new study hall 2: Governing Educational Desire Andrew B. Kipnis, 2011-02-15 Parents in China greatly value higher education for their children, but the intensity and effects of their desire to achieve this goal have largely gone unexamined—until now. *Governing Educational Desire* explores the cultural, political, and economic origins of Chinese desire for a college education as well as its vast consequences, which include household and national economic priorities, birthrates, ethnic relations, and patterns of governance. Where does this desire come from? Andrew B. Kipnis approaches this question in four different ways. First, he investigates the role of local context by focusing on family and community dynamics in one Chinese county, Zouping. Then, he widens his scope to examine the provincial and national governmental policies that affect educational desire. Next, he explores how contemporary governing practices were shaped by the Confucian examination system, uncovering the historical forces at work in the present. Finally, he looks for the universal in the local, considering the ways aspects of educational desire in Zouping spread throughout China and beyond. In doing so, Kipnis provides not only an illuminating analysis of education in China but also a thought-provoking reflection on what educational desire can tell us about the relationship between culture and government.

new study hall 2: Jewish Public Culture in the Late Russian Empire Jeffrey Veidlinger, 2009-04-14 In the midst of the violent, revolutionary turmoil that accompanied the last decade of tsarist rule in the Russian Empire, many Jews came to reject what they regarded as the apocalyptic and utopian prophecies of political dreamers and religious fanatics, preferring instead to focus on the promotion of cultural development in the present. *Jewish Public Culture in the Late Russian Empire* examines the cultural identities that Jews were creating and disseminating through voluntary associations such as libraries, drama circles, literary clubs, historical societies, and even

fire brigades. Jeffrey Veidlinger explores the venues in which prominent cultural figures -- including Sholem Aleichem, Mendele Moykher Sforim, and Simon Dubnov -- interacted with the general Jewish public, encouraging Jewish expression within Russia's multicultural society. By highlighting the cultural experiences shared by Jews of diverse social backgrounds -- from seamstresses to parliamentarians -- and in disparate geographic locales -- from Ukrainian shtetls to Polish metropolises -- the book revises traditional views of Jewish society in the late Russian Empire.
