turnings”—that comprise history’s seasonal rhythm of growth, maturation, entropy, and rebirth. Illustrating this cycle through a brilliant analysis of the post-World War II period, *The Fourth Turning* offers bold predictions about how all of us can prepare, individually and collectively, for this rendezvous with destiny.

fourth turning 2026: *The Fourth Turning Is Here* Neil Howe, 2023-07-18 Twenty-five years ago, Neil Howe and the late William Strauss dazzled the world with a provocative new theory of American history. Looking back at the last 500 years, they'd uncovered a distinct pattern: modern history moves in cycles, each one lasting roughly eighty to one hundred years, the length of a long human life, with each cycle composed of four eras--or turnings--that always arrive in the same order and each last about twenty years. The last of these eras--the fourth turning--was always the most perilous, a period of civic upheaval and national mobilization as traumatic and transformative as the New Deal and World War II, the Civil War, or the American Revolution. Now, right on schedule, our own fourth turning has arrived. And so Neil Howe has returned with an extraordinary new prediction. What we see all around us--the polarization, the growing threat of civil conflict and global war--will culminate by the early 2030s in a climax that poses great danger and yet also holds great promise, perhaps even bringing on America's next golden age. Every generation alive today will play a vital role in determining how this crisis is resolved, for good or ill.

fourth turning 2026: Summary of Neil Howe's *The Fourth Turning Is Here* Milkyway Media, 2024-01-22 Get the Summary of Neil Howe's *The Fourth Turning Is Here* in 20 minutes. Please note: This is a summary & not the original book. *The Fourth Turning Is Here* by Neil Howe explores the cyclical patterns of American history, focusing on the current transformative period known as the Fourth Turning. The book posits that America is experiencing a profound societal shift, akin to past cycles that included the American Revolution and the Civil War. Howe examines the generational archetypes—Prophet, Nomad, Hero, and Artist—that shape and respond to these historical cycles...

fourth turning 2026: *Generations of Faith* Carl G. Eeman, 2002-07-01 In 1991 a pair of Ivy League-educated Californians, William Strauss and Neil Howe, published a landmark book, *Generations: The History of America's Future from 1584 to 2069*. In *Generations* and subsequent books, they develop a theory that generational cycles repeat through American history at about 90- to 95-year intervals. In this book, Carl Eeman accepts the invitation of Strauss and Howe in *Generations*: We encourage specialists among our readers, whatever their backgrounds, to shed more light on the component pieces of the generational puzzle (p. 16). Eeman explores the cycle of four generational types from a faith perspective and applies generational ideas to the practice of ministry and to congregational issues. This book makes use of the young field of generational theory and provides a valuable tool for understanding between generations. As congregational leaders minister among the people of God, these concepts will help them be more effective leaders, clearer communicators, and more nimble troubleshooters and problem solvers. Foreword by William Strauss and Neil Howe.

fourth turning 2026: *The Fourth Turning Is Here* Neil Howe, 2026-01-13 The visionary behind the bestselling phenomenon *The Fourth Turning* looks once again to America’s past to predict our future in this “riveting and revelatory” (Tony Robbins) prophecy for how our present era

of unrest will resolve over the next ten years—and what our lives will look like afterward. Thirty years ago, Neil Howe and the late William Strauss dazzled the world with a provocative new theory of American history. Looking back at the last 500 years, they'd uncovered a distinct pattern: modern history moves in cycles, each one lasting roughly eighty to one hundred years, the length of a long human life, with each cycle composed of four eras—or “turnings”—that always arrive in the same order and each last about twenty years. The last of these eras—the fourth turning—was always the most perilous, a period of civic upheaval and national mobilization as traumatic and transformative as the New Deal and World War II, the Civil War, or the American Revolution. Now, right on schedule, our own fourth turning has arrived...and Neil Howe has returned with an extraordinary new prediction. What we see all around us—the polarization, the growing threat of civil conflict and global war—will culminate by the early 2030s in a climax that poses great danger and yet also holds great promise, perhaps even bringing on America's next golden age. Every generation alive today will play a vital role in determining how this crisis is resolved, for good or ill. “Big history and bold futurology” (The Wall Street Journal), *The Fourth Turning Is Here* takes us deep into the collective personality of each living generation to make sense of our current crisis. explore how all of us will be differently affected by the political, social, and economic challenges we'll face in the decade to come, and reveal how our country, our communities, and our families can best prepare to meet these challenges ahead.

