- **Complete Grey Coverage:** Igora Royal is formulated to provide 100% grey coverage, making it an excellent choice for clients looking to cover their greys effectively.

Understanding the Igora Royal Hair Color Chart

The Igora Royal hair color chart is divided into various sections, allowing users to easily navigate through the different shades. Each color is assigned a unique code that helps identify the hue, depth, and tone. The chart is typically organized in the following way:

- **Base Color:** The first number indicates the depth of the color (ranging from 1-10, where 1 is the darkest and 10 is the lightest).
- **Tone:** The letter or letters following the base number represent the tone of the color (e.g., N for natural, A for ash, G for golden).

Here's a brief breakdown of how colors are represented:

1. **Natural (N):** Indicates a true color without any additional tones.
2. **Ash (A):** A cooler tone that can neutralize warmth in the hair.
3. **Golden (G):** A warmer tone that imparts a sunny, radiant finish.
4. **Copper (C):** A vibrant, fiery tone that is perfect for those seeking a bold

look.

5. Mahogany (M): A rich, deep tone that adds warmth and depth.

6. Red (R): A striking tone that creates a vivid, eye-catching effect.

The Igora Royal hair color chart features an extensive palette of colors, catering to a wide array of preferences. Below are some of the most popular shades:

- 4N (Medium Brown): A warm medium brown that complements a variety of skin tones.
- 7N (Blonde): A soft, light blonde that adds a fresh touch.

2. Ash Shades

- 8A (Light Blonde Ash): A light, cool blonde with a hint of grey, perfect for a sophisticated touch.

3. Golden Shades

- 7R (Medium Red): A fiery red that captures attention and exudes confidence.

Choosing the Right Shade

When selecting a shade from the Igora Royal hair color chart, there are several factors to consider to ensure the best results:

1. Skin Tone: Choose colors that complement your skin undertone. Cool undertones typically pair well with ash or cool shades, while warm undertones may suit golden or copper hues.
2. Natural Hair Color: Consider your base color. Some shades may require pre-lightening, while others can be applied directly to darker hair.
3. Desired Outcome: Decide whether you want a subtle change or a dramatic transformation. This will guide your choice of shades and tones.
4. Maintenance: Understand that brighter colors may require more upkeep, including regular touch-ups and special shampoos to maintain vibrancy.

Application Tips

To achieve the best results with Igora Royal hair colors, follow these application tips:

- Conduct a Patch Test: Always perform a patch test at least 48 hours before applying the color to check for allergies.
- Use the Right Developer: Match the developer strength with the desired outcome. A higher volume developer (30 or 40) is suitable for lifting darker colors, while a lower volume (10 or 20) is ideal for depositing color.
- Section the Hair: Divide the hair into manageable sections to ensure even application and saturation.
- Follow the Instructions: Adhere to the recommended processing time for the specific shade to achieve optimal results.

Maintaining Your Color

To prolong the vibrancy of your Igora Royal hair color, follow these maintenance tips:

- **Use Color-Safe Products:** Opt for shampoos and conditioners designed for colored hair to prevent fading.
- **Limit Heat Styling:** Reduce the use of heat styling tools, as excessive heat can lead to color loss.
- **Protect from Sun Exposure:** UV rays can fade hair color, so consider wearing a hat or using UV protection sprays when outdoors.
- **Schedule Regular Touch-Ups:** To maintain a fresh look, plan for regular touch-ups, especially for roots and faded areas.