fourth turning 2026: Supreme Court Appellate Division Fourth Dept. Vol. 2026 ,

fourth turning 2026: Boomer Destiny Tom Osenton, 2009-04-30 The U.S. experiences a major crisis about every eighty years, and the last big crisis started more than eighty years ago. If history is any indicator, argues author Tom Osenton, we are in the very early stages of the next major crisis—one that could make the Great Depression seem like a day at the beach. The storm clouds are on the horizon: A slowing U.S. economy, major banks failing, a weakening dollar, the subprime mortgage debacle, a widening gap between the wealthy and working class, credit delinquencies and bankruptcies on the rise, infrastructure crumbling, healthcare in crisis—the list goes on and on. Baby Boomers, says Osenton, are standing precisely where FDR stood at the beginning of the Great Depression, and they are in a unique position to help pull society out of the morass and set the country on a course of growth and contentment for generations to come. It's no wonder that most young people do not feel they will be better off than their parents. Besides a looming economic crisis, we face a number of other crises: budget deficit, environmental, real estate, infrastructure, education, immigration, and healthcare. Now throw in some unforeseen wild cards such as terrorism, war, disease, poverty, homelessness, and natural disasters, and you have a recipe for a cataclysmic, multi-generational failure that will take decades and trillions of dollars to fix. Boomers are about to move into the role as the elders of an America desperate for leadership. It will be Boomers who take responsibility for directing us through the minefield of crises that will profoundly shape the U.S. for decades to come. It will be the Boomers' responsibility—and their destiny and legacy—to lead the U.S. through a thicket of issues that have been back-burnered by at least the last five presidential administrations. Full of solutions to seemingly intractable problems, *Boomer Destiny* shows how they can do it.

fourth turning 2026: Journey Into Truth Kent Sayler, 2010-09-20 This book chronicles the amazing spiritual journey made by the author after a series of misfortunes took him from a happy life into an abyss filled with grief and aching loss. He thus began questioning everything about life, faith, truth, and God. In frustrated desperation, he started a five-year quest for answers to the melancholy and pain. The author writes of powerful hidden knowledge discovered during his fight back to wholeness. Through these secrets, he ultimately attained a deep, genuine sense of peace, joy, and purpose. The book shares personal details of his significant insight-filled journey, as well as the hidden formula for happiness that he uncovered along the way. His references to long-lost ancient wisdom make it easy for readers to quickly find their own pathway to profound peace and joy. They are also led to discover the means by which they can personally experience a life of true contentment, coming to understand their life's unique purpose and thereby achieving deep personal

fulfillment.

fourth turning 2026: Tracking the Storm: Uncovering the Pattern to Great Crisis Carl E. Creasman Jr., 2011-09-16 *Tracking the Storm* provides powerful clues about what is coming, rapidly, to the United States. There is little doubt that a storm is approaching the country, the outer edges of the winds already swirling around us. What does that portend for the nation? Through the clues of history, we can find direction and steps to undertake in preparation. Many believe there won't be a storm, or maybe that the worst is over. With history as a guide, Carl E Creasman Jr demonstrates that we haven't yet even reached the Great Crisis. Gripping and a scary yet necessary read, *Tracking the Storm* moves through the past 400 years of Anglo-American history to illustrate the various clues provided that show the steps to the coming crisis. Carl E Creasman Jr tells the story of political instability, economic distress, rapid technological changes and a growing philosophical divide that challenged previous generations. At the end of each Great Crisis, the nation had been radically changed.

fourth turning 2026: The Oxford Handbook of Intergenerational Connections Elizabeth F. Fideler, 2025 The need to develop connections between members of different generations is being driven by a host of trends and challenges, including demographic shifts, workforce shortages and multigenerational teams, educational gaps, caregiving demands, youth and senior health and housing problems, economic insecurity, and rapid technological change. Many of these trends and challenges, already under way, were accelerated or exacerbated by the COVID-19 pandemic. This handbook presents what is known about the spectrum of intergenerational initiatives in the United States and abroad--the very first to do so in reference book form. It addresses specifically what increases cooperation, interaction, or exchange between any two (or more) generations and how to foster the sharing of skills, knowledge, or experience between old and young. Comprising 30 chapters, each written by leading experts in their field, the handbook is organized around five sections: Cross-Generational Relationships, Older Adults Working with Younger People, Younger People Helping Older Adults, Global Perspectives on Intergenerational Relationships, and Recommendations for Strengthening and Sustaining the Intergenerational Movement.

fourth turning 2026: Re-Imagining America Chris Schaefer, 2020-05-03 This anthology covers diverse yet interconnected themes, including what it means to be a conscious witness of our times, questions about 9/11, the second Bush administration and the American Empire Project, the global economic crisis, income inequalities, personally navigating chaos and the election of Donald Trump. Here are alternative, radical ideas for social reform and tackling inequality. They offer an account of how American economic and political elites have undermined democracy and drastically weakened the U.S., while causing untold suffering in the Middle East and around the world. The author shows how we can make a lasting difference. The seeds of practical hope are nurtured for navigating chaos and for countering fear. He also suggests what we can do to re-imagine America as, e;the promise of a new beginning.e; He calls for a new Covenant between the American people and its government that engages both conservatives and progressives

fourth turning 2026: The Square Mile Murder James Ward, 2019-08-26 After a chance skirmish with an armed killer in central London, agent John Mordred ends up in hospital, condition critical. Six weeks and a full recovery later, he's persuaded it's purely a police matter, so one he should forget about. But nothing in MI7 is ever that simple. There's more to this particular incident than meets the eye and unnamed people in high places want it investigating. They believe Mordred's the man for the job. Add to the mix five missing IMF officials, the kidnapping of a top British financier in Venezuela, evidence of a related cover-up in Whitehall, a young and unpredictable London Lord Mayor with acute delusions of grandeur, plus - most bizarrely - persistent rumours of local UFO sightings, and things threaten to spin radically out of control. Suddenly Mordred's life is on the line again. This time, alongside those of innumerable others. And it's him versus the clock.

fourth turning 2026: Cycles Edward R. Dewey, 2024-03-19 Edward R. Dewey, as chief economist in the Hoover Administration, was tasked by President Hoover to figure out what caused the 1929 stock market crash and ensuing depression. In the course of his extensive investigations,

he became convinced that something important was missing from our collective knowledge of how economies and societies work—a working knowledge of cycles. He was joined in his quest to establish a “science of cycles” by other leaders of his time, including Ivy League scientists, Smithsonian Directors, Industrial CEOs, Ambassadors, and political leaders. First published in 1971, *Cycles: The Mysterious Forces that Trigger Events* was Dewey’s answer to President Hoover’s question and to many more questions which had arisen from his decades of research. Are there cycles in nature? In war? On Wall Street? In the universe? In you? Are cycles across different phenomena aligned with each other? Find out in this compelling book! You can also learn more about how Dewey’s work continues today at cycles.org.

fourth turning 2026: From Skedaddle to Selfie Allan A. Metcalf, 2016 From baby boomers with 'groovy' and 'yuppie,' to Generation X with 'whatever' and 'like,' each generation inevitably comes to use certain words that are particular to its unique time in history. Those words not only tell us a great deal about the people in those generations, but highlight their differences with other generations. In this entertaining compilation, Allan Metcalf, author of *OK: The Improbable Story of America's Greatest Word*, shows that each generation--those born within the same roughly 20-year time period--can be identified and characterized by its key words. Metcalf tells the story of the history and usage of these words, starting with the American Revolution and ending with the post-Millennial Homeland generation. With special attention to the differences in vocabulary among today's generations--the sometimes awkward Millennials, the grunge music of Generation X, hippies among the Boomers, and bobbysoxers among the Silents--*From Skedaddle to Selfie* compiles dozens of words we thought we knew, and tells the unheard stories of each and how they accompanied its generation through its time.

fourth turning 2026: Attitudes, Aptitudes, and Aspirations of American Youth National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Youth Population and Military Recruitment, 2003-02-01 Recruiting an all-volunteer military is a formidable task. To successfully enlist one eligible recruit, the Army must contact approximately 120 young people. The National Research Council explores the various factors that will determine whether the military can realistically expect to recruit an adequate fighting force—one that will meet its upcoming needs. It also assesses the military's expected manpower needs and projects the numbers of youth who are likely to be available over the next 20 years to meet these needs. With clearly written text and useful graphics, *Attitudes, Aptitudes, and Aspirations of American Youth* offers an overview of important issues for military recruiters, touching on a number of important topics including: sex and race, education and aptitude, physical and moral attributes, and military life and working conditions. In addition, the book looks at how a potential recruit would approach the decision to enlist, considering personal, family, and social values, and the options for other employment or college. Building on the need to increase young Americans' propensity to enlist, this book offers useful recommendations for increasing educational opportunities while in the service and for developing advertising strategies that include concepts of patriotism and duty to country. Of primary value to military policymakers, recruitment officers, and analysts, *Attitudes, Aptitudes, and Aspirations of American Youth* will also interest social scientists and policy makers interested in youth trends.

fourth turning 2026: Summary of The Fourth Turning Alexander Cooper, 2021-03-26 Summary of *The Fourth Turning* *The Fourth Turning* is a book by William Strauss and Neil Howe. It outlines the foundation for what is now known as Strauss-Howe generational theory. The main tenet of the book is that American and global history follows a generational cycle. The cycle is defined by four Turnings, each lasting about 20 years. Generational archetypes play a crucial role in historical events, and these archetypes recur. The cycle of the four Turnings is called a saeculum and is roughly the length of human life. The book offers a detailed description of the underlying philosophy. The key idea is seasonality. The authors offer their findings from nature and history to claim that the cyclical nature of time permeates all life, including American history. Furthermore, the authors analyze Anglo-American history to find patterns in a generational attitude. They then correlate these

characteristics to the historical events of significance. The evidence that the authors present focuses on their interpretation of key historical figures, as well as societal attitudes. The cyclical generational attitudes are the prime factor in analyzing history and politics, according to Strauss and Howe. The authors claim that race, gender, economic class, religion, and political beliefs are all less influential in determining the course of history. This claim is controversial, and authors reflect on their stance against other prominent academics, offering some comparison with several secondary sources. Overall, the evidence that the authors present is highly subjective and is not sufficiently bolstered with verifiable sources. Each generation is presented as having a unified voice, with few acknowledgments of a diversity of thought within each generational group. Therefore, the predictions are not based on solid evidence. Rather, the book puts forward a theory of generational seasonality. The authors explore what this theory could mean, but they do not offer a sufficient basis for their findings. Here is a Preview of What You Will Get: A Full Book Summary An Analysis Fun quizzes Quiz Answers Etc Get a copy of this summary and learn about the book.

fourth turning 2026: State of New York. Supreme Court Appellate Division-Fourth Department. ,

fourth turning 2026: The Oxford Handbook of the South African Economy Arkebe Oqubay, Fiona Tregenna, Imraan Valodia, 2021-11-18 While sharing some characteristics with other middle-income countries, South Africa is a country with a unique economic history and distinctive economic features. It is a regional economic powerhouse that plays a significant role, not only in southern Africa and in the continent, but also as a member of BRICS. However, there has been a lack of structural transformation and weak economic growth, and South Africa faces the profound triple challenges of poverty, inequality, and unemployment. Any meaningful debate about economic policies to address these challenges needs to be informed by a deep understanding of historical developments, robust empirical evidence, and rigorous analysis of South Africa's complex economic landscape. This volume seeks to provide a wide-ranging set of original, detailed, and state-of-the-art analytical perspectives that contribute to scientific knowledge as well as to well-informed and productive discourse on the South African economy. While concentrating on the more recent economic issues facing South Africa, the handbook also provides historical and political context. It offers an in-depth examination of strategic issues in the country's key economic sectors, and brings together diverse analytical perspectives.

fourth turning 2026: Handbook on the Science of Literacy in Grades 3-8 Susan B. Neuman, Melanie R. Kuhn, 2025-09-10 From foremost authorities, this needed work demonstrates the importance of a science of literacy perspective for teaching and learning beyond the primary grades. Contributors present cutting-edge research on reading and writing development in grades 3-8 and review evidence-based classroom practices and professional learning frameworks. The Handbook explores how to support upper elementary and middle grades learners in improving morphological knowledge and vocabulary, understanding text complexity, and building comprehension. It describes effective ways to meet the instructional needs of struggling readers and writers, including multilingual students and those with learning disabilities. Timely topics include multi-tiered systems of support, student motivation and engagement, adaptive teaching, digital and multimodal literacies, and culturally responsive and sustaining practices.
